Contents

Preface ................................................................. v
Contributors ......................................................... xi

PART I  TOXICOPROTEOMICS

1 Array-Based Immunoassays with Rolling-Circle Amplification Detection ........ 3
   Katie Partyka, Shuangshuang Wang, Ping Zhao, Brian Cao,
   and Brian Haab

2 Analysis of Protein Changes Using Two-Dimensional
   Difference Gel Electrophoresis .................................. 17
   Weimin Gao

PART II  TOXICANT-INDUCED INFLAMMATION

3 Assessment of Pathological and Physiological Changes
   in Mouse Lung Through Bronchoalveolar Lavage .............. 33
   Yuanpu Peter Di

4 Analysis of Clinical and Biological Samples Using Microsphere-Based
   Multiplexing Luminex System ..................................... 43
   Yingze Zhang, Rahel Birru, and Yuanpu Peter Di

PART III  GENE PROMOTER METHYLATION

5 Detection of DNA Methylation by MeDIP
   and MBDCap Assays: An Overview of Techniques .............. 61
   Hang-Kai Hsu, Yu-I Weng, Pei-Yin Hsu, Tim H.-M. Huang,
   and Yi-Wen Huang

6 Screening of DNA Methylation Changes by Methylation-Sensitive
   Random Amplified Polymorphic DNA-Polymerase
   Chain Reaction (MS-RAPD-PCR) ................................. 71
   Kamaleshwar P. Singh

PART IV  ARRAY TECHNOLOGIES

7 Strategies for Measurement of Biotransformation
   Enzyme Gene Expression .......................................... 85
   Marjorie Romkes and Shama C. Buch

8 Genotyping Technologies: Application to Biotransformation Enzyme Genetic
   Polymorphism Screening ........................................... 99
   Marjorie Romkes and Shama C. Buch
9  TaqMan™ Fluorogenic Detection System to Analyze Gene Transcription in Autopsy Material .......................... 117
    Kaori Shintani-Ishida, Bao-Li Zhu, and Hitoshi Maeda

PART V  ANALYSIS OF DNA ADDUCTS

10  32P-Postlabeling Analysis of DNA Adducts ................................................................. 127
    David H. Phillips and Volker M. Arlt

11  Modification of the 32P-Postlabeling Method to Detect a Single Adduct Species as a Single Spot .................. 139
    Masako Ochiai, Takashi Sugimura, and Minako Nagao

12  DNA Isolation and Sample Preparation for Quantification of Adduct Levels by Accelerator Mass
    Spectrometry .............................................................................................................. 147

13  Analysis of DNA Strand Cleavage at Abasic Sites .......................................................... 159
    Walter A. Deutsch and Vijay Hegde

PART VI  DETECTION OF CHROMOSOMAL AND GENOME-WIDE DAMAGE

14  Premature Chromosome Condensation in Human Resting Peripheral Blood Lymphocytes Without Mitogen
    Stimulation for Chromosome Aberration Analysis Using Specific Whole Chromosome DNA Hybridization
    Probes ......................................................................................................................... 171
    Rupak Pathak and Pataje G.S. Prasanna

15  Mutagen Sensitivity as Measured by Induced Chromatid Breakage as a Marker of Cancer Risk ................. 183
    Xifeng Wu, Yun-Ling Zheng, and T.C. Hsu

16  Pulsed-Field Gel Electrophoresis Analysis of Multicellular DNA Double-Strand Break Damage and Repair .... 193
    Nina Joshi and Stephen G. Grant

PART VII  DETECTION AND CHARACTERIZATION OF SURROGATE GENE MUTATION

17  Detection of Pig-a Mutant Erythrocytes in the Peripheral Blood of Rats and Mice ................................. 205
    Vasily N. Dobrovolsky, Xuefei Cao, Javed A. Bhalli, and Robert H. Heflich

18  The Blood-Based Glycophorin A (GPA) Human In Vivo Somatic Mutation Assay .............................. 223
    Nicole T. Myers and Stephen G. Grant

19  Flow Cytometric Quantification of Mutant T Cells with Altered Expression of the T-Cell Receptor: Detecting
    Somatic Mutants in Humans and Mice ......................................................................... 245
    Seishi Kyoizumi, Yoichiro Kusunoki, and Tomonori Hayashi
20 Analysis of In Vivo Mutation in the \textit{Hprt} and \textit{Tk} Genes of Mouse Lymphocytes .................................................. 255
\textit{Vasily N. Dobrovolsky, Joseph G. Shaddock, and Robert H. Heflich}

21 Quantifying In Vivo Somatic Mutations Using Transgenic Mouse Model Systems ............................................. 271
\textit{Roy R. Swiger}

22 The Human T-Cell Cloning Assay: Identifying Genotypes Susceptible to Drug Toxicity and Somatic Mutation ............... 283
\textit{Sai-Mei Hou}

23 Molecular Analysis of Mutations in the Human \textit{HPRT} Gene ............................................................... 291
\textit{Phouthone Keobavong, Liqiang Xi, and Stephen G. Grant}

24 Simultaneous Quantification of \textit{t}(14;18) and \textit{HPRT} Exon 2/3 Deletions in Human Lymphocytes ......................... 303
\textit{James C. Fuscoe}

\textbf{PART VIII D\textsuperscript{E}TECTION AND CHARACTERIZATION OF CANCER GENE MUTATION}

25 Mutation Screening of the \textit{TP53} Gene by Temporal Temperature Gel Electrophoresis (TTGE) .................................. 315
\textit{Therese Sørlie, Hilde Johnsen, Phuong Vu, Guro Elisabeth Lind, Ragnhild Lothe, and Anne-Lise Børresen-Dale}

26 Detection of Point Mutations of K-ras Oncogene and p53 Tumor-Suppressor Gene in Sputum Samples ....................... 325
\textit{Weimin Gao and Phouthone Keobavong}

27 ACB-PCR Quantification of Somatic Oncomutation .......................................................... 345
\textit{Meagan B. Myers, Page B. McKinzie, Yiying Wang, Fanxue Meng, and Barbara L. Parsons}

28 Gel-Based Nonradioactive Single-Strand Conformational Polymorphism and Mutation Detection: Limitations and Solutions .............................................. 365
\textit{Vibhuti Gupta, Reetakshi Arora, Sailesh Gochhait, Narendra K. Bairwa, and Rameshwar N.K. Bamezai}

29 Detection and Characterization of Oncogene Mutations in Preneoplastic and Early Neoplastic Lesions ....................... 381
\textit{Toshinari Minamoto}

30 Detection of DNA Double-Strand Breaks and Chromosome Translocations Using Ligation-Mediated PCR and Inverse PCR ........ 399
\textit{SHEETAL SINGH, SHYH-JEN SHIH, AND ANDREW T.M. VAUGHAN}

\textbf{PART IX ANALYSIS OF DNA DAMAGE AND REPAIR MECHANISMS}

31 Quantitative PCR-Based Measurement of Nuclear and Mitochondrial DNA Damage and Repair in Mammalian Cells .................. 419
\textit{Amy Furda, Janine H. Santos, Joel N. Meyer, and Bennett Van Houten}
