## Contents

*Preface* ................................................................. *v*

*Contributors* ......................................................... *ix*

1 Introduction ..................................................... 1  
*Lynda J. Campbell*

2 Evolution of Cytogenetic Methods in the Study of Cancer .................. 3  
*Lynda J. Campbell*

3 Fluorescence In Situ Hybridization Methods and Troubleshooting  
Applied to Fixed Cell Suspensions .................................... 13  
*John Swansbury, Toon Min, and Shilani Aruliah*

4 Chronic Myeloid Leukemia: Cytogenetic Methods  
and Applications for Diagnosis and Treatment ........................ 33  
*Christine M. Morris*

5 Cytogenetic Analysis in Acute Myeloid Leukaemia  .................... 63  
*Lynda J. Campbell and Joanne S. White*

6 Cytogenetics in Myelodysplastic Syndromes  .......................... 79  
*Kazuma Ohyashiki, Atsushi Kodama, and Junko H. Ohyashiki*

7 Cytogenetics of Myeloproliferative Neoplasms  ........................ 89  
*Lynda J. Campbell*

8 Acute Lymphoblastic Leukaemia ...................................... 99  
*Claire Schwab and Christine J. Harrison*

9 Cytogenetic Methods in Chronic Lymphocytic Leukemia .................. 119  
*Claudia Haferlach and Ulrike Bacher*

10 Genetic Abnormalities in Non-Hodgkin’s Lymphoma as Revealed  
by Conventional and Molecular Cytogenetics Methods of Analyses............ 131  
*Suresh C. Jhanwar and Ryan C. Denley*

11 Metaphase Cytogenetic Techniques in Multiple Myeloma ............... 149  
*Jeffrey R. Sawyer*

12 Detection of Chromosome Abnormalities Using Cytoplasmic  
Immunoglobulin Staining and FISH in Myeloma  ....................... 159  
*Bruce R. Mercer and Kathleen C. Raye"oux*

13 Cytogenetics of Solid Tumours ..................................... 173  
*Robyn Lukeis and Mary Suter*

14 Fluorescence In Situ Hybridization on Formalin-Fixed,  
Paraffin-Embedded Tissue Sections ................................... 189  
*Adrian Zordan*

15 The Use of M-FISH and M-BAND to Define Chromosome Abnormalities .... 203  
*Ruth N. MacKinnon and Ilse Chudoba*
16 Utility of Array Comparative Genomic Hybridization in Cytogenetic Analysis ............................................. 219
   Rashmi R. Singh, K-John J. Cheung, and Douglas E. Horsman

17 Single Nucleotide Polymorphism Microarray Analysis of Genetic Alterations in Cancer ...................................... 235
   Charles G. Mullighan

18 Cytogenetic Analysis and Reporting ................................... 259
   Lynda J. Campbell

Index ........................................................................... 269
Cancer Cytogenetics
Methods and Protocols
Campbell, L.J. (Ed.)
2011, X, 273 p., Hardcover
ISBN: 978-1-61779-073-7
