Preface .......................................................................................................................... ix
Color Plates .................................................................................................................... xxi

I INNOVATION AND EXPERIENCE

1 Frontiers of Cancer Research: The Metastasis Challenge ............................................... 3
   Simone John, Christina H. Stuelten, and John E. Niederhuber

2 Vascular Endothelial Growth Factor: Basic Biology and Clinical Applications ............ 11
   Napoleone Ferrara

3 Proliferation and Cancer Metastasis from the Clinical Point of View ........................... 23
   Blake Cady

4 Gastrointestinal Cancer and the Lymphatic System: Patterns of Micrometastasis and Lymphatic Mapping with Clinical Outcome ....................................................... 29
   Takashi Aikou, Yuko Kitagawa, Yoshikazu Uenosono, Shoji Natsugoe, Antonio J. Bilchik, and Naoto T. Ueno

5 Redefined Lymphatic Anatomy of the Breast with Clinical Implications .................... 45
   Hiroo Suami, Wei-Ren Pan, and G. Ian Taylor

6 Should Axillary Lymph Node Dissection be Done for Breast Cancer? ......................... 57
   Douglas Reintgen, Blake Cady, and Stanley P.L. Leong

II TUMOR MICROENVIRONMENT AND PROLIFERATION

7 Overview of Tumor Cells and the Microenvironment .................................................... 69
   Richard E.B. Seftor, Elisabeth A. Seftor, Lynne-Marie Postovit, and Mary J.C. Hendrix

III LYMPHANGIOGENESIS AND ANGIOGENESIS

8 Heme/Lymphvasculogenesis, Hem/Lymphangiogenesis, Hem/Lymphangiotumorigenesis, and Tumor Hem/Lymphangiogenesis: Need for a Terminology Adjustment ........................................ 77
   Marlys H. Witte, Michael Dellinger, Michael J. Bernas, and Charles L. Witte

9 Tumor Lymphangiogenesis: What We Know and Don’t Know .................................... 93
   Antje Neeb and Jonathan P. Sleeman

IV DIAGNOSTIC IMAGING OF CANCER

10 Molecular Imaging of Cancer: Receptors, Angiogenesis, and Gene Expression .......... 107
   Heiko Schöder

VII MOLECULAR TARGETED THERAPY AGAINST GROWTH FACTOR RECEPTORS, SIGNALING PATHWAYS AND ANGIOGENESIS AS THERAPEUTIC TARGETS

25 Molecular Targeting of Lymphangiogenesis and Tumor Metastasis ............................................ 283
   Caroline A. Heckman, Tanja Holopainen, and Kari Alitalo

26 Combined Targeting of EGFR and Angiogenesis in Aerodigestive Carcinomas .................. 297
   Michalis V. Karamouzis and Athanassios Argiris

27 Targeting Signaling Pathways in Cancer Therapy ................................................................. 309
   David Berz, Elise McCormack, Anthony Mega, and Harold J. Wanebo

VIII IMPACT OF NODAL STATUS AND TUMOR BURDEN IN SENTINEL NODES ON THE CLINICAL OUTCOME

28 Micrometastasis of Melanoma to Sentinel Lymph Nodes ......................................................... 329
   Stanley P.L. Leong

29 Sentinel Lymph Node Micrometastases in Breast Cancer: Prognostic Relevance and Therapeutic Implications ................................................................. 339
   Igor Langer, Ulrich Guller, Carsten Thomas Viehl, and Markus Zuber

30 Micrometastasis of Genitourinary Cancer to Sentinel Lymph Nodes ....................................... 347
   Ramon Cabanas

31 Sentinel Lymph Node Mapping in Colorectal Cancer ............................................................... 361
   Sukamal Saha, Saad Sirop, Mehul Soni, Douglas Iddings, David Wiese, Anton J. Bilchik, Thomas Beutler, Maher Ghanem, Kiet A. Doan, Carsten Thomas Viehl, and Markus Zuber

