# Contents

Preface .....	v
Contributors .....	xi
1 Biopharmaceutical Proteins: <i>Opportunities and Challenges</i> <b>John R. Birch and Yemi Onakunle</b> .....	1
2 Expression of Antibody Fragments by Periplasmic Secretion in <i>Escherichia coli</i> <b>Andrew G. Popplewell, Mukesh Sehdev, Mariangela Spitali, and A. Neil C. Weir</b> .....	17
3 Secretory Production of Therapeutic Proteins in <i>Escherichia coli</i> <b>Sang Yup Lee, Jong Hyun Choi, and Sang Jun Lee</b> .....	31
4 Expression of Recombinant LTB Protein in <i>Marine Vibrio</i> VSP60 <b>Wang Yili and Si Lusheng</b> .....	43
5 Heterologous Gene Expression in Yeast <b>Lee J. Byrne, Kenneth J. O'Callaghan, and Mick F. Tuite</b> .....	51
6 Pharmaceutical Proteins from Methylotrophic Yeasts <b>Eric C. de Bruin, Erwin H. Duitman, Arjo L. de Boer, Marten Veenhuis, Ineke G. A. Bos, and C. Erik Hack</b> .....	65
7 Expression of Human Papillomavirus Type 16 L1 in Baculovirus Expression Systems: <i>A Case Study</i> <b>Zheng Jin, Si Lusheng, and Wang Yili</b> .....	77
8 Large-Scale Transient Expression of Therapeutic Proteins in Mammalian Cells <b>Sabine Geisse, Martin Jordan, and Florian M. Wurm</b> .....	87
9 Site-Specific Integration for High-Level Protein Production in Mammalian Cells <b>Bhaskar Thyagarajan and Michele P. Calos</b> .....	99
10 Production of Recombinant Therapeutic Proteins by Mammalian Cells in Suspension Culture <b>Lily Chu, Ilse Blumentals, and Gargi Maheshwari</b> .....	107
11 Transgene Control Engineering in Mammalian Cells <b>Beat P. Kramer and Martin Fussenegger</b> .....	123
12 Fusion to Albumin as a Means to Slow the Clearance of Small Therapeutic Proteins Using the <i>Pichia pastoris</i> Expression System: <i>A Case Study</i> <b>William P. Sheffield, Teresa R. McCurdy, and Varsha Bhakta</b> .....	145

13	High Throughput Recovery of Therapeutic Proteins from the Inclusion Bodies of <i>Escherichia coli</i> : An Overview <b>Amulya K. Panda</b> .....	155
14	Isolation, Solubilization, Refolding, and Chromatographic Purification of Recombinant Human Growth Hormone from Inclusion Bodies of <i>Escherichia coli</i> cells: A Case Study <b>Surinder M. Singh, A. N. S. Eshwari, Lalit C. Garg, and Amulya K. Panda</b> .....	163
15	Large-Scale Preparation of Factor VIIa from Human Plasma: A Case Study <b>Teruhisa Nakashima and Kazuhiko Tomokiyo</b> .....	177
16	Purification of Clinical-Grade Monoclonal Antibodies by Chromatographic Methods <b>Alberto L. Horenstein, Ilaria Durelli, and Fabio Malavasi</b> .....	191
17	Virus Elimination and Validation <b>Nicola Boschetti and Anna Johnston</b> .....	209
18	Virus Removal by Nanofiltration <b>Marina Korneyeva and Scott Rosenthal</b> .....	221
19	Determining Residual Host Cell Antigen Levels in Purified Recombinant Proteins by Slot Blot and Scanning Laser Densitometry <b>Aaron P. Miles, Daming Zhu, and Allan Saul</b> .....	233
20	Principles of Biopharmaceutical Protein Formulation: An Overview <b>Scott P. Sellers and Yuh-Fun Maa</b> .....	243
21	Solid-State Protein Formulation: <i>Methodologies, Stability, and Excipient Effects</i> <b>Yuh-Fun Maa and Scott P. Sellers</b> .....	265
22	Stabilization of Therapeutic Proteins by Chemical and Physical Methods <b>Ken-ichi Izutsu</b> .....	287
23	Extraction and Characterization of Vaccine Antigens from Water-In-Oil Adjuvant Formulations <b>Aaron P. Miles and Allan Saul</b> .....	293
24	Probing Reversible Self-Association of Therapeutic Proteins by Sedimentation Velocity in the Analytical Ultracentrifuge <b>Bernardo Perez-Ramirez and John J. Steckert</b> .....	301
25	Biological Characterization of Pegylated Interferons: A Case Study <b>Lei Xie, Constance Cullen, Sheri Bradshaw, Marc DeLorenzo, and Michael J. Grace</b> .....	319

26	Characterization of Interferon $\alpha$ 2B Pegylated Via Carboxyalkylation: A Case Study <b>David C. Wylie, Marcio Voloch, Seju Lee, Yan-Hui Liu, Collette Cutler, Brittany Larkin, and Susan Cannon-Carlson</b> .....	337
27	Quantifying Recombinant Proteins and Their Degradation Products Using SDS-PAGE and Scanning Laser Densitometry <b>Aaron P. Miles and Allan Saul</b> .....	349
28	Extraction and Denaturing Gel Electrophoretic Methodology for the Analysis of Yeast Proteins <b>Kenneth J. O'Callaghan, Lee J. Byrne, and Mick F. Tuite</b> .....	357
29	Characterization of Therapeutic Proteins by Membrane and In-Gel Tryptic Digestion <b>C. Mark Smales, Rosalyn J. Marchant, and Michèle F. Underhill</b> ....	375
30	Oligosaccharide Release and MALDI-TOF MS Analysis of N-Linked Carbohydrate Structures from Glycoproteins <b>Rodney G. Keck, John B. Briggs, and Andrew J. S. Jones</b> .....	381
31	Capillary Electrophoresis of Carbohydrates Derivatized with Fluorophoric Compounds <b>Stacey Ma, Wendy Lau, Rodney G. Keck, John B. Briggs, Andrew J. S. Jones, Kathy Moorhouse, and Wassim Nashabeh</b> .....	397
32	High-Throughput LC/MS Methodology for $\alpha$ (1 $\rightarrow$ 3)Gal Determination of Recombinant Monoclonal Antibodies: A Case Study <b>Lihua Huang and Charles E. Mitchell</b> .....	411
33	Carbohydrate Structural Characterization of Fas Ligand Inhibitory Protein <b>Lihua Huang, Charles E. Mitchell, Lei Yu, P. Clayton Gough, and Alice Riggin</b> .....	421
34	Top-Down Characterization of Protein Pharmaceuticals by Liquid Chromatography/Mass Spectrometry: <i>Application to Recombinant Factor IX Comparability—A Case Study</i> <b>Jason C. Rouse, Joseph E. McClellan, Himakshi K. Patel, Michael A. Jankowski, and Thomas J. Porter</b> .....	435
35	Sample Preparation Procedures for High-Resolution Nuclear Magnetic Resonance Studies of Aqueous and Stabilized Solutions of Therapeutic Peptides <b>Mark J. Howard</b> .....	461
	Index .....	471
