Contents

Preface ................................................................. v
Contributors ......................................................... xi

PART I  EARLY EPIGENETIC EVENTS IN CANCER

1  Epigenetic Markers of Early Tumor Development ................. 3
   Ramona G. Dumitrescu

2  Epigenetics of Solid Cancer Stem Cells ............................. 15
   Alok Mishra and Mukesh Verma

PART II  CANcer SPECIFIC TYPE EPIGENETIC CHANGES

3  DNA Methylation and Histone Modifications in Breast Cancer .... 35
   Ramona G. Dumitrescu

4  DNA Methylation Changes in Prostate Cancer ..................... 47
   Wolfgang Goering, Michael Kloth, and Wolfgang A. Schulz

5  DNA Methylation in Promoter Region as Biomarkers
   in Prostate Cancer .............................................. 67
   Mihi Yang and Jong Y. Park

6  Epigenetics of Bladder Cancer ...................................... 111
   Wun-Jae Kim and Yong-June Kim

7  Epigenetics in Myeloid Malignancies ................................ 119
   Stefan Deneberg

8  The Epigenetics of Brain Tumors .................................... 139
   Adrian M. Dubuc, Stephen Mack, Alexander Unterberger,
   Paul A. Northcott, and Michael D. Taylor

9  DNA Methylation Changes in Cervical Cancers ..................... 155
   Qiang Lu, Dehua Ma, and Shuping Zhao

10 Epigenetics of Colon Cancer ......................................... 177
    Sharad Khare and Mukesh Verma

11 Promoter Methylation in Head and Neck Tumorigenesis .......... 187
    Josena K. Stephen, Kang Mei Chen, Shaleta Havard,
    Glynis Harris, and Maria J. Worsham

12 Epigenome and DNA Methylation in Oral
    Squamous Cell Carcinoma ....................................... 207
    Mario Pérez-Sayáns García and Abel García-Garcia
PART III METHODS AND TECHNOLOGIES USED FOR EPIGENETIC CHANGES’ DETECTION

16 DNA Methylation in Pancreatic Cancer: Protocols for the Isolation of DNA and Bisulfite Modification 273
Kati Biewusch, Marie Heyne, Robert Grützmann, and Christian Pilarsky

17 Detection and Analysis of DNA Methylation by Pyrosequencing 281
Hilary A.A. Colyer, Richard N. Armstrong, Daniel J. Sharpe, and Ken I. Mills

18 Screening for miRNA Expression Changes Using Quantitative PCR (Q-PCR) 293
Richard N. Armstrong, Hilary A.A. Colyer, and Ken I. Mills

19 Genome-Wide Methylation Analysis 303
Alexander Unterberger, Adrian M. Dubuc, and Michael D. Taylor

20 Microarray for Epigenetic Changes: Gene Expression Arrays 319
Hilary A.A. Colyer, Richard N. Armstrong, and Ken I. Mills

21 Detecting DNA Methylation Using the Methylated CpG Island Amplification and Microarray Technique 329
Hilary A.A. Colyer, Margaret Dellett, and Ken I. Mills

PART IV FACTORS THAT INFLUENCE THE EPIGENETIC CHANGES IN CANCER

22 Nutrigenomics: Implications for Breast and Colon Cancer Prevention 343
Gabriela Riscuta and Ramona G. Dumitrescu

23 Dietary and Lifestyle Factors of DNA Methylation 359
Unhee Lim and Min-Ae Song

24 Diet, Epigenetics, and Cancer 377
L. Joseph Su

25 Role of Epigenetics in Cancer Health Disparities 395
Sulma I. Mohammed, Sanya Springfield, and Rina Das

26 Multifactorial Etiology of Gastric Cancer 411
Jovanny Zabaleta
PART V  EPGENETIC EPIDEMIOLOGY

27  Epigenetic Epidemiology for Cancer Risk: Harnessing Germline Epigenetic Variation
    
    Kevin Brennan and James M. Flanagan

28  Epigenetic Biomarkers in Cancer Epidemiology

Mukesh Verma