32 Application of Cancer Biology in Cancer Staging and Predicting Clinical Outcome .... 381
   Frederick L. Greene

IX IMMUNE RESPONSES IN THE DRAINING LYMPH NODES AGAINST CANCER: IMPLICATION FOR IMMUNOTHERAPY

33 Role of Lymph Nodes in Immunotherapy of Malignant Tumors ............................................. 391
   Walter T. Lee and Suyu Shu

34 Tumor-Related Immune Modulation of the Regional Lymph Nodes ....................................... 401
   Rong-Rong Huang, Eijun Itakura, Duan-Ren Wen, and Alistair J. Cochran

35 Reversal of Immune Suppression in Sentinel Lymph Nodes .................................................... 407
   Richard Essner

36 Vaccine-Primed Lymph Node Cells in the Adoptive Immunotherapy of Cancer: Presence of Host Immune Suppression Induced by Established Cancer .................. 425
   Shuang Wei, Andrew B. Shreiner, and Alfred E. Chang

X THE ROLE OF STEM CELLS IN CANCER METASTASIS

37 Cancer Stem Cells in Metastatic Melanoma .............................................................................. 435
   Jim B. Boonyaratanakornkit, Janelleen E. Smith, and Ruby Ghadially

38 Implications of Cancer Stem Cells for Tumor Metastasis ....................................................... 443
   Maziyar A. Kalani, Piero Dalerba, and Michael F. Clarke

39 Prostate Cancer Stem Cells and Their Involvement in Metastasis .......................................... 455
   Hangwen Li and Dean G. Tang
XI GENOMIC SIGNATURES OF CANCER: BASIS FOR SELECTIVE ADJUVANT THERAPY

Frederick L. Baehner

41 Molecular Signatures in Melanoma Progression .......................................................... 497
Suraj S. Venna and Mohammed Kashani-Sabet

XII PROMISING NEW TREATMENTS FOR SOLID TUMORS

42 Targeted Therapy for Breast Cancer: A Focus on HER2/neu and Antiangiogenic Therapy ................................................................................................................................. 513
Hope S. Rugo and Amy Ying-Ju Lin

43 Advances in the Treatment of Colorectal Cancer: Targeting Receptors of Disease ...... 523
Wen Wee Ma, Antonio Jimeno, and Michael A. Choti

44 Developments in the Management of Genitourinary Malignancies: Prostate Cancer and Renal Cell Carcinoma ................................................................. 533
Charles J. Ryan

45 Advances in the Treatment of Lung Cancer ................................................................. 545
Juliana Karrim and Sarita Dubey

XIII RECENT ADVANCES IN THE TREATMENT OF MELANOMA

46 Pegylated Interferons in the Adjuvant Treatment of Melanoma .................................. 555
Dirk Schadendorf

47 Sorafenib, a Multikinase Inhibitor: Results from Clinical Trials in Melanoma Patients ................................................................................................................................. 565
Axel Hauschild, Katharina C. Kähler, and Friederike Egberts

48 Targeting Immunological Synapse: New Horizons in Immunotherapy for Cancer ...... 575
Bartosz Chmielowski and Antoni Ribas

49 Cutaneous Metastases of Melanoma: New Treatment Options ................................. 591
Claus Garbe, Benjamin Weide, Annette Pflugfelder, and Thomas Eigentler

50 Neoadjuvant Approaches in Melanoma ..................................................................... 599
Ahmad A. Tarhini and John M. Kirkwood

51 Implications of Chemo/Biochemotherapy in the Treatment of Metastatic Melanoma ...................................................................................................................... 607
Sanjiv S. Agarwala

XIV FUTURE PERSPECTIVES

52 Future Perspectives for Cancer Metastasis: Unanswered Questions and Unquestioned Answers ............................................................................................................ 613
Stanley P.L. Leong and Marlys H. Witte

Index .................................................................................................................................. 617
From Local Invasion to Metastatic Cancer Involvement of Distant Sites Through the Lymphovascular System
Leong, S.P.L. (Ed.)
2009, XXVIII, 666 p., Hardcover
ISBN: 978-1-60327-086-1
A product of Humana Press
