### Contents

*Preface* ......................................................... v  
*Contributors* .................................................. ix  

1 Homing Endonucleases: From Genetic Anomalies to Programmable Genomic Clippers ............................. 1  
   *Marlene Belfort and Richard P. Bonocora*  

2 Bioinformatic Identification of Homing Endonucleases and Their Target Sites ............................. 27  
   *Eyal Privman*  

3 PCR-Based Bioprospecting for Homing Endonucleases in Fungal Mitochondrial rRNA Genes .................. 37  
   *Mohamed Hafez, Tuhin Kumar Guha, Chen Shen, Jyothi Sethuraman, and Georg Hausner*  

4 Mapping Homing Endonuclease Cleavage Sites Using In Vitro Generated Protein ............................. 55  
   *Richard P. Bonocora and Marlene Belfort*  

5 Mapping Free-Standing Homing Endonuclease Promoters Using 5′RLM-RACE ..................................... 69  
   *Ewan A. Gibb*  

6 PCR Analysis of Chloroplast Double-Strand Break (DSB) Repair Products Induced by I-CreII in Chlamydomonas and Arabidopsis .................. 77  
   *Taegun Kwon, Obed W. Odom, Weihua Qiu, and David L. Herrin*  

7 A Two-Plasmid Bacterial Selection System for Characterization and Engineering of Homing Endonucleases .................. 87  
   *Ning Sun and Huimin Zhao*  

8 Rapid Screening of Endonuclease Target Site Preference Using a Modified Bacterial Two-Plasmid Selection .................. 97  
   *Jason M. Wolfs, Benjamin P. Kleinstiver, and David R. Edgell*  

9 A Yeast-Based Recombination Assay for Homing Endonuclease Activity .................. 105  
   *Jean-Charles Epinat*  

10 Rapid Determination of Homing Endonuclease DNA Binding Specificity Profile .................. 127  
   *Lei Zhao and Barry L. Stoddard*  

11 Quantifying the Information Content of Homing Endonuclease Target Sites by Single Base Pair Profiling .................. 135  
   *Joshua I. Friedman, Hui Li, and Raymond J. Monnat Jr.*
Contents

12 Homing Endonuclease Target Site Specificity Defined
   by Sequential Enrichment and Next-Generation Sequencing
   of Highly Complex Target Site Libraries ................................. 151
   Hui Li and Raymond J. Monnat Jr.

13 Homing Endonuclease Target Determination Using SELEX
   Adapted for Yeast Surface Display ........................................ 165
   Kyle Jacoby and Andrew M. Scharenberg

14 Engineering and Flow-Cytometric Analysis of Chimeric LAGLIDADG
   Homing Endonucleases from Homologous I-OnuI-Family Enzymes ....... 191
   Sarah K. Baxter, Andrew M. Scharenberg, and Abigail R. Lambert

15 Bioinformatics Identification of Coevolving Residues .................... 223
   Russell J. Dickson and Gregory B. Gloor

16 Identification and Analysis of Genomic Homing
   Endonuclease Target Sites .................................................. 245
   Stefan Pellenz and Raymond J. Monnat Jr.

17 Redesigning the Specificity of Protein–DNA Interactions with Rosetta .... 265
   Summer Thyme and David Baker

Index .................................................................................. 283
Homing Endonucleases
Methods and Protocols
Edgell, D. (Ed.)
2014, X, 284 p. 60 illus., 39 illus. in color., Hardcover
ISBN: 978-1-62703-967-3
