1	Contact Problems and Their Solution	1
1.1	Frictionless Contact Problems	1
1.2	Contact Problems with Friction	3
1.3	Transient Contact Problems	5
1.4	Numerical Solution of Contact Problems	6
	References	8
 Part I Basic Concepts		
2	Linear Algebra	11
2.1	Vectors and Matrices	11
2.2	Matrices and Mappings	13
2.3	Inverse and Generalized Inverse	14
2.4	Direct Methods for Solving Linear Equations	16
2.5	Norms	19
2.6	Scalar Products	20
2.7	Eigenvalues and Eigenvectors	22
2.8	Matrix Decompositions	23
2.9	Graphs, Walks, and Adjacency Matrices	26
	References	27
3	Optimization	29
3.1	Optimization Problems and Solutions	29
3.2	Unconstrained Quadratic Programming	30
3.2.1	Quadratic Cost Functions	30
3.2.2	Unconstrained Minimization of Quadratic Functions	31
3.3	Convexity	32
3.3.1	Convex Quadratic Functions	33
3.3.2	Minimizers of Convex Function	34

3.3.3	Existence of Minimizers	35
3.3.4	Projections to Convex Sets	36
3.4	Equality Constrained Problems	38
3.4.1	Optimality Conditions	40
3.4.2	Existence and Uniqueness	41
3.4.3	Sensitivity	43
3.5	Inequality Constrained Problems.	45
3.5.1	Optimality Conditions for Linear Constraints	46
3.5.2	Optimality Conditions for Bound Constrained Problems	47
3.5.3	Optimality Conditions for More General Constraints.	48
3.5.4	Existence and Uniqueness	49
3.6	Equality and Inequality Constrained Problems	50
3.6.1	Optimality Conditions	51
3.7	Duality for Quadratic Programming Problems	52
3.7.1	Uniqueness of a KKT Pair.	55
	References.	57
4	Analysis	59
4.1	Sobolev Spaces.	59
4.2	Trace Spaces.	61
4.3	Variational Inequalities	62
	References.	66
 Part II Optimal QP and QCQP Algorithms		
5	Conjugate Gradients	69
5.1	First Observations.	70
5.2	Conjugate Gradient Method	72
5.3	Rate of Convergence.	75
5.4	Preconditioned Conjugate Gradients	78
5.5	Convergence in Presence of Rounding Errors.	80
5.6	Comments and Conclusions	81
	References.	81

Part III Scalable Algorithms for Contact Problems

10	TFETI for Scalar Problems	163
10.1	Two Membranes in Unilateral Contact	164
10.2	Variational Formulation	165
10.3	Tearing and Interconnecting	167
10.4	Discretization	168
10.5	Dual Formulation	170
10.6	Natural Coarse Grid	172
10.7	Bounds on the Spectrum.	173
10.8	Optimality.	176
10.9	Numerical Experiments.	177
10.10	Comments and References	179
	References.	180
11	Frictionless Contact Problems	183
11.1	Linearized Non-penetration Conditions	184
11.2	Equilibrium of a System of Elastic Bodies in Contact	185
11.3	Variational Formulation	188
11.4	Tearing and Interconnecting	191
11.5	Discretization	193
11.6	Dual Formulation	195
11.7	Stable Evaluation of $K^+ \mathbf{x}$ by Using Fixing Nodes	197
11.8	Preconditioning by Projectors to Rigid Body Modes	199
11.9	Bounds on the Spectrum.	201
11.10	Optimality.	202
11.11	Numerical Experiments.	204
	11.11.1 Academic Benchmark	204
	11.11.2 Roller Bearings of Wind Generator	205
11.12	Comments and References	206
	References.	207
12	Contact Problems with Friction	211
12.1	Equilibrium of Bodies in Contact with Coulomb Friction.	212
12.2	Variational Formulation	213
12.3	Tresca (Given) Isotropic Friction	215
12.4	Orthotropic Friction	216
12.5	Domain Decomposition and Discretization	218
12.6	Dual Formulation	219
12.7	Preconditioning by Projectors to Rigid Body Modes	221
12.8	Optimality.	223
12.9	Numerical Experiments.	224
	12.9.1 Academic Benchmark	225
	12.9.2 Yielding Clamp Connection.	226

12.10	Comments and References	227
	References.	228
13	Transient Contact Problems	231
13.1	Transient Multibody Frictionless Contact Problem	232
13.2	Variational Formulation and Domain Decomposition	234
13.3	Discretization	235
13.4	Dual Formulation of Time Step Problems.	237
13.5	Bounds on the Spectrum of Dual Energy Function.	238
13.6	Preconditioning by Conjugate Projector	240
13.7	Optimality.	244
13.8	Numerical Experiments.	246
	13.8.1 Academic Benchmark	246
	13.8.2 Impact of Three Bodies.	248
13.9	Comments.	248
	References.	249
14	TBETI	251
