About the Editors .................................................................................................... xv
Acknowledgments ................................................................................................... xix
Contributors ............................................................................................................ xxv

Part I Introduction

1 Introduction: The Economics of Omega-6/3 .................................................. 3
   Fabien De Meester

2 Attention to Prevention ................................................................................... 13
   Bill Lands

3 Effects of Omega-3 Fatty Acids on Genetic Expressions ............................... 27
   Ram Bahadur Singh, A. K. Singh, Shaan E. Alam,
   Fabien De Meester, Jan Fedacko, Suniti M. Dharwadkar,
   Lekh R. Juneja, and Douglas W. Wilson

Part II Omega-3 Status and Functions

4 Optimal Omega-3 Levels for Different Age Groups ...................................... 53
   Clemens von Schacky

5 Omega 3 Fatty Acid “Status” from the Neonate to the Elderly,
as Affected by Dietary, Lifestyle, and Physiological Factors ......................... 65
   Claudio Galli

6 DHA in the Second 6 Months of Life ............................................................. 79
   Eric L. Lien

7 DHA, EPA, and Ocular Health ....................................................................... 89
   Jeffrey Anshel

8 Impact of Long-Chain Polyunsaturated Fatty Acids on Cognitive
   and Mental Development ................................................................................ 103
   Jan Philipp Schuchardt and Andreas Hahn

xxi
