# Contents

Preface ................................................................. v  
Contributors ......................................................... xi

## Part I  Bioinformatics

1 Galaxy as a Platform for Identifying Candidate Pathogen Effectors  
   Peter J.A. Cock and Leighton Pritchard  
   ................................................................. 3

2 Bioinformatic Analysis of Expression Data to Identify  
   Effector Candidates  
   Adam J. Reid and John T. Jones  
   ............................................................... 17

3 Two-Dimensional Data Binning for the Analysis  
   of Genome Architecture in Filamentous  
   Plant Pathogens and Other Eukaryotes  
   Diane G.O. Saunders, Joe Win, Sophien Kamoun, and Sylvain Raffaele  
   ............................................................... 29

4 On the Statistics of Identifying Candidate Pathogen Effectors  
   Leighton Pritchard and David Broadhurst  
   ............................................................... 53

## Part II  Cell Biology

5 High-Throughput Imaging of Plant Immune Responses  
   Martina Beck, Ji Zhou, Christine Faulkner, and Silke Robatzek  
   ............................................................... 67

6 In Vivo Protein–Protein Interaction Studies with BiFC: Conditions,  
   Cautions, and Caveats  
   Petra Boevink, Hazel McLellan, Tatyana Bukharova,  
   Stefan Engelhardt, and Paul Birch  
   ............................................................... 81

7 Particle Bombardment-Mediated Transient Expression  
   to Identify Localization Signals in Plant Disease Resistance Proteins  
   and Target Sites for the Proteolytic Activity of Pathogen Effectors  
   Daigo Takemoto and David A. Jones  
   ............................................................... 91

8 Purification of Fungal Haustoria from Infected  
   Plant Tissue by Flow Cytometry  
   Diana P. Garnica and John P. Rathjen  
   ............................................................. 103

## Part III  From Assays of Pathogen Virulence  
   to Effector Function

9 Functional Characterization of Nematode Effectors in Plants  
   Axel A. Elling and John T. Jones  
   ............................................................. 113

10 Silencing of Aphid Genes by Feeding on Stable Transgenic  
   Arabidopsis thaliana  
   Alexander D. Coleman, Marco Pitino, and Saskia A. Hogenhout  
   ............................................................ 125
11 Leaf-Disc Assay Based on Transient Over-Expression
in Nicotiana benthamiana to Allow Functional Screening
of Candidate Effectors from Aphids .......................... 137
Patricia A. Rodriguez, Saskia A. Hogenhout, and Jorunn I.B. Bos

12 A Growth Quantification Assay for Hyaloperonospora arabidopsidis
Isolates in Arabidopsis thaliana .................................. 145
Daniel F.A. Tomé, Jens Steinbrenner, and Jim L. Beynon

13 Simple Quantification of In Planta Fungal Biomass .................. 159
Michael Ayliffe, Sambasivam K. Periyannan, Angela Feechan,
Ian Dry, Ulrike Schumann, Evans Lagudah, and Anthony Pryor

14 Virus-Induced Gene Silencing and Agrobacterium tumefaciens-Mediated
Transient Expression in Nicotiana tabacum ....................... 173
Zhao Zhang and Bart P.H.J. Thomma

15 DIGE-ABPP by Click Chemistry: Pairwise Comparison
of Serine Hydrolase Activities from the Apoplast of Infected Plants .... 183
Tram Ngoc Hong and Renier A.L. van der Hoorn

16 A Simple and Fast Protocol for the Protein Complex
Immuno precipitation (Co-IP) of Effector: Host Protein Complexes .... 195
Jens Steinbrenner, Matthew Eldridge, Daniel F. A. Tomé,
and Jim L. Beynon

17 An Arabidopsis and Tomato Mesophyll Protoplast
System for Fast Identification of Early MAMP-Triggered
Immunity-Suppressing Effectors .................................. 213
Malou Fraiture, Xiangzi Zheng, and Frédéric Brunner

18 Production of RXLR Effector Proteins for Structural Analysis
by X-Ray Crystallography ........................................... 231
Richard K. Hughes and Mark J. Banfield

PART IV METHODS TO IDENTIFY RESISTANCE GENES
AND AVIRULENCE GENES

19 The Do’s and Don’ts of Effectoromics ............................. 257
Juan Du and Vivianne G.A.A. Vleeshouwers

20 Protoplast Cell Death Assay to Study
Magnaporthe oryzae AVR Gene Function in Rice .................. 269
Hiroyuki Kanzaki, Kentaro Yoshida, Hiromasa Saitoh,
Mulunch Tamiru, and Ryohei Terauchi

21 A Bacterial Type III Secretion-Based Delivery System
for Functional Assays of Fungal Effectors in Cereals .............. 277
Narayana M. Upadhyaya, Jeffery G. Ellis, and Peter N. Dodds

22 Genomic DNA Library Preparation for Resistance Gene Enrichment
and Sequencing (RenSeq) in Plants ................................ 291
Florian Jupe, Xinwei Chen, Walter Verweij, Kamel Witek,
Jonathan D.G. Jones, and Ingo Hein

Index ................................................................. 305
Plant-Pathogen Interactions
Methods and Protocols
Birch, P.; Jones, J.; Bos, J. (Eds.)
2014, XIII, 306 p. 57 illus., 43 illus. in color., Hardcover
A product of Humana Press
