Contents

Preface ................................................................. v
Contributors ................................................................... ix

PART I SAMPLE PREPARATION AND IDENTIFICATION

1 Flow Cytometry in Environmental Microbiology: A Rapid Approach for the Isolation of Single Cells for Advanced Molecular Biology Analysis ......... 3
   Belinda C. Ferrari, Tristram J. Winsley, Peter L. Bergquist, and Josie Van Dorst

2 Pressure Cycling Technology in Systems Biology ............................ 27
   Bradford S. Powell, Alexander V. Lazarev, Greta Carlson, Alexander R. Ivanov, and David A. Rozak

3 Targeted Isolation of Proteins from Natural Microbial Communities Living in an Extreme Environment .................................................... 63
   Steven W. Singer

4 Bacterial Identification and Subtyping Using DNA Microarray and DNA Sequencing ................................................................. 73
   Sufian F. Al-Khaldi, Magdi M. Mossoba, Marc M. Allard, E. Kurt Lienau, and Eric D. Brown

PART II EXPERIMENTAL GENOMIC ANALYSES

5 Genetic Manipulation of the Obligate Chemolithoautotrophic Bacterium Thiobacillus denitrificans ......................................................... 99
   Harry R. Beller, Tina C. Legler, and Staci R. Kane

6 Genome-Wide Mapping of the Binding Sites of Proteins That Interact with DNA ................................................. 137
   Stephen Spiro

PART III PROTEIN AND LIPID ANALYSES

7 Microbial Proteomics Using Mass Spectrometry ................................. 159
   Harry B. Hines

8 Fourier Transform Infrared Spectroscopy for Molecular Analysis of Microbial Cells ................................................................. 187
   Jesús J. Ojeda and Maria Dittrich

PART IV METABOLIC ANALYSIS

9 Mass Spectrometry-Based Microbial Metabolomics ............................. 215
   Edward E.K. Baidoo, Peter I. Benke, and Jay D. Keasling
10 Fast Sampling of the Cellular Metabolome
   Walter M. Van Gulik, Andre B. Canelas, Hilal Taymaz-Nikerel,
   Rutger D. Douma, Lodewijk P. de Jonge, and Joseph J. Heijnen

PART V  ANALYSES OF CELLULAR METABOLISM

11 Metabolic Pathway Determination and Flux Analysis
   in Nonmodel Microorganisms Through $^{13}$C-Isotope Labeling
   Xueyang Feng, Wei-Qin Zhuang, Peter Colletti, and Yinjie J. Tang

12 Biolog Phenotype Microarrays
   April Shea, Mark Wolcott, Simon Daefler, and David A. Rozak

13 NanoSIP: NanoSIMS Applications for Microbial Biology
       Jennifer Pett-Ridge and Peter K. Weber

PART VI  KINETIC MODELING OF CELLULAR PROCESSES

14 Electrophysiological-Metabolic Modeling of Microbes:
   Applications in Fuel Cells and Environment Analysis
   Max Fontus and Peter Ortoleva

15 Simulating Microbial Systems: Addressing Model
   Uncertainty/Incompleteness via Multiscale and Entropy Methods
   A. Singharoy, H. Joshi, S. Cheluvaraja, Y. Miao, D. Brown, and P. Ortoleva

PART VII  GENOME-SCALE COMPUTATIONAL STUDIES

16 Bacterial Genome Annotation
   Nicholas Beckloff, Shawn Starkenburg, Tracey Freitas, and Patrick Chain

17 LeishCyc: A Guide to Building a Metabolic Pathway Database
   and Visualization of Metabolomic Data
   Eleanor C. Saunders, James I. MacRae, Thomas Naderer,
   Milica Ng, Malcolm J. McConville, and Vladimir A. Likic

18 Development of Constraint-Based System-Level Models
   of Microbial Metabolism
   Ali Navid

19 Complex Network Analysis in Microbial Systems:
   Theory and Examples
   Zahra Zavareh and Eivind Almaas

20 Modeling a Minimal Cell
   Michael L. Shuler, Patricia Foley, and Jordan Atlas

Index
Microbial Systems Biology
Methods and Protocols
Navid, A. (Ed.)
2012, XII, 615 p. 154 illus., 81 illus. in color., Hardcover
ISBN: 978-1-61779-826-9
