Contents

Preface ........................................................................................................................................ v
Contributors ............................................................................................................................ ix

1 PPARs: History and Advances ............................................................................................... 1
   Jihan Youssef and Mostafa Z. Badr

2 PPAR-Alpha Cloning, Expression, and Characterization .................................................. 7
   Suong N.T. Ngo and Ross A. McKinnon

3 PPARGC1A and PPARG Genotyping: Beginner’s Guide to Genotyping with Unlabeled Probes ........................................................................................................... 35
   Viera Habalová and Jozef Židzik

4 Generation of an Inducible, Cardiomyocyte-Specific Transgenic Mouse Model with PPAR β/δ Overexpression ......................................................................................... 57
   Teayoun Kim, Olga Zhelyabovska, Jian Liu, and Qinglin Yang

5 Specific Knockdown of PPARδ Gene in Colon Cancer Cells by Lentivirus-Mediated RNA Interfering .................................................................................................................. 67
   Lie Yang, Zong-Guang Zhou, and Xiao-Feng Sun

6 Dominant-Negative and Knockdown Approaches to Studying PPAR Activity .................. 87
   Sudhir Singh and Robert G. Bennett

7 Producing PPARgamma2 Knockdown in Mouse Liver ....................................................... 99
   Tomomi Yamazaki and Osamu Ezaki

8 Adipose Tissue-Specific PPARγ Gene Targeting ............................................................... 117
   Weimin He

9 Site-Directed Mutagenesis to Study the Role of Specific Amino Acids in the Ligand Binding Domain of PPARs .......................................................... 137
   Nico Mitro, Federica Gilardi, Marco Giudici, Cristina Godio, Elena Scotti, and Maurizio Crestani

10 PPAR SUMOylation: Some Useful Experimental Tips ....................................................... 145
    Benoit Pourcet, Bart Staels, and Corine Glineur

11 Analyzing Phosphorylation-Dependent Regulation of Subcellular Localization and Transcriptional Activity of Transcriptional Coactivator NT-PGC-1α ............... 163
    Ji Suk Chang and Thomas W. Gettys

12 In Vivo Studies of PPAR-Chromatin Interactions: Chromatin Immunoprecipitation for Single-Locus and Genomewide Analyses .............................................. 175
    Till Adhikary and Rolf Müller
