Contents

Preface .......................................................... v
Contributors .................................................... ix

1. Introduction .................................................. 1
   Thomas J. Dougherty

2. Death and Survival Signals in Photodynamic Therapy ............... 7
   Michael Dewaele, Tom Verfaillie, Wim Martinet, and Patrizia Agostinis

3. Photodynamic Therapy and Cell Death Pathways .................. 35
   David Kessel and Nancy L. Oleinick

4. Identification of MAP Kinase Pathways Involved in COX-2 Expression Following Photofrin Photodynamic Therapy .................. 47
   Marian Luna, Angela Ferrario, Sam Wong, and Charles J. Gomer

5. Metronomic PDT and Cell Death Pathways ........................ 65
   Gurmit Singh, Omar Alqawi, and Myrna Espiritu

6. How to Monitor NF-κB Activation After Photodynamic Therapy ........ 79
   Isabelle Coupienne, Jacques Piette, and Sébastien Bontems

7. Application of 5-Aminolevulinic Acid and Its Derivatives for Photodynamic Therapy In Vitro and In Vivo .................. 97
   Asta Juzeniene, Petras Juzenas, and Johan Moan

8. Hypoxia and Perfusion Labeling During Photodynamic Therapy .......... 107
   Theresa M. Busch

9. Targeting the Tumor Microenvironment Using Photodynamic Therapy Combined with Inhibitors of Cyclooxygenase-2 or Vascular Endothelial Growth Factor ........................................ 121
   Angela Ferrario and Charles J. Gomer

    Kristian Berg, Anette Weyergang, Lina Prasmickaite, Anette Bonsted, Anders Høgset, Marie-Therese R. Strand, Ernst Wagner, and Pål K. Sello

11. Photodynamic Therapy-Generated Cancer Vaccines .................. 147
    Mladen Korbelik

12. Antimicrobial Photodynamic Inactivation and Photodynamic Therapy for Infections ........................................................................ 155
    Liyi Huang, Tianhong Dai, and Michael R. Hamblin

13. Photodynamic Therapy of Bacterial and Fungal Biofilm Infections ........ 175
    Merrill A. Biel
14. Calculation of Cellular Oxygen Concentration for Photodynamic Therapy In Vitro .................................................. 195
   Michael S. Patterson and Emma Mazurek

15. Fluorescent Molecular Imaging and Dosimetry Tools in Photodynamic Therapy ................................................... 207
   Brian W. Pogue, Kimberley S. Samkoe, Summer L. Gibbs-Strauss, and Scott C. Davis

16. Bifunctional Agents for Imaging and Therapy .................................................. 223
   Ravindra K. Pandey, Nadine S. James, Yihui Chen, Joseph Missert, and Munawar Sajjad

17. Photodynamic Diagnosis and Therapy and the Brain .................................................. 261
   Herwig Kostron

18. Photodynamic Therapy of Head and Neck Cancers .................................................. 281
   Merrill A. Biel

Subject Index .......................................................... 295
Photodynamic Therapy
Methods and Protocols
Gomer, C.J. (Ed.)
2010, XI, 296 p., Hardcover
A product of Humana Press
