CONTENTS

Preface ........................................................................................................................... v
Contributors ................................................................................................................... ix

1 Targeting of the EGFR As a Modulator of Cancer Chemotherapy ........................................ 1
Jose Baselga

2 Cyclin-Dependent Kinase Inhibitors in Combination Chemotherapy ........................................ 27
Manish A. Shah and Gary K. Schwartz

3 Development of Protein Kinase C and Cyclin-Dependent Kinase Inhibitors As Potentiators of Cytotoxic Drug Action in Leukemia ................................................................. 61
Steven Grant

4 Carboxyamidotriazole, an Inhibitor of Nonvoltage-Operated Calcium Entry: Single-Agent and Combination Therapy for Ovarian Carcinoma .......................................................... 89
Chad M. Michener and Elise C. Kohn

5 Targeted α-Particle Therapy: A Rational Approach to Drug Development in Hematologic Diseases and Solid Tumors .......................................................... 107
John M. Burke, David A. Scheinberg, and Joseph G. Jurcic

6 Pharmacological Modulation of Fluoropyrimidines: Building on the Lessons of the Past ............ 133
Owen A. O’Connor

7 Development of Inhibitors of HER2 With Taxanes: New Directions in Breast Cancer Therapy ................................................................. 175
Shanu Modi, Monica N. Fornier, and Andrew D. Seidman

8 Targeting NF-κB to Increase the Activity of Cisplatin in Solid Tumors ........................................ 197
Don S. Dizon, Carol Aghajanian, X. Jun Yan, and David R. Spriggs

9 Combinations of Chemotherapy and G3139, an Antisense Bcl-2 Oligonucleotide ......................... 209
Luba Benimetskaya, Sridhar Mani, and C. A. Stein
Contents

10 Use of Animal Models to Evaluate Signal Transduction Inhibitors As Modulators of Cytotoxic Therapy ............................. 231
   Beverly A. Teicher

Index .............................................................................................................. 277
Combination Cancer Therapy
Modulators and Potentiators
Schwartz, G.K. (Ed.)
2005, X, 284 p., Hardcover
