Contents

Preface .................................................. v
Contributors .......................................... xiii

1 Purification of Large Cytosolic Proteases for In Vitro Assays: 20S and 26S Proteasomes ................. 1
Stefan Tenzer, Tobias Hain, Hendrik Berger, and Hansjörg Schild

2 Analysis of Proteasome Generated Antigenic Peptides by Mass Spectrometry. .......................... 15
Kathrin Textoris-Taube, Christin Keller, Ulrike Kuckelkorn, and Peter-M. Kloetzel

3 Using Protease Inhibitors in Antigen Presentation Assays .................................................. 31
Michael Basler and Marcus Groettrup

4 Kinetic Studies of Cytoplasmic Antigen Processing and Production of MHC Class I Ligands .......... 41
Anita Stargardt and Eric Reits

5 Assaying Peptide Translocation by the Peptide Transporter TAP ............................................ 53
Marlieke L.M. Jongsma and Jacques Neefjes

6 In Vitro Reconstitution of the MHC Class I Peptide-Loading Complex ..................................... 67
Pamela A. Wearsch and Peter Cresswell

7 Studying MHC Class I Peptide Loading and Exchange In vitro ................................................. 81
Marlene Bouvier

8 Measuring Synthesis and Degradation of MHC Class I Molecules ............................................ 93
David B. Guiliano and Antony N. Antoniou

9 Studying Ubiquitination of MHC Class I Molecules ................................................................. 109
Marian L. Burr, Jessica M. Boname, and Paul J. Lehner

10 Evaluation of Viral Interference with MHC Class I-Restricted Antigen Processing and Presentation Using a Flow Cytometry-Based Approach ......................................................... 127
Daniëlle Horst, Maaike E. Ressing, Arend Mulder, and Emmanuel J.H.J. Wiertz

11 Determining the Activity of the Transporter Associated with Antigen Processing in the Compartments of the Secretory Pathway ............................................................... 137
Esther Ghanem and Sebastian Springer

12 Biochemical Large-Scale Identification of MHC Class I Ligands ............................................... 145
Daniel J. Kowalewski and Stefan Stevanović

13 Establishing MHC Class I Peptide Motifs ............................................................................. 159
Nico Trautwein and Stefan Stevanović

14 Quantitating MHC Class I Ligand Production and Presentation Using TCR-Like Antibodies .......... 169
Brian P. Dolan
15 Biochemical Analysis of Naturally Processed Antigenic Peptides
Presented by MHC Class I Molecules .................................................. 179
Takayuki Kanaseki and Nilabh Shastri

16 Identifying Source Proteins for MHC Class I-Presented Peptides ............. 187
Nathalie Vignon, Wenbin Ma, Alexandre Michaux, and Benoît J. Van den Eynde

17 Purification, Preparation, and Use of Chaperone–Peptide Complexes
for Tumor Immunotherapy ................................................................. 209
Ayesha Murshid, Jianlin Gong, and Stuart K. Calderwood

18 Recombinant Poxviruses: Versatile Tools for Immunological Assays .......... 219
Nicholas A. Siciliano, Lan Huang, and Laurence C. Eisenlohr

19 Bioinformatics Identification of Antigenic Peptide: Predicting
the Specificity of Major MHC Class I and II Pathway Players .................. 247
Ole Lund, Edita Karosiene, Claus Lundegaard, Mette Voldby Larsen, and Morten Nielsen

20 Evaluating CD8+ T Cell Responses In Vitro .................................... 261
François A. Lemonnier

21 Cloning CD8+ Cytolytic T Lymphocytes ........................................ 279
François A. Lemonnier

22 Production of CD4+ and CD8+ T Cell Hybridomas .............................. 297
David H. Canaday

23 Tracking Antigen-Specific CD8+ T Cells Using MHC Class I Multimers ...... 309
Cécile Alanio, Isabelle Bouvier, Hélène Jusforgues-Saklani, and Matthew L. Albert

24 The Purification of Large Numbers of Antigen Presenting Dendritic
Cells from Mouse Spleen ................................................................. 327
David Vremec and Elodie Segura

25 Preparation of Dendritic Cells by In Vitro Cultures ............................ 351
Mirjana Weimershaus and Peter van Endert

26 Monitoring Dendritic Cell Activation and Maturation ......................... 359
Ben Fancke and Meredith O’Keeffe

27 Monitoring the Intracellular Routing of Internalized Antigens
by Immunofluorescence Microscopy .................................................. 371
Lars Franken, Christian Kurts, and Sven Burgdorf

28 Isolation of a Specialized, Antigen-Loaded Early Endosomal Subpopulation
by Flow Cytometry ............................................................................. 379
Achmet Imam Chasan, Marc Beyer, Christian Kurts, and Sven Burgdorf

29 Preparing Antigens Suitable for Cross-presentation Assays
In Vitro and In Vivo ............................................................................ 389
Loredana Saveanu and Peter van Endert

30 Gene Transduction in Human Monocyte-Derived Dendritic Cells
Using Lentiviral Vectors ................................................................. 401
Takeshi Satoh and Nicolas Manel
