Preface .....	v
Contributors .....	xi

## PART I COMMUNITIES AND BIOFILMS

1 Isolation and Molecular Characterization of Seawater Bacteria <i>Juliana M. Benito, Gustavo A. Lovrich, Faustino Siñeriz, and Carlos M. Abate</i> .....	3
2 Reverse Sample Genome Probing to Monitor Microbial Communities <i>E. Anne Greene and Gerrit Voordouw</i> .....	11
3 T-RFLP Analysis: A Rapid Fingerprinting Method for Studying <i>Diversity, Structure, and Dynamics of Microbial Communities</i> <i>Werner Liesack and Peter F. Dunfield</i> .....	23
4 Assessing Bacterial DNA Content in Aquatic Systems <i>Garrett W. Pernè, Betsy R. Robertson, and D. K. Button</i> .....	39
5 Multiplexed Identification and Quantification of Analyte DNAs in Environmental Samples Using Microspheres and Flow Cytometry <i>Mary Lowe, Alex Spiro, Anne O. Summers, and Joy Wireman</i> .....	51
6 Molecular Characterization of Microbial Communities From Marine Environments <i>Nicolás G. Barengo, Juliana M. Benito, and Carlos M. Abate</i> .....	75
7 Yeasts: <i>Ecology in Northwest Argentina</i> <i>Lucía I. C. de Figueroa, M. Alejandra Martínez, and John F. T. Spencer</i> .....	83
8 Aeromonads in Environmental Waters <i>Anavella Gaitan Herrera</i> .....	97
9 Development of a Vital Fluorescent Staining Method for Monitoring Bacterial Transport in Subsurface Ground Water <i>Mark E. Fuller</i> .....	103
10 Bench Scale Flow Cell for Nondestructive Imaging of Biofilms <i>Eric S. Gilbert and Jay D. Keasling</i> .....	109

## PART II FERMENTED MILKS

11 $\alpha$ -Galactosidase Assay in Fermented Soymilk Products <i>Marisa S. Garro, Graciela Font de Valdez, and Graciela Savoy de Giori</i> .....	121
--	-----

12	Considerations to Avoid the Overestimation of Exopolysaccharides Produced by Lactic Acid Bacteria <b>María Inés Torino and Graciela Font de Valdez</b> .....	125
13	Determination of Oligosaccharides in Fermented Soymilk Products by High-Performance Liquid Chromatography <b>Marisa S. Garro, Graciela Font de Valdez, and Graciela Savoy de Giori</b> .....	135
14	Evaluation of Minimal Nutritional Requirements of Lactic Acid Bacteria Used in Functional Foods <b>Elvira M. Hébert, Raúl R. Raya, and Graciela Savoy de Giori</b> .....	139
<b>PART III NUCLEIC ACIDS, RECOVERY, AND DETERMINATION</b>		
15	A Simple Method for Obtaining DNA Suitable for RAPD Analysis From <i>Azospirillum</i> <b>Raúl O. Pedraza and Juan C. Díaz Ricci</b> .....	151
16	PCR Fingerprinting of rRNA Intergenic Spacer Regions for Molecular Characterization of Environmental Bacteria Isolates <b>M. Alejandra Martínez and Faustino Siñeriz</b> .....	159
17	A DNA–DNA Hybridization Method for the Detection and Quantification of Specific Bacterial Taxa in Natural Environments <b>Christopher E. Bagwell and Charles R. Lovell</b> .....	167
18	<sup>13</sup> C and <sup>1</sup> H NMR Study of the Glycogen Futile Cycle in <i>Fibrobacter succinogenes</i> <b>Anne-Marie Delort, Genevieve Gaudet, and Evelyne Forano</b> .....	173
19	Chemical Analysis and Biological Removal of Wood Lipids Forming Pitch Deposits in Paper Pulp Manufacturing <b>Ana Gutiérrez, José C. del Río, and Ángel T. Martínez</b> .....	189
20	Propolis: <i>Chemical Micro-Heterogeneity and Bioactivity</i> <b>José Domingos Fontana, Juliana Adelman, Mauricio Passos, Marcelo Maraschin, Cristina A. de Lacerda, and Fernando Mauro Lanças</b> .....	203
21	Enzymatic Saccharification of Cellulosic Materials <b>Luiz Pereira Ramos and José Domingos Fontana</b> .....	219
22	Molecular Identification of Microbial Populations in Petroleum-Contaminated Groundwater <b>Kazuya Watanabe, Natsuko Hamamura, and Nobuo Kaku</b> .....	235
23	Identification of Copper-Resistant Microorganisms by PCR <b>Virginia H. Albarracín, Juliana M. Benito, Manuel Siñeriz Louis, María J. Amoroso, and Carlos M. Abate</b> .....	243

