Contents

Preface ......................................................................................................................... v
Contributors .............................................................................................................. xv

1 Expression of Exogenous mRNA in *Xenopus laevis* Embryos for the Study of
Cell Cycle Regulation ............................................................................................... 1
   Jill C. Sible and Brian N. Wroble

2 Use of Luciferase Chimaera to Monitor PLCζ Expression in Mouse Eggs ........ 17
   Karl Swann, Karen Campbell, Yuansong Yu, Christopher Saunders
   and F. Anthony Lai

3 Analysis of 14-3-3 Family Member Function in *Xenopus* Embryos by
Microinjection of Antisense Morpholino Oligos .................................................. 31
   Jeffrey M. C. Lau and Anthony J. Muslin

4 A Microinjectable Biological System, the *Xenopus* Oocyte, as an Approach to
Understanding Signal Transduction Protein Function ............................................ 43
   Katia Cailliau and Edith Browaeys-Poly

5 Combining Microinjection and Immunoblotting to Analyze MAP Kinase
Phosphorylation in Single Starfish Oocytes and Eggs .......................................... 57
   David J. Carroll and Wei Hua

6 Analysis of Signaling Pathways in Zebrafish Development by Microinjection .... 67
   William H. Kinsey

7 Protein Inhibition by Microinjection and RNA-Mediated Interference in Tissue
Culture Cells: Complementary Approaches to Study Protein Function ................. 77
   Jane R. Stout, Rania S. Rizk, and Claire E. Walczak

8 DNA Delivery by Microinjection for the Generation of Recombinant Mammalian
Cell Lines .................................................................................................................... 99
   Sebastien Chenuet, Madiba Derouazi, David Hacker and Florian Wurm

9 Bacteriophage φC31 Integrase Mediated Transgenesis in *Xenopus laevis*
for Protein Expression at Endogenous Levels ......................................................... 113
   Bryan G. Allen and Daniel L. Weeks

10 Germline Transformation of *Caenorhabditis elegans* by Injection .................... 123
    Pavan Kadandale, Indrani Chatterjee and Andrew Singson

11 Quantitative Microinjection of Mouse Oocytes and Eggs ................................. 135
    Douglas Kline

12 Microinjection of Follicle-Enclosed Mouse Oocytes ......................................... 157
    Laurinda A. Jaffe, Rachael P. Norris, Marina Freudzon,
    William J. Ratzan, and Lisa M. Mehlmann

13 Functional Studies of Regulatory Genes in the Sea Urchin Embryo ................... 175
    Vincenzo Cavalieri, Maria Di Bernardo, and Giovanni Spinelli
14 Exploring the Cytoskeleton During Intracytoplasmic Sperm Injection in Humans ................................................................. 189
Vanesa Y. Rawe and Héctor Chemes

15 Somatic Cell Nuclear Transfer in the Mouse ................................. 207
Satosbi Kishigami and Terubiko Wakayama

Index ........................................................................................................ 219
Microinjection
Methods and Applications
Carroll, D.J. (Ed.)
2009, XVI, 214 p., Hardcover
ISBN: 978-1-58829-884-3
