## Contents

**Series Preface** ............................................................... v
**Preface** ............................................................................. vii
**Contributors** ................................................................. xi

1. The Open Field Test ....................................................... 1
   *Todd D. Gould, David T. Dao, and Colleen E. Kovacsics*

2. Analysis of Grooming Behavior and Its Utility in Studying Animal Stress,
   Anxiety, and Depression .................................................. 21
   *Amanda N. Smolinsky, Carisa L. Bergner, Justin L. LaPorte,
   and Allan V. Kalueff*

3. Digging in Mice: Marble Burying, Burrowing, and Direct Observation Reveal
   Changes in Mouse Behavior ............................................. 37
   *Robert M.J. Deacon*

4. Circadian and Light Modulation of Behavior .......................... 47
   *Cara M. Altimus, Tara A. LeGates, and Samer Hattar*

5. Ultrasonic Vocalizations by Infant Mice: An Ethological Expression
   of Separation Anxiety .................................................... 67
   *James T. Winslow*

6. The Forced Swimming Test in Mice: A Suitable Model to Study
   Antidepressants ............................................................. 85
   *Martine Hascoët and Michel Bourin*

7. The Tail-Suspension Test: A Model for Characterizing Antidepressant Activity
   in Mice ............................................................................. 119
   *Olivia F. O'Leary and John F. Cryan*

8. Stress-Induced Hyperthermia in the Mouse ............................ 139
   *Christiaan H. Vinkers, Ruud van Oorschot, Berend Olivier,
   and Lucianne Groenink*

9. Factors of Reproducibility of Anhedonia Induction in a Chronic Stress
   Depression Model in Mice ................................................ 153
   *Tatyana Strekalova and Harry Steinbusch*

10. Learned Helplessness in Mice ............................................. 177
    *Hymie Anisman and Zul Merali*

11. The Mouse Light–Dark Box Test ......................................... 197
    *Martine Hascoët and Michel Bourin*

12. Using the Elevated Plus Maze as a Bioassay to Assess the Effects
    of Naturally Occurring and Exogenously Administered Compounds
    to Influence Anxiety-Related Behaviors of Mice .................... 225
    *Alicia A. Walf and Cheryl A. Frye*

13. Novelty-Induced Hypophagia ............................................. 247
    *Stephanie C. Dulawa*
    Alessandro Bartolomucci, Eberhard Fuchs, Jaap M. Koolhaas, and Frauke Ohl
15. Reduction of Submissive Behavior Model for Antidepressant Drug Testing
    in Mice .................................................. 277
    Ewa Malatynska, Albert Pinhasov, and Richard J. Knapp
16. Mice Models for the Manic Pole of Bipolar Disorder ....................... 297
    Shlomit Flaisher-Grinberg and Haim Einat
Index ...................................................... 327
Mood and Anxiety Related Phenotypes in Mice
Characterization Using Behavioral Tests
