## Contents

*Preface* ..........................................................  v  
*Contributors* .................................................... xi  

1 Expression and Purification of Recombinant Proteins  
in *Escherichia coli* with a His₆ or Dual His₆-MBP Tag  
*Sreejith Raran-Kurussi and David S. Waugh*  

2 Protein Crystallization .............................................  17  
*Alexander McPherson*  

3 Advanced Methods of Protein Crystallization .........................  51  
*Abel Moreno*  

4 The “Sticky Patch” Model of Crystallization and Modification of Proteins  
for Enhanced Crystallizability  
*Zygmunt S. Derewenda and Adam Godzik*  

5 Crystallization of Membrane Proteins: An Overview ...............  117  
*Andrii Ishchenko, Enrique E. Abola, and Vadim Cherezov*  

6 Locating and Visualizing Crystals for X-Ray Diffraction Experiments .......  143  
*Michael Becker, David J. Kissick, and Craig M. Ogata*  

7 Collection of X-Ray Diffraction Data from Macromolecular Crystals ........  165  
*Zbigniew Dauter*  

8 Identifying and Overcoming Crystal Pathologies: Disorder and Twinning ....  185  
*Michael C. Thompson*  

9 Applications of X-Ray Micro-Beam for Data Collection ...............  219  
*Ruslan Sanishvili and Robert F. Fischetti*  

10 Serial Synchrotron X-Ray Crystallography (SSX) ....................  239  
*Kay Diederichs and Meitian Wang*  

11 Time-Resolved Macromolecular Crystallography at Modern X-Ray Sources...  273  
*Marius Schmidt*  

*Henry N. Chapman*  

13 Processing of XFEL Data .......................................  325  
*Thomas A. White*  

14 Many Ways to Derivatize Macromolecules and Their Crystals for Phasing ....  349  
*Miroslawa Dauter and Zbigniew Dauter*  

15 Experimental Phasing: Substructure Solution and Density Modification  
as Implemented in SHELX .......................................  357  
*Andrea Thorn*  

---
Contemporary Use of Anomalous Diffraction in Biomolecular Structure Analysis .............................................. 377
Qun Liu and Wayne A. Hendrickson

Long-Wavelength X-Ray Diffraction and Its Applications in Macromolecular Crystallography ................................. 401
Manfred S. Weiss

Acknowledging Errors: Advanced Molecular Replacement with Phaser .......................................... 421
Airlie J. McCoy

Rosetta Structure Prediction as a Tool for Solving Difficult Molecular Replacement Problems .......................... 455
Frank DiMaio

Radiation Damage in Macromolecular Crystallography ............................ 467
Elspeth F. Garman and Martin Weik

Boxes of Model Building and Visualization ........................................... 491
Dušan Turk

Structure Refinement at Atomic Resolution ........................................ 549
Mariusz Jaskolski

Low Resolution Refinement of Atomic Models Against Crystallographic Data ........................................... 565
Robert A. Nicholls, Oleg Kovalevskiy, and Garib N. Murshudov

Stereochemistry and Validation of Macromolecular Structures ........................................... 595
Alexander Wlodawer

Validation of Protein–Ligand Crystal Structure Models: Small Molecule and Peptide Ligands .......................... 611
Edwin Pozharski, Marc C. Deller, and Bernhard Rupp

Protein Data Bank (PDB): The Single Global Macromolecular Structure Archive ........................................... 627

Databases, Repositories, and Other Data Resources in Structural Biology ........................................... 643
Heping Zheng, Przemyslaw J. Porebski, Marek Grabowski, David R. Cooper, and Wladek Minor

Index ......................................................................................................................... 667
Protein Crystallography
Methods and Protocols
Wlodawer, A.; Dauter, Z.; Jaskolski, M. (Eds.)
2017, XIII, 672 p. 173 illus., 145 illus. in color.,
