## Contents

1 **Histopathology and Grading of Breast Cancer** ................................. 1  
   Magda Esebua

2 **Multicentric/Multifocal Breast Cancer: Overview, Biology, and Therapy** ................................................................. 29  
   Federico Buggi, Annalisa Curcio, Fabio Falcini, and Secondo Folli

3 **The Immune System in Breast Cancer Initiation and Progression: Role of Epithelial to Mesenchymal Transition** ................................. 43  
   Keith L. Knutson and Derek C. Radisky

4 **Remodelling of the Extracellular Matrix: Implications for Cancer** ................................................................. 65  
   Thomas R. Cox and Janine T. Erler

5 **Biology and Treatment of Basal-Like Breast Cancer** .......................... 91  
   Bingchen Han, William Audeh, Yanli Jin, Sanjay P. Bagaria, and Xiaojiang Cui

6 **Re-excision After Lumpectomy for Breast Cancer** .............................. 111  
   Suzanne B. Coopey

7 **Novel Anti-angiogenic Therapies Using Naturally Occurring and Synthetic Drugs to Combat Progestin-Dependent Breast Cancer** ................................................................. 123  
   Salman M. Hyder, Benford Mafuvadze, and Cynthia Besch-Williford

8 **New Insights on Estrogen Receptor Actions in Hormone-Responsive Breast Cancer Cells by Interaction Proteomics** ................................. 149  
   Concetta Ambrosino, Roberta Tarallo, Giovanni Nassa, Francesca Cirillo, and Alessandro Weisz
9 Reprogramming Breast Cancer Cells with Embryonic Microenvironments: Insights from Nodal Signaling .................. 175 
Gina Kirsammer and Mary J.C. Hendrix

10 Metastatic Determinants: Breast Tumour Cells in Circulation .......... 191 
Nisha Kanwar and Susan J. Done

11 Breast Cancer Epigenetics: Biomarkers and Therapeutic Potential ................................................................. 211 
Nancy H. Nabils, Carolina E. Pardo, Maria Zajac-Kaye, and Michael P. Kladde

12 The Impact of Centrosome Abnormalities on Breast Cancer Development and Progression with a Focus on Targeting Centrosomes for Breast Cancer Therapy ............................................. 261 
Heide Schatten

13 A New Perspective on Cyclin D1: Beyond Cell Cycle Regulation ...... 289 
Chenguang Wang, Timothy G. Pestell, and Richard G. Pestell

14 Gene Signatures of Inflammatory Breast Cancer: Epithelial Plasticity and a Cancer Stem Cell Phenotype ............... 305 
Fredika M. Robertson, Khoi Chu, Sandra V. Fernandez, Zaiming Ye, Sanford H. Barsky, and Massimo Cristofanilli

15 An Integrated Human Mammary Epithelial Cell Culture System for Studying Carcinogenesis and Aging ................................. 323 
Martha R. Stampfer, Mark A. LaBarge, and James C. Garbe

16 New Breast Cancer Treatment Considerations: A Brief Review of the Use of Genetically Modified (Attenuated) Bacteria as Therapy for Advanced and Metastatic Breast Cancer ....................... 363 
Robert A. Kazmierczak, Alison Dino, Abraham Eisenstark, and Heide Schatten

Index ......................................................................................................................................................... 373
Cell and Molecular Biology of Breast Cancer
Schatten, H. (Ed.)
2013, VIII, 383 p. 55 illus., 51 illus. in color., Hardcover
A product of Humana Press
