CONTENTS

Series Introduction ........................................................................................................ vii
Preface .......................................................................................................................... xiii
Contributors ................................................................................................................ xix

I OVERVIEW

1 Overview and Molecular Aspects of the Insulin-Like Growth Factor System ...................... 3
   Martin L. Adamo, Lai Wang, Lisa Heron, Dalit Ben-Yosef, Hong Zhao, and Derek Le Roith

II IGF AND NUTRITIONAL STATUS

2 Regulation of Insulin-Like Growth Factor-I by Nutrition .................................................. 25
   Jean-Paul Thissen, Véronique Beauloye, Jean-Marie Ketelslegers, and Louis E. Underwood

3 Nutrition and IGF Proteins in Chronic Malnutrition and Critical Illness ............................ 53
   Pei-Ra Ling and Bruce R. Bistrian

4 The Insulin-Like Growth Factors and Assessment of Nutritional Status ............................ 75
   M. Sue Houston

III GROWTH AND DEVELOPMENT

5 Regulation of Growth and the Insulin Growth Factor System by Zinc ................................. 107
   Ruth S. MacDonald

6 The Role of the Insulin-Like Growth Factor System in Pre- and Postnatal Growth, Development, and Tumorigenesis ............................................................... 121
   Charles T. Roberts, Jr.

7 The Insulin-Like Growth Factor Axis in the Fetus and Neonate ...................................... 133
   Cynthia L. Blanco and Robert J. Ferry, Jr.

8 Nutrition and the IGF System in Reproduction ............................................................... 145
   Frank A. Simmen, Inseok Kwak, Jason L. Blum, and Rosalia C. M. Simmen

9 The Insulin Growth Factor System and Nutrition in Adulthood and Aging ..................... 157
   Moira S. Lewitt and Kerstin Hall

xvii
IV  IGF AND ORGAN SYSTEMS
10 Nutrition and Insulin Growth Factor-I in Relation to Bone
   Health and Disease ................................................................. 177
   Jean-Philippe Bonjour, Patrick Ammann,
   Thierry Chevalley, and René Rizzoli
11 Effect of Insulin-Like Growth Factor Proteins
   on Skeletal Muscle Protein Metabolism During
   Normal and Catabolic Conditions ......................................... 193
   Charles H. Lang and Robert A. Frost
12 Insulin-Like Growth Factors and Nervous
   System Disorders .................................................................. 211
   Gary Meyer, Aparna Bole, and Eva L. Feldman
13 The Kidney and the Insulin-Like Growth Factor System
   in Health and Disease ........................................................... 227
   Ralph Rabkin, Steven S. Guest, and Franz Schaefer

V  IGF IN DISEASE STATES
14 The IGF and IGFBP System in Insulin Resistance
   and Diabetes Mellitus ............................................................ 251
   Kerstin Brismar and Moira S. Lewitt
15 Insulin-Like Growth Factors in Relation to Gastrointestinal
   Diseases and Parenteral Nutrition ......................................... 271
   Denise M. Ney
16 Impact of Critical Illness on the Growth Hormone/Insulin
   Growth Factor System in Relation to Other Endocrine
   Responses .................................................................................. 291
   Greta Van den Berghe
17 Mechanisms of Cardiac Hypertrophy and the Development
   of Heart Failure: Role of Insulin-Like Growth Factor-I
   and Angiotensin-II ................................................................. 311
   Patrice Delafontaine, Marijke Brink, and Yao-Hua Song
18 Roles of the Insulin-Like Growth Factor System
   and Nutrition in Cancer ......................................................... 331
   Claire M. Perks and Jeffrey M. P. Holly

Appendix A ................................................................. 343
Appendix B ................................................................. 345
Index ............................................................................... 353
IGF and Nutrition in Health and Disease
Houston, M.S.; Holly, J.M.P.; Feldman, E.L. (Eds.)
2004, XXI, 359 p., Hardcover
A product of Humana Press
