Contents

Preface ................................................................. v
Contributors............................................................. ix

1 Introduction to Hidden Markov Models and Its Applications in Biology ...... 1
M.S. Vijayabaskar

2 HMMs in Protein Fold Classification ............................... 13
Christos Lampros, Costas Papaloukas, Themis Exarchos,
and Dimitrios I. Fotiadis

3 Application of Hidden Markov Models in Biomolecular Simulations ............ 29
Saurabh Shukla, Zahra Shamsi, Alexander S. Moffett,
Balaji Selvam, and Diwakar Shukla

4 Predicting Beta Barrel Transmembrane Proteins Using HMMs .................. 43
Georgios N. Tsaousis, Stavros J. Hamodrakas,
and Pantelis G. Bagos

5 Predicting Alpha Helical Transmembrane Proteins Using HMMs ............... 63
Georgios N. Tsaousis, Margarita C. Theodoropoulou,
Stavros J. Hamodrakas, and Pantelis G. Bagos

6 Self-Organizing Hidden Markov Model Map (SOHMMM):
Biological Sequence Clustering and Cluster Visualization ....................... 83
Christos Ferles, William-Scott Beaufort, and Vanessa Ferle

7 Analyzing Single Molecule FRET Trajectories Using HMM .................. 103
Kenji Okamoto

8 Modelling ChIP-seq Data Using HMMs ................................ 115
Veronica Vinciotti

9 Hidden Markov Models in Bioinformatics: SNV Inference
from Next Generation Sequence ........................................... 123
Jiawen Bian and Xiaobo Zhou

10 Computationally Tractable Multivariate HMM in Genome-Wide
Mapping Studies ........................................................ 135
Hyungwon Choi, Debashis Ghosh, and Zhaohui Qin

11 Hidden Markov Models in Population Genomics ............................ 149
Julien Y. Dutheil

12 Differential Gene Expression (DEX) and Alternative Splicing Events (ASE)
for Temporal Dynamic Processes Using HMMs and Hierarchical
Bayesian Modeling Approaches ........................................... 165
Sunghee Oh and Seongbo Song

13 Finding RNA–Protein Interaction Sites Using HMMs ....................... 177
Tao Wang, Jongbyun Yun, Yang Xie, and Guanghua Xiao
14 Automated Estimation of Mouse Social Behaviors Based on a Hidden Markov Model......................................................... 185
   Toshiya Arakawa, Akira Tanave, Aki Takahashi, Satoshi Kakihara, Tsuyoshi Koide, and Takashi Tsuchiya

15 Modeling Movement Primitives with Hidden Markov Models for Robotic and Biomedical Applications ............................... 199
   Michelle Karg and Dana Kulić

Index ........................................................................................................ 215
Hidden Markov Models
Methods and Protocols
Westhead, D.R.; Vijayabaskar, M.S. (Eds.)
2017, X, 221 p. 59 illus., 17 illus. in color., Hardcover
