CONTENTS

Preface ................................................................. v
Contributors ........................................................................................................ ix

1 Methodological Considerations in Exercise Endocrinology .......... 1
   Anthony C. Hackney and Abbie E. Smith-Ryan

2 Exercise and Endogenous Opiates .......................................................... 21
   Allan H. Goldfarb

3 The Effect of Exercise on the Hypothalamic–Pituitary–
   Adrenal Axis ........................................................................................... 37
   David H. St-Pierre and Denis Richard

4 Impact of Chronic Training on Pituitary Hormone Secretion
   in the Human.......................................................................................... 49
   Johannes D. Veldhuis and Kohji Yoshida

5 Exercise and the GH–IGF-I Axis .............................................................. 69
   Alon Eliakim and Dan Nemet

6 Exercise and Thyroid Function ........................................................... 85
   Joanna Klubo-Giewizdzinska, Victor J. Bernet,
   and Leonard Wartofsky

7 The Male Reproductive System, Exercise, and Training:
   Endocrine Adaptations.......................................................................... 121
   Fabio Lanfranco and Marco Alessandro Minetto

8 Exercise and the Hypothalamus. Ovulatory Adaptations ............. 133
   Moira A. Petit and Jerilynn C. Prior

9 Adrenergic Regulation of Energy Metabolism .................................. 167
   Michael Kjær and Kai Lange

10 Energy Balance and Weight Control (Male and Female):
    Considerations...................................................................................... 175
    Kristin Ondrak

11 Exercise Training in the Normal Female: Effects of Low Energy
    Availability on Reproductive Function............................................. 185
    Anne B. Loucks

12 Ghrelin Responses to Acute Exercise and Training........................ 207
    Jaak Jürimäe and Toivo Jürimäe

13 Hormonal Regulation of Fluid and Electrolyte Homeostasis
    During Exercise .................................................................................. 221
    Charles E. Wade

14 Hormonal Regulations of the Effects of Exercise on Bone:
    Positive and Negative Effects.......................................................... 245
    Philip D. Chilibeck
