**Contents**

_Preface._ .............................................................. v  
_Contributors._ .......................................................... ix

**PART I  INTRODUCTION**

1  Mass Spectrometry-Based Chemoproteomic Approaches.  ............... 3  
   *Marcus Bantscheff*

2  Chemical Proteomics in Drug Discovery  .................................... 15  
   *Gerard Drewes*

**PART II  SMALL MOLECULES AND PROBE DESIGN**

3  Compound Immobilization and Drug-Affinity Chromatography. ............... 25  
   *Uwe Rix, Manuela Gridling, and Giulio Superti-Furga*

4  Affinity-Based Chemoproteomics with Small Molecule-Peptide Conjugates. 39  
   *Chaitanya Saxena*

5  A Chemical Proteomic Probe for Detecting Dehydrogenases:  
   *Catechol Rhodanine_ ................................................ 55  
   *Xia Ge and Daniel S. Sem*

6  Probing Proteomes with Benzophenone Photoprobes. .......................... 65  
   *Akira Kawamura and Doina M. Mihai*

7  Biotinylated Probes for the Analysis of Protein Modification  
   by Electrophiles . .................................................................. 77  
   *Simona G. Codreanu, Hye-Young H. Kim, Ned A. Porter,  
   and Daniel C. Liebler*

8  Profiling of Methyltransferases and Other S-Adenosyl-1-Homocysteine- 
   Binding Proteins by Capture Compound Mass Spectrometry ............... 97  
   *Thomas Lenz, Peter Poot, Elmar Weinhold, and Mathias Dreger*

**PART III  TARGET DISCOVERY AND TARGET VALIDATION**

9  Identifying Cellular Targets of Small-Molecule Probes and Drugs  
   with Biochemical Enrichment and SILAC.  .................................... 129  
   *Shao-En Ong, Xiaoyu Li, Monica Schenone, Stuart L. Schreiber,  
   and Steven A. Carr*

10 Determination of Kinase Inhibitor Potencies in Cell Extracts  
    by Competition Binding Assays and Isobaric Mass Tags .................. 141  
    *Carsten Hopf, Dirk Eberhard, Markus Boesche, Sonja Bastuck,  
    Birgit Dümpelfeld, and Marcus Bantscheff*

11 Affinity-Based Profiling of Dehydrogenase Subproteomes .................... 157  
    *Xia Ge and Daniel S. Sem*
Contents

12 Probing the Specificity of Protein–Protein Interactions by Quantitative Chemical Proteomics ................................... 167
   Duangnapa Kovanich, Thin Thin Aye, Albert J.R. Heck, and Arjen Scholten

13 Fluorescence-Based Proteasome Activity Profiling ........................................... 183
   Annemieke de Jong, Karianne G. Schuurman, Boris Rodenko, Huib Ovaa, and Celia R. Berkers

14 Chemical Cross-Linking and High-Resolution Mass Spectrometry to Study Protein–Drug Interactions .................................... 205
   Mathias Q. Müller and Andrea Sinz

15 Monitoring Ligand Modulation of Protein–Protein Interactions by Chemical Cross-Linking and High-Mass MALDI Mass Spectrometry ................... 219
   Natalia Gasilova and Alexis Nazabal

16 Time-Controlled Transeardiac Perfusion Crosslinking for In Vivo Interactome Studies ....................................... 231
   Amy Hye Won Jeon and Gerold Schmitt-Ulms

PART IV LIGAND DISCOVERY

17 Ligand Discovery Using Small-Molecule Microarrays ....................... 249
   Dominick E. Casalena, Dina Wassaf, and Angela N. Koehler

18 Working with Small Molecules: Preparing and Storing Stock Solutions and Determination of Kinetic Solubility .................................. 265
   Andrea Wolf, Satoko Shimamura, and Friedrich B.M. Reinhard

19 A Database for Chemical Proteomics: ChEBI ............................. 273
   Paula de Matos, Nico Adams, Janna Hastings, Pablo Moreno, and Christoph Steinbeck

20 Working with Small Molecules: Rules-of-Thumb of “Drug Likeness” ......... 297
   Ming-Qiang Zhang

Index ............................................................... 309
Chemical Proteomics
Methods and Protocols
Drewes, G.; Bantscheff, M. (Eds.)
2012, XI, 313 p. 63 illus., 2 illus. in color., Hardcover
