Contributors ......................................................... ix

PART I  GENETIC MECHANISMS OF G PROTEIN-COUPLED RECEPTORS

1 G Protein-Coupled Receptors: Research and Methods in the Post-genomic Era ......................................................... 3
Craig W. Stevens

2 Examining the Dynamic Evolution of G Protein-Coupled Receptors .............. 23
Claudia Stäubert, Diana Le Duc, and Torsten Schöneberg

3 Functional Properties of Virus-Encoded and Virus-Regulated G Protein-Coupled Receptors ................................................. 45
Katja Spiess and Mette M. Rosenkilde

4 Discovery and Function of the Very Large G Protein-Coupled Receptor ....... 67
Perrin C. White and D. Randy McMillan

5 Functional Evolution of Opioid Family G Protein-Coupled Receptors ........ 85
Eyal Vardy, Craig W. Stevens, and Bryan L. Roth

6 Investigation of G Protein-Coupled Receptor Function and Regulation Using Antisense ......................................................... 105
Jonathon Willets and Craig Nash

7 Signalosome Profiling Reveals Allosteric Interactions Between G Protein-Coupled Receptors ......................................................... 127
Katrin Altosaar, Darlaine Pétrin, Dominic Devost, and Terence E. Hébert

PART II  GENETIC TOOLBOX FOR G PROTEIN-COUPLED RECEPTOR DISCOVERY

8 Use of Optogenetic Approaches to Control Intracellular Signaling of G Protein-Coupled Receptors ......................................................... 149
Olivia A. Masseck, Melanie D. Mark, and Stefan Herlitze

9 Viral Infection for G Protein-Coupled Receptor Expression in Eukaryotic Cells ......................................................... 161
Antonio Porcellini, Luisa Iacovelli, and Antonio De Blasi

10 Using In Vitro Mutagenesis to Characterize Structure-Function Relationships in G Protein-Coupled Receptors ......................................................... 177
Gregory W. Sawyer and Frederick J. Ehlert
11 The CRE Luc Mouse Model for Bioimaging Ligand Activation of G Protein-Coupled Receptors .................................................. 197
  *H. Gregory Polites and Kyriakos D. Economides*

12 Inducing Conformational Changes in G Protein-Coupled Receptors by Domain Coupling .................................................. 219
  *Hamiyet Unal and Sadashiva S. Karnik*

13 Rescue of Defective G Protein-Coupled Receptor Function by Intermolecular Cooperation .................................................. 239
  *Ashutosh Trehan, Kim Carol Jonas, Ilpo Huhtaniemi, Aylin Carla Hanyaloglu, and Adolfo Rivero-Müller*

14 Design of Super-arrestins for Gene Therapy of Diseases Associated with Excessive Signaling of G Protein-Coupled Receptors ............... 257
  *Vsevolod V. Gurevich and Eugenia V. Gurevich*

**PART III  GENETIC ASPECTS OF G PROTEIN-COUPLED RECEPTORS IN HEALTH AND MEDICINE**

15 Importance of G Protein-Coupled Receptor Genetics in Clinical Medicine .................................................. 289
  *Ramakrishna Devaki*

16 Pharmacogenomics of G Protein-Coupled Receptor Signaling and Other Pathways in Essential Hypertension ...................................... 299
  *Pedro A. Jose, Van Anthony M. Villar, Matthew R. Weir, and Robin A. Felder*

17 Exon Sequencing of G Protein-Coupled Receptor Genes and Perspectives for Disease Treatment .................................................. 313
  *Angeliki Karamitri and Ralf Jockers*

18 Gene Therapy Using G Protein-Coupled Receptors for the Treatment of Cardiovascular Disease .................................................. 333
  *Dario Leosco, Grazia D. Femminella, Claudio de Lucia, and Giuseppe Rengo*

19 Novel Mechanisms of G Protein-Coupled Receptor Oligomer and Ion Channel Interactions in Nociception ........................................ 347
  *Ajay S. Yekkirala*

20 Discovery and Characterization of Leucine-Rich Repeat-Containing G Protein-Coupled Receptors .................................................. 365
  *Marie-Isabelle Garcia, Valeria Fernandez-Vallone, and Gilbert Vassart*

21 The Role of G-Protein-Coupled Receptors in Adult Neurogenesis ........................................................................................................ 389
  *Katie M. Collette, Van A. Doze, and Dianne M. Perez*

*Index* ........................................................................................................................................................................ 413
