*Foreword* ................................................................. v
*Preface* ........................................................................ vii
*Contributors* ................................................................. xi

**PART I** URACIL INSERTION/DELETION RNA EDITING IN MITOCHONDRION OF *Trypanosoma brucei*

1 Three-Dimensional Reconstruction of *Trypanosoma brucei* Editosomes Using Single-Particle Electron Microscopy ...................... 3
   *H. Ulrich Göringer, Holger Stark, Cordula Böhm, Bjoern Sander, and Monika M. Golas*

2 iCODA: RNAi-Based Inducible Knock-In System in *Trypanosoma brucei* .............................................. 23
   *Gene-Errol Ringpis, Richard H. Lathrop, and Ruslan Aphasizhev*

**PART II** ADENOSINE TO INOSINE RNA EDITING

3 Perturbing A-to-I RNA Editing Using Genetics and Homologous Recombination ......................................................... 41
   *Cynthia J. Staber, Selena Gell, James E.C. Jepson, and Robert A. Reenan*

4 Laser Microdissection and Pressure Catapulting of Single Human Motor Neurons for RNA Editing Analysis ......................... 75
   *Hui Sun, Aruna Raja, Mary A. O'Connell, Valerie Mann, Brendon Noble, and Liam P. Keegan*

5 Biochemical Identification of A-to-I RNA Editing Sites by the Inosine Chemical Erasing (ICE) Method ........................................ 89
   *Masayuki Sakurai and Tsutomu Suzuki*

**PART III** CYTIDINE TO URACIL RNA AND DNA EDITING

6 Identifying mRNA Editing Deaminase Targets by RNA-Seq ................................................................. 103
   *Brad R. Rosenberg, Scott Dewell, and F. Nina Papavasiliou*

7 Mouse and Other Rodent Models of C to U RNA Editing ................................................................. 121
   *Valerie Blanc and Nicholas O. Davidson*

8 *In Vivo* Analysis of RNA Editing in Plastids ........................................................................ 137
   *Stephanie Ruf and Ralph Bock*

9 Identifying Specific Trans-Factors of RNA Editing in Plant Mitochondria by Multiplex Single Base Extension Typing ......................... 151
   *Mizuki Takenaka*
10 Complementation of Mutants in Plant Mitochondrial RNA Editing by Protoplast Transfection ........................................ 163
Mizuki Takenaka and Anja Zehrmann

11 A High-Throughput Assay for DNA Deaminases ....................... 171
Meng Wang, Cristina Rada, and Michael S. Neuberger

12 Biochemical Fractionation and Purification of High-Molecular-Mass APOBEC3G Complexes .................. 185
Ya-Lin Chiu

PART IV trnA EdItIng anD rna MoDiFICaTionS

13 Analysis of tRNA Editing in Native and Synthetic Substrates................. 209
Jessica L. Spears, Kirk W. Gaston, and Juan D. Alfonzo

14 Post-transcriptional Modification of RNAs by Artificial Box H/ACA and Box C/D RNPs ........................................ 227
Chao Huang, John Karijolich, and Yi-Tao Yu

15 Functional Analysis of Noncoding RNAs in Trypanosomes: RNA Walk, a Novel Approach to Study RNA–RNA Interactions Between Small RNA and Its Target .................................... 245
Chaim Wachtel and Shulamit Michaeli

16 A Post-Labeling Approach for the Characterization and Quantification of RNA Modifications Based on Site-Directed Cleavage by DNAzymes ........................................ 259
Madeleine Meusburger, Martin Hengesbach, and Mark Helm

Index ....................................................... 271
