

Contents

1 Lipschitz Global Optimization	1
1.1 Problem Statement	1
1.2 Lipschitz Condition and Its Geometric Interpretation	7
1.3 Multidimensional Approaches	10
2 One-Dimensional Algorithms and Their Acceleration	19
2.1 One-Dimensional Lipschitz Global Optimization	19
2.2 Geometric LGO Methods for Non-differentiable Functions	22
2.3 Geometric LGO Methods for Differentiable Functions with the Lipschitz First Derivatives	30
2.4 Acceleration Techniques Embedded in the Univariate Global Optimization	36
2.5 Numerical Illustrations	44
3 Diagonal Approach and Efficient Diagonal Partitions	53
3.1 General Diagonal Scheme	53
3.2 Analysis of Traditional Diagonal Partition Schemes	59
3.3 Non-redundant Diagonal Partition Strategy	65
4 Global Optimization Algorithms Based on the Non-redundant Partitions	77
4.1 Multiple Estimates of the Lipschitz Constant	77
4.2 Derivative-Free Diagonal Method <i>MULTL</i>	79
4.2.1 Theoretical Background of <i>MULTL</i> : Lower Bounds	79
4.2.2 Theoretical Background of <i>MULTL</i> : Finding Non-dominated Hyperintervals	82
4.2.3 Description of the <i>MULTL</i> Algorithm and its Convergence Analysis	87

4.3	One-Point-Based Method <i>MULTK</i> for Differentiable Problems	93
4.3.1	Theoretical Background of <i>MULTK</i> : Lower Bounds.	94
4.3.2	Theoretical Background of <i>MULTK</i> : Non-dominated Hyperintervals	96
4.3.3	Description of the <i>MULTK</i> Algorithm and its Convergence Analysis	98
4.4	Numerical Experiments with the <i>MULTL</i> and <i>MULTK</i> Methods	101
4.5	A Case Study: Fitting a Sum of Dumped Sinusoids to a Series of Observations.	110
4.5.1	Examples Illustrating the Complexity of the Problem	113
4.5.2	Derivatives and Simplifications of the Benchmark Objective Functions.	115
4.5.3	Numerical Examples and Simulation Study.	117

Deterministic Global Optimization
An Introduction to the Diagonal Approach
Sergeyev, Y.D.; Kvasov, D.E.
2017, X, 136 p. 39 illus., Softcover
ISBN: 978-1-4939-7197-8
