Contents

Preface ................................................................. vii
Contributors ......................................................... xi

1 From Bedside to Bench: How Clinical Reality Should Instruct Stroke Modeling .............................................. 1
   Pauline Patak and Dirk M. Hermann

2 How to Avoid Bumping into the Translational Roadblock .................................................. 7
   Malcolm Macleod

3 Modeling Focal Cerebral Ischemia in Rodents: Introduction and Overview ........................................ 17
   Vincent Prinz and Matthias Endres

4 Focal Cerebral Ischemia in the Mouse and Rat Using the Intraluminal Suture–Filament Model ......................... 29
   Ludmila Belayev, Matthias Endres, and Vincent Prinz

5 Focal Ischemia Models: Middle Cerebral Artery Occlusion Induced by Electrocoagulation, Occluding Devices, and Endothelin-1 .................................................. 41
   I. Mhairi Macrae

6 Rodent Models of Thromboembolic Stroke .................................................. 55
   Cyrille Orset, Benoit Haelewyn, Kilian Vivien, Denis Vivien, and Alan R. Young

7 Photochemical and Endothelin Models of Focal Brain Ischemia .............................................. 71
   Otto W. Witte

8 Housing in an Enriched Environment: A Tool to Study Functional Recovery After Experimental Stroke 85
   Karsten Ruscher and Tadeusz Wieloch

9 Modeling Risk Factors and Confounding Effects in Stroke .............................................. 93
   Barry McColl, David Howells, Nancy Rothwell, and Adam Denes

10 Effect of Anesthesia in Stroke Models .............................................. 121
   Richard J. Traystman

11 Noninvasive Brain Imaging in Small Animal Stroke Models: MRI and PET ........................................ 139
   Anna M. Planas

12 Non-invasive Optical Imaging in Small Animal Models of Stroke .................................................. 167
   Andreas Wunder and Jan Klohs

13 Behavioral Testing in Mouse Models of Stroke .............................................. 179
   Mustafa Balkaya and Matthias Endres

14 Behavioral Testing in Rodent Models of Stroke .............................................. 199
   Gerlinde A.S. Metz

15 Histology and Infarct Volume Determination .............................................. 213
   Clemens Sommer
