*Contributors* ........................................................... ix

## PART I  ISOLATION AND CULTURE METHODS

1  Isolation, Primary Culture, and Differentiation of Preadipocytes from Mouse Brown Adipose Tissue ............................... 3
   *Wei Gao, Xingxing Kong, and Qin Yang*

2  Isolation of Mouse Stromal Vascular Cells for Monolayer Culture ........ 9
   *Longhua Liu, Louise D. Zheng, Sarah R. Donnelly, Margo P. Emont, Jun Wu, and Zhiyong Cheng*

3  Flow Cytometry Assisted Isolation of Adipose Tissue Derived Stem Cells . . . 17
   *Umesh D. Wankhade and Sushil G. Rane*

4  Flow Cytometric Isolation and Differentiation of Adipogenic Progenitor Cells into Brown and Brite/Beige Adipocytes ............... 25
   *Jochen Steinbring, Antonia Graja, Anne-Marie Jank, and Tim J. Schulz*

5  Immuno-Magnetic Isolation and Thermogenic Differentiation of White Adipose Tissue Progenitor Cells ............................ 37
   *Rohollah Babaei, Irem Bayindir-Buchhalter, Irina Meln, and Alexandros Vegiopoulos*

6  Isolation of Immune Cells from Adipose Tissue for Flow Cytometry ........ 49
   *Jonathan R. Brestoff*

7  Differentiation and Metabolic Interrogation of Human Adipocytes .......... 61
   *Nicki A. Baker, Lindsey A. Muir, Carey N. Lumeng, and Robert W. O’Rourke*

8  Protocols for Generation of Immortalized Human Brown and White Preadipocyte Cell Lines ............................................ 77
   *Farnaz Shamsi and Yu-Hua Tseng*

## PART II  FUNCTIONAL ANALYSIS, BIOENGINEERING, AND OTHER APPLICATIONS

9  Gene Expression and Histological Analysis of Activated Brown Adipocytes in Adipose Tissue ............................................. 89
   *Yun-Hee Lee*

10 Genetic Mouse Models: The Powerful Tools to Study Fat Tissues .......... 99
    *Xingxing Kong, Kevin W. Williams, and Tiemin Liu*

11 Genetic Manipulation with Viral Vectors to Assess Metabolism and Adipose Tissue Function ............................................. 125
    *Nicolás Gómez-Banoy and James C. Lo*
