Contents

Preface .................................................................................................................. v
Contributors ......................................................................................................... xiii

PART I  SYNTHETIC BIOLOGY, CHEMICAL BIOLOGY, AND SCREENING APPROACHES

1  Optogenetic Control of Ras/Erk Signaling Using the Phy–PIF System ........ 3
   Alexander G. Goglia, Maxwell Z. Wilson, Daniel B. DiGiorno, and Jared E. Toettcher

2  Dissecting Kinase Effector Signaling Using the RapRTAP Methodology .... 21
   Anne-Marie Ray, Jennifer E. Klomp, Kerrie B. Collins, and Andrei V. Karginov

3  Single-Cell Imaging of ERK Signaling Using Fluorescent Biosensors ....... 35
   Michael Pargett, Taryn E. Gillies, Carolyn K. Teragawa, Breanne Sparta, and John G. Albeck

4  Quantification of Cell Signaling Networks Using Kinase Activity
   Chemosensors .................................................................................................. 61
   Jon R. Beck, Edward N. Harris, and Cliff I. Stains

5  Expression of Recombinant Phosphoproteins for Signal
   Transduction Studies ......................................................................................... 71
   Karl W. Barber and Jesse Rinehart

6  Allosteric Modulation of Src Family Kinases with ATP-Competitive
   Inhibitors .......................................................................................................... 79
   Ames C. Register, Sujata Chakraborty, and Dustin J. Maly

7  Characterization of Ligand Binding to Pseudokinases Using a Thermal
   Shift Assay ...................................................................................................... 91
   Isabelle S. Lucet and James M. Murphy

8  Proteomic Profiling of Protein Kinase Inhibitor Targets by Mass
   Spectrometry .................................................................................................. 105
   Martin Golkowski, Dustin J. Maly, and Shao-En Ong

9  Utilizing the Luminex Magnetic Bead-Based Suspension Array
   for Rapid Multiplexed Phosphoprotein Quantification .................................. 119
   Adam Stewart and Udai Banerji

10 High-Content Imaging and RNAi Screens for Investigating Kinase
    Network Plasticity ......................................................................................... 133
    Simon R. Stockwell and Sibylle Mittnacht

11 Analysis of Drug Resistance Using Kinome-Wide Functional Screens ...... 163
    Katherine R. Singleton, Keith T. Earley, and Lynn E. Heasley

12 Identification and Validation of Driver Kinases from Next-Generation
    Sequencing Data ......................................................................................... 179
    Andri Leonidou, Barrie Peck, and Rachael Natrajan
PART II  MASS SPECTROMETRY AND METABOLIC ANALYSIS OF KINASE SIGNALING

13 Label-Free Phosphoproteomic Approach for Kinase Signaling Analysis .......... 199
   Edmund Wilkes and Pedro R. Cutillas

14 Cell-Specific Labeling for Analyzing Bidirectional Signaling
   by Mass Spectrometry ............................................. 219
   Christopher J. Tape and Claus Jørgensen

15 Characterization of the Phospho-Adhesome by Mass Spectrometry-Based
   Proteomics ............................................................ 235
   Joseph Robertson, Jonathan D. Humphries, Nikki R. Paul,
   Stacey Warwood, David Knight, Adam Byron, and Martin J. Humphries

16 Analysis of Phosphotyrosine Signaling Networks in Lung Cancer Cell Lines ..... 253
   Malgorzata Broncel and Paul H. Huang

17 Targeted Analysis of Phosphotyrosine Signaling by Multiple Reaction
   Monitoring Mass Spectrometry .................................... 263
   Leo S. Payne and Paul H. Huang

18 Phosphoproteomic Analysis of Isolated Mitochondria in Yeast .................. 283
   Margaux Renvoise, Ludovic Bonhomme, Marlène Davanture,
   Michel Zivy, and Claire Lemaire

19 A Methodology for Comprehensive Analysis of Toll-Like Receptor
   Signaling in Macrophages ............................................. 301
   Marijke Koppenol-Raab and Aleksandra Nita-Lazar

20 Absolute Phosphorylation Stoichiometry Analysis by Motif-Targeting
   Quantitative Mass Spectrometry .................................... 313
   Chia-Feng Tsai, Wei-Chi Ku, Yu-Ju Chen, and Yasushi Ishihama

21 Identification of Plant Kinase Substrates Based on Kinase Assay-Linked
   Phosphoproteomics .................................................... 327
   Chuan-Chih Hsu, Justine V. Arrington, Liang Xue, and W. Andy Tao

22 Mass Spectrometry Analysis of Spatial Protein Networks by Colocalization
   Analysis (COLA) ....................................................... 337
   Faraz K. Mardakheh

23 Development of Selected Reaction Monitoring Methods to Systematically
   Quantify Kinase Abundance and Phosphorylation Stoichiometry
   in Human Samples ..................................................... 353
   Kirsten Beck, Nathan Camp, Michael Bereman, James Bollinger,
   Jarrett Egerton, Michael MacCoss, and Alejandro Wolf-Yadlin

24 Analysis of Signaling Networks at the Single-Cell Level Using
   Mass Cytometry ...................................................... 371
   Shovik Bandyopadhyay, Daniel A.C. Fisher, Olga Malkova,
   and Stephen T. Oh

25 Magnetic Resonance Spectroscopy (MRS)-Based Methods for Examining
   Cancer Metabolism in Response to Oncogenic Kinase Drug Treatment .......... 393
   Yuen-Li Chung
26 Deconstructing the Metabolic Networks of Oncogenic Signaling Using Targeted Liquid Chromatography-Tandem Mass Spectrometry (LC-MS/MS) .......................................................... 405
   George Poulogiannis

PART III   COMPUTATIONAL ANALYSIS OF KINASE SIGNALING NETWORKS

27 Modeling of Receptor Tyrosine Kinase Signaling: Computational and Experimental Protocols ......................................................... 417
   Dirk Fey, Edita Aksamitiene, Anatoly Kiyatkin, and Boris N. Kholodenko

28 An Interdisciplinary Approach for Designing Kinetic Models of the Ras/MAPK Signaling Pathway ........................................ 455
   Marcelo S. Reis, Vincent Noël, Matheus H. Dias, Layra L. Albuquerque, Amanda S. Guimarães, Lulu Wu, Junior Barrera, and Hugo A. Armelin

29 Databases and Computational Tools for Evolutionary Analysis of Protein Phosphorylation ......................................................... 475
   Chris Soon Heng Tan

30 Informatics Approaches for Predicting, Understanding, and Testing Cancer Drug Combinations ........................................ 485
   Jing Tang

31 Target Inhibition Maps Based on Responses to Kinase Inhibitors ............. 507
   Noah Berlow and Ranadip Pal

32 Partial Least Squares Regression Models for the Analysis of Kinase Signaling .......................................................... 523
   Danielle L. Bourgeois and Pamela K. Kreeger

Index ...................................................................... 535
Kinase Signaling Networks
Tan, A.-C.; Huang, P.H. (Eds.)
2017, XVII, 537 p. 112 illus., 74 illus. in color., Hardcover
ISBN: 978-1-4939-7152-7
