## Contents

**Preface** .......................... v

**Contributors** .................. ix

1. Historical Overview of Nanotechnology and Nanotoxicology .......... 1
   *Annette Santamaria*

2. Characterization of Nanomaterials for Toxicological Studies .......... 13
   *Kevin W. Powers, Paul L. Carpinone, and Kerry N. Siebein*

3. Methods for Understanding the Interaction Between Nanoparticles and Cells .................................................. 33
   *Pilar Rivera Gil, Martin J.D. Clift, Barbara Rothen Rutishauser, and Wolfgang J. Parak*

4. Single-Cell Gel Electrophoresis (Comet) Assay in Nano-genotoxicology .................................................. 57
   *Maricica Pacurari and Vincent Castranova*

5. Single-Cell Nanotoxicity Assays of Superparamagnetic Iron Oxide Nanoparticles .................................................. 69
   *Trisha Eustaquio and James F. Leary*

6. Western Blot Analysis .................................................. 87
   *Seishiro Hirano*

7. Application of Reverse Transcription-PCR and Real-Time PCR in Nanotoxicity Research .................................................. 99
   *Yiqun Mo, Rong Wan, and Qunwei Zhang*

8. Deriving TC\textsubscript{50} Values of Nanoparticles from Electrochemical Monitoring of Lactate Dehydrogenase Activity Indirectly .................................................. 113
   *Fuping Zhang, Na Wang, Fang Chang, and Shuping Bi*

9. Enzyme-Linked Immunosorbent Assay of IL-8 Production in Response to Silver Nanoparticles .................................................. 131
   *Eun-Jeong Yang, Jiyoung Jang, Dae-Hyoun Lim, and In-Hong Choi*

10. Metabolomics Techniques in Nanotoxicology Studies .......................... 141
    *Laura K. Schnackenberg, Jinchun Sun, and Richard D. Beger*

11. Nanoparticle Uptake Measured by Flow Cytometry .......................... 157
    *Yuko Ibuki and Tatsushi Toyooka*

12. Determining Biological Activity of Nanoparticles as Measured by Flow Cytometry .................................................. 167
    *Jennifer F. Nyland*

13. Whole Cell Impedance Biosensoring Devices .................................. 177
    *Evangelia Hondroulis and Chen-Zhong Li*
## Contents

14 Free Energy Calculation of Permeant–Membrane Interactions Using Molecular Dynamics Simulations. .................................................. 189  
*Paolo Elvati and Angela Violi*

15 Screening of Fullerene Toxicity by Hemolysis Assay. ...................... 203  
*Federica Tramer, Tatiana Da Ros, and Sabina Passamonti*

16 Assessment of In Vitro Skin Irritation Potential of Nanoparticles: RHE Model .......................................................... 219  
*P. Balakrishna Murthy, A. Sairam Kishore, and P. Surekha*

17 In Vivo Methods of Nanotoxicology ................................................. 235  
*Khaled Greish, Giridhar Thiagarajan, and Hamidreza Ghandehari*

18 The Luminescent Bacteria Test to Determine the Acute Toxicity of Nanoparticle Suspensions. .............................................. 255  
*Ana Garcia, Sonia Recillas, Antoni Sánchez, and Xavier Font*

19 The Primacy of Physicochemical Characterization of Nanomaterials for Reliable Toxicity Assessment: A Review of the Zebrafish Nanotoxicology Model ................................................................. 261  
*John P. Bohnsack, Shoeleh Assemi, Jan D. Miller, and Darin Y. Furgeson*

20 Application of Embryonic and Adult Zebrafish for Nanotoxicity Assessment ......................................................... 317  
*Jiangxin Wang, Xiaoshan Zhu, Yongsheng Chen, and Yung Chang*

21 Applications of Subsurface Microscopy ........................................ 331  
*Laurene Tetard, Ali Passian, Rubye H. Farahi, Brynn H. Voy, and Thomas Thundat*

22 Application of ICP-MS for the Study of Disposition and Toxicity of Metal-Based Nanomaterials ................................. 345  
*Mo-Hsiung Yang, Chia-Hua Lin, Louis W. Chang, and Pinpin Lin*

23 Quantitative Nanoparticle Organ Disposition by Gel Permeation Chromatography .................................................. 361  
*Abdul Khader Mohammad and Joshua Reineke*

24 Physiologically Based Pharmacokinetic Modeling for Nanoparticle Toxicity Study ................................................. 369  
*Mingguang Li and Joshua Reineke*

25 Biophysical Methods for Assessing Plant Responses to Nanoparticle Exposure .......................................................... 383  
*Tatsiana A. Ratnikova, Ran Chen, Priyanka Bhattacharya, and Pu Chun Ke*

26 In Vivo Nanotoxicity Assays in Plant Models ................................. 399  
*Mamta Kumari, Vinita Ernest, Amitava Mukherjee, and Natarajan Chandrasekaran*

Index .................................................. 411
Nanotoxicity
Methods and Protocols
Reineke, J. (Ed.)
2012, XII, 414 p. 85 illus., 47 illus. in color., Hardcover
