Contents

Preface ............................................................................................................................................. v
Contributors ..................................................................................................................................... xi

1 What Parameters to Consider and Which Software Tools to Use
for Target Selection and Molecular Design of Small Interfering RNAs .................. 1
   Olga Matveeva

2 Methods for Selecting Effective siRNA Target Sequences Using
a Variety of Statistical and Analytical Techniques ......................................................... 17
   Shigeru Takasaki

3 Designing Functional siRNA with Reduced Off-Target Effects ......................... 57
   Yuki Naito and Kumiko Ui-Tei

4 Design and Screening of siRNAs Against Highly
Structured RNA Targets ...................................................................................................... 69
   Neda Nasheri, John Paul Pezacki, and Selena M. Sagan

5 Engineering Small Interfering RNAs by Strategic
Chemical Modification ........................................................................................................ 87
   Jesper B. Bramsen and Jørgen Kjems

6 The Design, Selection, and Evaluation of Highly Specific
and Functional siRNA Incorporating Unlocked Nucleobase Analogs ..................... 111
   Narendra Vaish and Pinky Agarwal

7 The Design, Preparation, and Evaluation of Asymmetric Small
Interfering RNA for Specific Gene Silencing in Mammalian Cells ......................... 135
   Chanil Chang, Sun Woo Hong, Pooja Dua, Soyoun Kim, and Dong-ki Lee

8 Design of Nuclease-Resistant Fork-Like Small Interfering
RNA (fsiRNA) ........................................................................................................................ 153
   Elena L. Chernolovskaya and Marina A. Zenkova

9 Designing Dual-Targeting siRNA Duplexes Having Two Active
Strands that Combine siRNA and MicroRNA-Like Targeting ..................................... 169
   Pål Setrom

10 Strategies for Designing and Validating Immunostimulatory siRNAs ................ 179
    Michael P. Gantier

11 Designing Efficient and Specific Endoribonuclease-Prepared siRNAs ............. 193
    Vineeth Surendranath, Mirko Theis, Bianca H. Habermann, and Frank Buchholz

12 Short Hairpin RNA-Mediated Gene Silencing ................................................................. 205
    Luke S. Lambeth and Craig A. Smith
