# Contents

*Preface* ................................................................. *v*

*Contributors* ................................................................ *ix*

1 New Insights into GPCR Function: Implications for HTS ................. 1
   *Richard M. Eglen and Terry Reisine*

2 Screening Technologies for G Protein-Coupled Receptors:
   From HTS to uHTS .................................................. 15
   *Maite de los Frailes and Emilio Diaz*

3 GPCR Signaling: Understanding the Pathway to Successful
   Drug Discovery ....................................................... 39
   *Christine Williams and Stephen J. Hill*

4 An Overview on GPCRs and Drug Discovery: Structure-Based
   Drug Design and Structural Biology on GPCRs .................. 51
   *Kenneth Lundstrom*

5 Understanding the Ligand–Receptor–G Protein Ternary Complex
   for GPCR Drug Discovery .......................................... 67
   *Venkata R.P. Ratnala and Brian Kobilka*

6 Assay Data Quality Assessment ......................................... 79
   *Hanspeter Gubler*

7 Homology Modeling of GPCRs ......................................... 97
   *John Simms, Nathan E. Hall, Polo H.C. Lam, Laurence J. Miller,
   Arthur Christopoulos, Ruben Abagyan, and Patrick M. Sexton*

8 GPCR Expression Using Baculovirus-Infected Sf9 Cells ............. 115
   *Amanda L. Aloia, Richard V. Glatz, Edward J. McMurchie,
   and Wayne R. Leifert*

9 Radioligand Binding Assays: Application of [125I]Angiotensin II
   Receptor Binding .................................................... 131
   *Wayne R. Leifert, Olgatina Bucco, Mahinda Y. Abeywardena,
   and Glen S. Patten*

10 [35S]GTPγS Binding in G Protein-Coupled Receptor Assays ......... 143
    *Tamara Cooper, Edward J. McMurchie, and Wayne R. Leifert*

11 A Time-Resolved Fluorescent Lanthanide (Eu)-GTP Binding
   Assay for Chemokine Receptors as Targets in Drug Discovery .......... 153
    *Jean Labrecque, Rebecca S.Y. Wong, and Simon P. Fricker*

12 Use of the DiscoveRx HitHunter cAMPII Assay for Direct
   Measurement of cAMP in Gs and Gi GPCRs ...................... 171
    *Joe Bradley and David McLoughlin*

13 Use of Aequorin for G protein-Coupled Receptor Hit Identification
   and Compound Profiling ............................................ 181
    *Stephen J. Brough and Parita Shah*
