Preface

This manual is dedicated to all residents past and present who have donated their time and effort to the advancement of radiology trainee interests. The manual represents the work of many individuals who have contributed their expertise and resources toward producing a product that will hopefully be of great use to all radiology residents, fellows, and young radiologists. This work has gone through many revisions since the idea was originally conceived and will continue to reflect changing conditions and practices in the years to follow.

Residents and fellows are in a unique position given the fact that they are, by definition, trainees. The individuals contributing to the advancement of resident issues are not paid for their efforts nor do they receive many academic accolades for their time spent on resident interests. The importance of their efforts is, however, paramount in the overall scheme of organized medicine and radiology. To these residents I say congratulations and thank you for a job well done.

Douglas P. Beall, MD  
Assistant Professor, Department of Radiology and Nuclear Medicine, Uniformed Services University of Health Sciences, Bethesda, MD  
Staff Radiologist and Division Chief, Musculoskeletal Radiology, Wilford Hall Medical Center, San Antonio, TX  
Former Fellow in Musculoskeletal Radiology, Mayo Graduate School of Medicine, Rochester, MN
Radiology Sourcebook
A Practical Guide for Reference and Training
