<tbody>
<tr>
<td>1</td>
<td>Isothermal Titration Calorimetry</td>
<td>Edwin A. Lewis and Kenneth P. Murphy</td>
</tr>
<tr>
<td>2</td>
<td>Direct Optical Detection of Protein–Ligand Interactions</td>
<td>Frank Gesellchen, Bastian Zimmermann, Friedrich W. Herberg</td>
</tr>
<tr>
<td>3</td>
<td>Label-Free Detection of Protein–Ligand Interactions by the Quartz Crystal Microbalance</td>
<td>Andreas Janshoff and Claudia Steinem</td>
</tr>
<tr>
<td>4</td>
<td>Measurement of Solvent Accessibility at Protein–Protein Interfaces</td>
<td>Jeffrey G. Mandell, Abel Baerga-Ortiz, Arnold M. Falick, Elizabeth A. Komives</td>
</tr>
<tr>
<td>5</td>
<td>Hydrophobic Interaction Chromatography: Harnessing Multivalent Protein–Surface Interactions for Purification Procedures</td>
<td>Herbert P. Jennissen</td>
</tr>
<tr>
<td>6</td>
<td>Sedimentation Velocity Method in the Analytical Ultracentrifuge for the Study of Protein–Protein Interactions</td>
<td>Claus Urbanke, Gregor Witte, Ute Curth</td>
</tr>
<tr>
<td>7</td>
<td>Protein–Ligand Interaction Probed by Time-Resolved Crystallography</td>
<td>Marius Schmidt, Hyotcherl Ihee, Reinhard Pahl, Vukica Šrajer</td>
</tr>
<tr>
<td>8</td>
<td>X-Ray Crystallography of Protein–Ligand Interactions</td>
<td>Ilme Schlichting</td>
</tr>
<tr>
<td>9</td>
<td>Combined Use of XAFS and Crystallography for Studying Protein–Ligand Interactions in Metalloproteins</td>
<td>Richard W. Strange and S. Samar Hasnain</td>
</tr>
<tr>
<td>10</td>
<td>NMR Studies of Protein–Ligand Interactions</td>
<td>Till Maurer</td>
</tr>
<tr>
<td>11</td>
<td>Probing Heme Protein–Ligand Interactions by UV/Visible Absorption Spectroscopy</td>
<td>Karin Nienhaus and G. Ulrich Nienhaus</td>
</tr>

vii
12 Ultrafast Time-Resolved IR Studies of Protein–Ligand Interactions
Manho Lim and Philip A. Anfinrud ................................................... 243
13 Monitoring Protein–Ligand Interactions by Time-Resolved FTIR
Difference Spectroscopy
Carsten Kötting and Klaus Gerwert ............................................... 261
14 Proteins in Motion: Resonance Raman Spectroscopy as a Probe
of Functional Intermediates
Uri Samuni and Joel M. Friedman ................................................ 287
15 Fluorescence Polarization/Anisotropy Approaches to Study
Protein–Ligand Interactions: Effects of Errors and Uncertainties
David M. Jameson and Gabor Mocz ........................................... 301
16 Ligand Binding With Stopped-Flow Rapid Mixing
Mark S. Hargrove ......................................................................... 323
17 Circular Dichroism Spectroscopy for the Study of Protein–Ligand
Interactions
Alison Rodger, Rachel Marrington, David Roper,
and Stuart Windsor .................................................................. 343
18 High-Throughput Screening of Interactions Between G Protein-
Coupled Receptors and Ligands Using Confocal Optics Microscopy
Lenka Zemanová, Andreas Schenk, Martin J. Valler,
G. Ulrich Nienhaus, and Ralf Heilker ...................................... 365
19 Single-Molecule Study of Protein–Protein and Protein–DNA
Interaction Dynamics
H. Peter Lu .................................................................................. 385
20 Application of Fluorescence Correlation Spectroscopy
to Hapten–Antibody Binding
Theodore L. Hazlett, Qiaoqiao Ruan, and Sergey Y. Tetin ............ 415
21 Atomic Force Microscopy Measurements of Protein–Ligand
Interactions on Living Cells
Robert H. Eibl and Vincent T. Moy ............................................. 439
22 Computer Simulation of Protein–Ligand Interactions:
Challenges and Applications
Sergio A. Hassan, Luis Gracia, Geetha Vasudevan,
and Peter J. Steinbach ............................................................... 451
23 Force Probe Molecular Dynamics Simulations
Helmut Grubmüller ...................................................................... 493
24 Study of Ligand–Protein Interactions by Means of Density
Functional Theory and First-Principles Molecular Dynamics
Carme Rovira ............................................................................... 517
Index ......................................................................................... 555
Protein-Ligand Interactions
Methods and Applications
Nienhaus, G.U. (Ed.)
2005, XI, 568 p., Hardcover
A product of Humana Press