- 24 Selection of Tolerant Heavy Metal Yeasts  
From Different Polluted Sites  
**Liliana Villegas, María J. Amoroso, and Lucía I. C. de Figueroa** ..... 249
- 25 Medium for Differential Enumeration of *Lactobacillus casei*  
and *Lactobacillus acidophilus* From Lyophilized Mixed Cultures  
**Mónica M. Locascio, Rosalía Alesso, Vilma I. Morata,  
and Silvia N. González** ..... 257
- 26 Silk as a Means of Recovering Bacteriocin From a Culture Medium  
**M. Carina Audisio and María C. Apella** ..... 263
- 27 Optimization of a Method for Isolating Plasmid DNA From Lactic  
Acid Bacteria From Wine  
**Fabiana M. Saguir and María C. Manca de Nadra** ..... 269
- 28 Simultaneous and Sequential Methods to Study Interactions  
Between Yeast and Lactic Acid Bacteria From Wine  
**Marta E. Farías and María C. Manca de Nadra** ..... 275
- 29 Method for Determining Lindane Concentration in Water  
and Solid Samples  
**Claudia S. Benimeli, Adriana P. Chaile, and María J. Amoroso** ..... 279
- 30 Extracellular Hydrolytic Enzymes Produced by Yeasts  
**Fabio Vazquez, Martha Dina Vallejo Herrera,  
Lucía I. C. de Figueroa, and María Eugenia Toro** ..... 283
- 31 Extracellular Hydrolytic Enzymes Produced by Phytopathogenic  
Fungi  
**Martha Dina Vallejo Herrera, María Eugenia Toro,  
Lucía I. C. de Figueroa, and Fabio Vazquez** ..... 299
- 32 An Analysis of Microorganisms in Environments  
Using Denaturing Gradient Gel Electrophoresis  
**Paul W. Baker and Shigeaki Harayama** ..... 323
- 33 Testing for Evolutionary Correlations in Microbiology Using  
Phylogenetic Generalized Least Squares  
**Scott R. Miller** ..... 339
- 34 Conjugated Linoleic Acid Detection Produced by Dairy Starter  
Cultures  
**Carina Van Nieuwenhove, Silvia N. González,  
and Alicia Bardón** ..... 353

#### PART IV REVIEWS

- 35 Techniques for Manipulating the Bacterial Endophyte *Bacillus  
mojavensis*  
**Charles W. Bacon and Dorothy M. Hinton** ..... 359

36	Engineering of Bacteria Using the <i>Vitreoscilla</i> Hemoglobin Gene to Enhance Bioremediation of Aromatic Compounds <b>Benjamin C. Stark, Dale A. Webster, and Krishna R. Pagilla</b> .....	379
37	The Use of Chemical Shift Regents and $^{23}\text{Na}$ NMR to Study Sodium Gradients in Microorganisms <b>Anne-Marie Delort, Genevieve Gaudet, and Evelyne Forano</b> .....	389
38	Denaturing Gradient Gel Electrophoresis (DGGE) as a Fingerprinting Tool for Analyzing Microbial Communities in Contaminated Environments <b>Laurent Eyers, Spiros N. Agathos, and Said El Fantroussi</b> .....	407
Index	.....	419
