## Contents

**Preface** ........................................... v

**Contributors** ...................................... ix

1. Surface Plasmon Resonance: A General Introduction ....................... 1  
   *Nico J. de Mol and Marcel J. E. Fischer*

2. The Role of Mass Transport Limitation and Surface Heterogeneity in the Biophysical Characterization of Macromolecular Binding Processes by SPR Biosensing ................................. 15  
   *Peter Schuck and Huaying Zhao*

3. Amine Coupling Through EDC/NHS: A Practical Approach ................. 55  
   *Marcel J.E. Fischer*

4. High-Affinity Immobilization of Proteins Using Biotin- and GST-Based Coupling Strategies ................................................................. 75  
   *Stephanie Q. Hutsell, Randall J. Kimple, David P. Siderovski, Francis S. Willard, and Adam J. Kimple*

5. A Capture Coupling Method for the Covalent Immobilization of Hexahistidine Tagged Proteins for Surface Plasmon Resonance ............... 91  
   *Adam J. Kimple, Robin E. Muller, David P. Siderovski, and Francis S. Willard*

6. Affinity Constants for Small Molecules from SPR Competition Experiments . 101  
   *Nico J. de Mol*

7. Surface Plasmon Resonance Signal Enhancement for Immunoassay of Small Molecules ................................................................. 113  
   *John S. Mitchell and Yinqiu Wu*

8. High-Throughput Kinase Assay Based on Surface Plasmon Resonance ...... 131  
   *Hiroyuki Takeda, Naoki Goshima, and Nobuo Nomura*

9. SPR Biosensor as a Tool for Screening Prion Protein Binders as Potential Antiprion Leads ................................................................. 147  
   *Beining Chen*

10. Carbohydrate–Lectin Interactions Assayed by SPR .......................... 157  
    *Eric Duverger, Nathalie Lamerant-Fayel, Natacha Frison, and Michel Monsigny*

11. DNA Sensors Based on Mixed Self-Assembled DNA/Alkanethiol Films .... 179  
    *Sara Peeters and Tim Stakenborg*
12. Preparation of Lipid Membrane Surfaces for Molecular Interaction Studies by Surface Plasmon Resonance Biosensors .................................................. 191
   Mojca Podlesnik Beseničar and Gregor Anderluh

13. Capture of Intact Liposomes on Biacore Sensor Chips for Protein–Membrane Interaction Studies .......................................................... 201
   Vesna Hodnik and Gregor Anderluh

14. Surface Plasmon Resonance Spectroscopy for Studying the Membrane Binding of Antimicrobial Peptides ........................................... 213
   Kristopher Hall and Marie-Isabel Aguilar

15. Surface Plasmon Resonance Spectroscopy in Determination of the Interactions Between Amyloid β Proteins (Aβ) and Lipid Membranes .... 225
   Xu Hou, David H. Small, and Marie-Isabel Aguilar

16. Incorporation of a Transmembrane Protein into a Supported 3D-Matrix of Liposomes for SPR Studies ..................................................... 237
   Annette Granéli

17. Application of Surface Plasmon Resonance Spectroscopy to Study G-Protein Coupled Receptor Signalling ........................................... 249
   Konstantin E. Komolov and Karl-Wilhelm Koch

18. Integration of SPR Biosensors with Mass Spectrometry (SPR-MS) .......... 261
   Dobrin Nedelkov

19. SPR/MS: Recovery from Sensorchips for Protein Identification by MALDI-TOF Mass Spectrometry .................................................. 269
   Jonas Borch and Peter Roepstorff

Subject Index .................................................................................................. 283
Surface Plasmon Resonance
Methods and Protocols
de Mol, N.J.; Fischer, M.J.E. (Eds.)
2010, X, 286 p., Hardcover
ISBN: 978-1-60761-669-6
