Contents

Preface ................................................................. v
Contributors ................................................................ ix

Measuring Sphingosine-1-Phosphate/Protein Interactions with the Kinetic Exclusion Assay ................................................................. 1
Jonathan K. Fleming and Jonathan M. Wojciak

An Improved Isoform-Selective Assay for Sphingosine Kinase 1 Activity ................................................................. 9
Melissa R. Pitman, Lorena T. Davies, and Stuart M. Pitson

Methods for Analyzing Sphingosine-1-Phosphate Signaling in Human and Mouse Primary Mast Cells ......................................................... 21
Alena P. Chumanevich, Piper A. Wedman, and Carole A. Oskeritzian

Measurement of Lysophosphatidic Acid and Sphingosine-1-Phosphate by Liquid Chromatography-Coupled Electrospray Ionization Tandem Mass Spectrometry ................................................................. 31
Maria P. Kraemer, Suchismita Halder, Susan S. Smyth, and Andrew J. Morris

Immunohistochemical Detection of Sphingosine-1-Phosphate and Sphingosine Kinase-1 in Human Tissue Samples and Cell Lines ......................................................... 43
Gary M. Reynolds, Barbara Visentin, and Roger Sabbadini

A Cleanup Method for Mass Spectrometric Analysis of Sphingosine- and Ceramide-1-Phosphate in Blood and Solid Tissue Using a Phosphate Capture Molecule ................................................................. 57
Jun-ichi Morishige, Ryouhei Yamashita, Tamotsu Tanaka, and Kiyoshi Satouchi

A Rapid Fluorescence Assay for Measuring Sphingosine-1-Phosphate Transporter Activity in Erythrocytes ......................................................... 73
Naoki Kobayashi and Tsuyoshi Nishi

Analysis of S1P Receptor Expression by Uterine Immune Cells Using Standardized Multi-parametric Flow Cytometry ......................................................... 83
Jianhong Zhang, Annie Bang, and Stephen J. Lye

S1P Synergizes with Wall Shear Stress and Other Angiogenic Factors to Induce Endothelial Cell Sprouting Responses ......................................................... 99
Camille L. Duran, Roland Kaunas, and Kayla J. Bayless

In Vitro Methods to Study the Modulation of Migration and Invasion by Sphingosine-1-Phosphate ......................................................... 117
Melina G. Castro, Ludmila E. Campos, Yamila I. Rodriguez, and Sergio E. Alvarez

Maintenance of Human Embryonic Stem Cells by Sphingosine-1-Phosphate and Platelet-Derived Growth Factor ......................................................... 133
Raymond C.B. Wong, Martin F. Pera, and Alice Pèbay
