## Contents

Preface ................................................................. v
Contributors ............................................................ ix

### Part I  Introduction

1  Introduction to TRPs: A Quest for Novel Drug Targets ................................. 3
   Bernd Nilius

2  TRP-Mediated Cytoskeletal Reorganization: Implications for Disease and Drug Development ................................................................. 13
   Chandan Goswami

### Part II  TRP Channels, from A1 to V4

3  TRPA1 in Drug Discovery ........................................................................... 43
   Jun Chen, Steve McGaraughty, and Philip R. Kym

4  Canonical Transient Receptor Potential Channel Expression, Regulation, and Function in Vascular and Airway Diseases ........................................ 61
   Brij B. Singh, Christina M. Pabelick, and Y.S. Prakash

5  TRPM2 Function and Potential as a Drug Target .......................................... 89
   Barbara A. Miller

6  The Ca\(^{2+}\)-Activated Monovalent Cation-Selective Channels
   TRPM4 and TRPM5 ........................................................................... 103
   Barbara Colsoul, Miklos Kecskes, Koenraad Philippaert, Aurelie Menigoz, and Rudi Vennekens

7  The Emerging Role of TRPM7 in the Regulation of Magnesium Homeostasis ................................................................. 127
   Vladimir Chubanov, Jonathan T. Eggenschwiler, Lillia V. Ryazanova, Thomas Gudermann, and Alexey G. Ryazanov

8  TRPM8 Channels as Potential Therapeutic Targets for Pain, Analgesia, and Thermoregulation ................................................................. 141
   David D. McKemy

9  TRPML Channels in Function, Disease, and Prospective Therapies .................. 159
   David A. Zeevi

10 The TRPP Signaling Module: TRPP2/Polycystin-1 and TRPP2/PKD1L1 .......... 193
    Alexis Hofberr

11 TRPV1 as a Polymodal Sensor: Potential to Discover TRPV1 Antagonists
    Selective for Specific Activating Modalities ................................................ 221
    Olivier Radresa, Stephen Zicha, William Brown, and Jennifer M.A. Laird

12 Nociceptive and Nonnociceptive Roles of TRPV3 and Its “Druggability” .......... 237
    Sungjae Yoo and Sun Wook Hwang
