Contents

1 Lipschitz Global Optimization ..................................................... 1
   1.1 Problem Statement ............................................................ 1
   1.2 Lipschitz Condition and Its Geometric Interpretation ............... 7
   1.3 Multidimensional Approaches ............................................. 10

2 One-Dimensional Algorithms and Their Acceleration ....................... 19
   2.1 One-Dimensional Lipschitz Global Optimization ....................... 19
   2.2 Geometric LGO Methods for Non-differentiable Functions ........... 22
   2.3 Geometric LGO Methods for Differentiable Functions
      with the Lipschitz First Derivatives ...................................... 30
   2.4 Acceleration Techniques Embedded in the Univariate Global
      Optimization ................................................................. 36
   2.5 Numerical Illustrations .................................................... 44

3 Diagonal Approach and Efficient Diagonal Partitions ....................... 53
   3.1 General Diagonal Scheme ................................................... 53
   3.2 Analysis of Traditional Diagonal Partition Schemes .................... 59
   3.3 Non-redundant Diagonal Partition Strategy ............................... 65

4 Global Optimization Algorithms Based on the Non-redundant
   Partitions .............................................................................. 77
   4.1 Multiple Estimates of the Lipschitz Constant ............................. 77
   4.2 Derivative-Free Diagonal Method MULTL .................................. 79
      4.2.1 Theoretical Background of MULTL: Lower Bounds ............... 79
      4.2.2 Theoretical Background of MULTL: Finding
         Non-dominated Hyperintervals ............................................. 82
      4.2.3 Description of the MULTL Algorithm
         and its Convergence Analysis ............................................ 87

Deterministic Global Optimization
An Introduction to the Diagonal Approach
Sergeyev, Y.D.; Kvasov, D.E.
2017, X, 136 p. 39 illus., Softcover
ISBN: 978-1-4939-7197-8
