# Contents

## Part I  Localized Disease

1  **Etiology of Renal Cell Carcinoma: Incidence, Demographics, and Environmental Factors**  
Frédéric D. Birkhäuser, Nils Kroeger, and Allan J. Pantuck  

2  **Pathology of Renal Cell Carcinoma**  
Ming Zhou and Huiying He  

3  **Familial Renal Cell Carcinoma**  
Simon P. Kim and Bradley C. Leibovich  

4  **Imaging of Renal Cell Carcinoma**  
Andrei S. Purysko, Erick M. Remer, and Brian R. Herts  

5  **Prognostic Factors for Localized Renal Cell Carcinoma**  
Brian R. Lane  

## Part II  Management of Localized RCC

6  **Assessment of Oncologic Risk for Clinical Stage T1 Renal Tumors and the Emerging Role of Renal Mass Biopsy**  
Matthew N. Simmons and Steven C. Campbell  

7  **Radical Nephrectomy for Localized Renal Tumors: Oncological and Renal Functional Considerations**  
Paul Russo  

8  **Nephron-Sparing Surgery for Renal Cancer**  
Alon Z. Weizer, Jeffery S. Montgomery, and Khaled S. Hafez  

9  **Thermal Ablation**  
Surena F. Matin and Kamran Ahrar  

10  **Active Surveillance of the Small Renal Mass**  
Marc C. Smaldone, Daniel Canter, Alexander Kutikov, and Robert G. Uzzo
Part III  Locally Advanced Disease

11  Locally Advanced Renal Cell Carcinoma ................................. 197
    Stephen H. Culp and Christopher G. Wood

12  Neoadjuvant Targeted Therapy and Consolidative Surgery ......................................................... 219
    Sean P. Stroup and Ithaar H. Derweesh

Part IV  Advanced Disease

13  Biology of Renal Cell Carcinoma
    (Vascular Endothelial Growth Factor, Mammalian Target of Rapamycin, Immune Aspects)......................................................................... 231
    Alexandra Arreola and W. Kimryn Rathmell

14  Prognostic Factors in Advanced Renal Cell Carcinoma................................................................. 249
    Michael M. Vickers and Daniel Y.C. Heng

15  Integration of Surgery in Metastatic Renal Cancer ......................................................................... 257
    Tom Powles and Axel Bex

16  Immunotherapy for Renal Cell Carcinoma .......................................................... 279
    Diwakar Davar, Moon Fenton, and Leonard J. Appleman

17  Targeted Therapy: Vascular Endothelial Growth Factor ..................................................................................... 303
    Linda Cerbone and Cora N. Sternberg

18  Mammalian Target of Rapamycin in Renal Cell Carcinoma .................................................. 317
    Eric Jonasch and Michel Choueiri

19  Palliative and Supportive Care for Renal Cancer ............................................................................. 339
    Armida Parala-Metz and Mellar Davis

Index ..................................................................................................... 349
Renal Cell Carcinoma
Clinical Management
Campbell, S.C.; Rini, B.I. (Eds.)
2013, XI, 362 p. 91 illus., 46 illus. in color., Hardcover
