Contents

Preface................................................................. vii
Contributors....................................................... xi

1 Optimising Yeast as a Host for Recombinant Protein Production (Review) ........................................................................................................... 1
  Nicklas Bonander and Roslyn M. Bill

2 Which Yeast Species Shall I Choose? Saccharomyces cerevisiae Versus Pichia pastoris (Review) ....................................................................... 11
  Richard A.J. Darby, Stephanie P. Cartwright, Marvin V. Dilworth, and Roslyn M. Bill

3 Preparation of Pichia pastoris Expression Plasmids ......................................................... 25
  Christel Logez, Fatima Alkhalfiou, Bernadette Byrne, and Renaud Wagner

4 Preparation of Saccharomyces cerevisiae Expression Plasmids ........................................... 41
  David Drew and Hyun Kim

5 Codon Optimisation for Heterologous Gene Expression in Yeast .......................................... 47
  Kristina Hedfalk

6 Yeast Transformation to Generate High-Yielding Clones ....................................................... 57
  Mohammed Jamshad and Richard A.J. Darby

7 Screening for High-Yielding Pichia pastoris Clones: The Production of G Protein-Coupled Receptors as a Case Study ......................................................... 65
  Shweta Singh, Adrien Gras, Cedric Fiez-Vandal, Magdalena Martinez, Renaud Wagner, and Bernadette Byrne

8 Screening for High-Yielding Saccharomyces cerevisiae Clones: Using a Green Fluorescent Protein Fusion Strategy in the Production of Membrane Proteins ......................................................... 75
  David Drew and Hyun Kim

9 The Effect of Antifoam Addition on Protein Production Yields ........................................... 87
  Sarah J. Routledge and Roslyn M. Bill

10 Setting Up a Bioreactor for Recombinant Protein Production in Yeast ............................. 99
  Sarah J. Routledge and Michelle Clare

11 The Implementation of a Design of Experiments Strategy to Increase Recombinant Protein Yields in Yeast (Review) ........................................... 115
  Nagamani Bora, Zharain Bawa, Roslyn M. Bill, and Martin D.B. Wilks

12 Online Analysis and Process Control in Recombinant Protein Production (Review) ........ 129
  Shane M. Palmer and Edmund R.S. Kunji
13 Monitoring the Biomass Accumulation of Recombinant Yeast Cultures: 
Offline Estimations of Dry Cell Mass and Cell Counts .......................... 157
Shane M. Palmer and Edmund R.S. Kunji

14 Online Monitoring of Biomass Accumulation in Recombinant 
Yeast Cultures .................................................. 165
Shane M. Palmer and Edmund R.S. Kunji

15 Optimising Pichia pastoris Induction ............................................. 181
Zharain Bawa and Richard A.J. Darby

16 Optimising Saccharomyces cerevisiae Induction Regimes .................... 191
David Drew and Hyun Kim

17 Large-Scale Production of Membrane Proteins in Pichia pastoris: 
The Production of G Protein-Coupled Receptors as a Case Study ............. 197
Shweta Singh, Adrien Gras, Cedric Fiez-Vandal, 
Magdalena Martinez, Renaud Wagner, and Bernadette Byrne

18 Large-Scale Production of Membrane Proteins in Saccharomyces cerevisiae: Using a Green Fluorescent Protein Fusion Strategy in the Production of Membrane Proteins .................................................. 209
David Drew and Hyun Kim

19 Large-Scale Production of Secreted Proteins in Pichia pastoris ............ 217
Nagamani Bora

20 Disruption of Yeast Cells to Isolate Recombinant Proteins ................ 237
Mohammed Jamshad and Richard A.J. Darby

Index ................................................................. 247
Recombinant Protein Production in Yeast
Methods and Protocols
Bill, R.M. (Ed.)
2012, XII, 248 p. 47 illus., 6 illus. in color., Hardcover
ISBN: 978-1-61779-769-9
A product of Humana Press
