# Contents

*Preface* ................................................................. v  
*Contributors* .......................................................... ix  

1 Human Embryonic Stem Cell Derivation, Maintenance, and Differentiation to Trophoblast ................................. 1  
   *Ge Lin, Kristen Martins-Taylor, and Ren-He Xu*  
2 Isolation and Maintenance of Mouse Epiblast Stem Cells ........................................... 25  
   *Josh G. Chenoweth and Paul J. Tesar*  
3 Functional Assays for Hematopoietic Stem Cell Self-Renewal ........................................... 45  
   *John M. Perry and Linheng Li*  
4 Isolation Procedure and Characterization of Multipotent Adult Progenitor Cells from Rat Bone Marrow ........................................... 55  
   *Kartik Subramanian, Martine Geraerts, Karen A. Pauwelyn, Tonsil Park, D. Jason Owens, Manja Muijijens, Fernando Ulloa-Montoja, Teubua Jiang, Catherine M. Verfaillie, and Wei-Shou Hu*  
5 Generation of Functional Insulin-Producing Cells from Human Embryonic Stem Cells In Vitro ........................................... 79  
   *Yan Shi*  
6 Mesoderm Cell Development from ES Cells ........................................... 87  
   *Takumi Era*  
7 Directed Differentiation of Red Blood Cells from Human Embryonic Stem Cells ........................................... 105  
   *Shi-Jiang Lu, Qiang Feng, Jennifer S. Park, and Robert Lanza*  
8 Directed Differentiation of Neural-stem cells and Subtype-Specific Neurons from hESCs ........................................... 123  
   *Bao-Yang Hu and Su-Chun Zhang*  
9 Directing Human Embryonic Stem Cells to a Retinal Fate ........................................... 139  
   *Thomas A. Reh, Deepak Lamba, and Juliane Gust*  
10 Bovine Somatic Cell Nuclear Transfer ........................................... 155  
   *Pablo J. Ross and Jose B. Cibelli*  
11 Cell Fusion-Induced Reprogramming ........................................... 179  
   *Jeong Tae Do and Hans R. Schöler*  
12 An Improved Method for Generating and Identifying Human Induced Pluripotent Stem Cells ........................................... 191  
   *Prashant Mali, Zhaohui Ye, Bin-Kuan Chou, Jonathan Yen, and Linzhao Cheng*  
13 Using Small Molecules to Improve Generation of Induced Pluripotent Stem Cells from Somatic Cells ........................................... 207  
   *Caroline Desponts and Sheng Ding*
14 Reprogramming of Committed Lymphoid Cells by Enforced Transcription Factor Expression .................................................. 219
   Huafeng Xie, Catherine V. Laiosa, and Thomas Graf

15 Reprogramming of B Cells ................................................. 233
   César Cobaleda

16 Adult Cell Fate Reprogramming: Converting Liver to Pancreas. .............. 251
   Irit Meivar-Levy and Sarah Ferber

17 In Vitro Reprogramming of Pancreatic Cells to Hepatocytes .................. 285
   Daniel Eberhard, Kathy O’Neill, Zoé D. Burke, and David Tosh

18 Generation of Novel Rat and Human Pluripotent Stem Cells by Reprogramming and Chemical Approaches ........................... 293
   Wenlin Li and Sheng Ding

19 Small Molecule Screen in Zebrafish and HSC Expansion ...................... 301
   Eirini Trompouki and Leonard I. Zon

20 Zebrafish Small Molecule Screen in Reprogramming/Cell Fate Modulation .......................................................... 317
   Jing-Ruey J. Yeh and Kathleen M. Munson

Index: ................................................................................... 329
Cellular Programming and Reprogramming
Methods and Protocols
Ding, S. (Ed.)
2010, XI, 334 p., Hardcover
ISBN: 978-1-60761-690-0
