Contents

Preface ......................................................................................................................... v
Contributors ............................................................................................................... xi

1. Isolation of Adult Mouse Stem Keratinocytes Using Magnetic Cell Sorting (MACS) ................................................................. 1
   Corina Lorz, Carmen Segrelles, Marina Garín, and Jesús M. Paramio

   Nicolas O. Fortunel, Pierre Vaigot, Emmanuelle Cadio, and Michèle T. Martin

3. Growth and Stratification of Epithelial Cells in Minimal Culture Conditions ....... 25
   Federica Riva, Andrea Casasco, Marco Casasco, Alberto Calligaro, and Antonia Icaro Cornaglia

4. Matched Cultures of Keratinocytes and Fibroblasts Derived from Normal and NER-Deficient Mouse Models ........................ 45
   Alex Pines and Claude Backendorf

5. Establishment of Spontaneously Immortalized Keratinocyte Lines from Wild-Type and Mutant Mice ........................... 59
   Julia Reichelt and Ingo Haase

6. Study of Epidermal Differentiation in Human Keratinocytes Cultured in Autocrine Conditions ........................................... 71
   Frédéric Minner, Françoise Herphelin, and Yves Poumay

7. Directed Differentiation of Human Embryonic Stem Cells to Epidermal Progenitors ......................................................... 83
   Christian M. Metallo, Lin Ji, Juan J. de Pablo, and Sean P. Palecek

8. Expression and Analysis of Exogenous Proteins in Epidermal Cells .................. 93
   Lina Dagnino, Ernest Ho, and Wing Y. Chang

9. Using siRNA Knockdown in HaCaT Cells to Study Transcriptional Control of Epidermal Proliferation Potential ....................... 107
   Julie Wells and Xing Dai

10. RNA Interference in Keratinocytes and an Organotypic Model of Human Epidermis ................................................................. 127
    Cory L. Simpson, Shin-ichiro Kojima, and Spiro Getsios

11. Scanning for Transcription Factor Binding by a Variant EMSA ........................ 147
    Igor Gurevich, Carmen Zhang, and Brian J. Aneskievich

12. Chromatin Immunoprecipitation for Identifying Transcription Factor Targets in Keratinocytes ........................................... 159
    Kori Ortt and Satrajit Sinha

13. Gene Expression Profiling of Mouse Epidermal Keratinocytes .................... 171
    Ramón García-Escudero and Jesús M. Paramio
14. Analysis of Tissue-Specific Gene Expression Using Laser Capture Microdissection

15. Comprehensive Transcriptional Profiling of Human Epidermis, Reconstituted Epidermal Equivalents, and Cultured Keratinocytes Using DNA Microarray Chips

17. Detection of Gene Expression in Embryonic Tissues and Stratified Epidermis by In Situ Hybridization

18. Embryonic Mammary Anlagen Analysis Using Immunolabelling of Whole Mounts

19. Whole-Mount Assays for Gene Induction and Barrier Formation in the Developing Epidermis

20. Tetracycline-Regulated Gene Expression in Transgenic Mouse Epidermis

21. A Versatile Murine 3D Organotypic Model to Evaluate Aspects of Wound Healing and Epidermal Organization

22. Optical and Biochemical Dissection of Connexin and Disease-Linked Connexin Mutants in 3D Organotypic Epidermis

23. Cytokine Release in Tissue-Engineered Epidermal Equivalents After Prolonged Mechanical Loading

24. Three-Dimensional Human Tissue Models of Wounded Skin

25. In Vivo Transplantation of Genetically Modified Mouse Embryonic Epidermis

26. A Transplant Model for Human Epidermal Skin Regeneration

27. Identification of Epithelial Stem Cells In Vivo and In Vitro Using Keratin 19 and BrdU
28. Isolation and Culture of Hair Follicle Pluripotent Stem (hfPS) Cells and Their Use for Nerve and Spinal Cord Regeneration. 401
   Yasuyuki Amoh and Robert M. Hoffman

29. Limiting Dilution Analysis of Murine Epidermal Stem Cells Using an In Vivo Regeneration Assay 421
   Lauren R. Strachan and Ruby Ghadially

Subject Index 433
Epidermal Cells
Methods and Protocols
Turksen, K. (Ed.)
2010, XVI, 446 p. 85 illus., 29 illus. in color., Hardcover
ISBN: 978-1-60761-379-4
