# TABLE OF CONTENTS

List of Contributors ix

**INTRODUCTION**

1. Current Work and Open Problems: A Road-Map for Research into the Emergence of Communication and Language  
   *Christyopher L. Nehaniv, Caroline Lyon, and Angelo Cangelosi* ........... 1

**PART I  **EMPIRICAL INVESTIGATIONS ON HUMAN LANGUAGE**

2. Evolving Meaning: The Roles of Kin Selection, Allomothering and Paternal Care in Language Evolution  
   *W. Tecumseh Fitch* ................................................................. 29

3. ‘Needs only’ Analysis in Linguistic Ontogeny and Phylogeny  
   *Alison Wray* ........................................................................ 53

4. Clues from Information Theory Indicating a Phased Emergence of Grammar  
   *Caroline Lyon, Christyopher L. Nehaniv, and Bob Dickerson* .......... 71

5. Emergence of a Communication System: International Sign  
   *Rachel Rosenstock* .................................................................. 87

6. Distributed Language: Biomechanics, Functions, and the Origins of Talk  
   *Stephen J. Cowley* .................................................................. 105

**PART II  **SYNTHESIS OF COMMUNICATION AND LANGUAGE IN ARTIFICIAL SYSTEMS**

7. The Recruitment Theory of Language Origins  
   *Luc Steels* .............................................................................. 129

8. *In silico* Evolutionary Developmental Neurobiology  
   and the Origin of Natural Language  
   *Eörs Szathmáry, Zoltán Szatmáry, Péter Ittés, Gergő Orbán, István Zachár, Ferenc Huszár, Anna Fedor, Máté Varga, Szabolcs Számadó* ................................................................. 151

9. Communication in Natural and Artificial Organisms: Experiments in Evolutionary Robotics  
   *Davide Marocco and Stefano Nolfi* ........................................... 189
Table of Contents

10. From Vocal Replication to Shared Combinatorial Speech Codes: A Small Step for Evolution, A Big Step for Language  
Pierre-Yves Oudeyer .......................................................... 207

11. Learning and Transition of Symbols: Towards a Dynamical Model of a Symbolic Individual  
Takashi Hashimoto and Akira Masumi ........................................ 223

12. Language Change among ‘Memoryless Learners’ Simulated in Language Dynamics Equations  
Makoto Nakamura, Takashi Hashimoto, and Satoshi Tojo ............... 237

13. The Evolution of Meaning-Space Structure through Iterated Learning  
Simon Kirby ................................................................. 253

14. The Emergence of Language: How to Simulate It  
Domenico Parisi and Marco Mirolli ........................................ 269

15. Lexical Acquisition with and without Metacommunication  
Jonathan Ginzburg and Zoran Macura ...................................... 287

16. Agent Based Modelling of Communication Costs: Why Information Can Be Free  
Ivana Čače and Joanna J. Bryson .......................................... 305

17. Language Change and the Inference of Meaning  
Andrew D. M. Smith .......................................................... 323

18. Language, Perceptual Categories and their Interaction: Insights from Computational Modelling  
Tony Belpaeme and Joris Bleys ............................................... 339

PART III INSIGHTS FROM ANIMAL COMMUNICATION

19. Emergence of Linguistic Communication: Studies on Grey Parrots  
Irene M. Pepperberg .......................................................... 355

20. A Possible Role for Selective Masking in the Evolution of Complex, Learned Communication Systems  
Graham R. S. Ritchie and Simon Kirby .................................... 387
21. The Natural History of Human Language: Bridging the Gaps without Magic
   Bjorn Merker and Kazuo Okanoya............................... 403

22. Neural Substrates for String-Context Mutual Segmentation: A Path to Human Language
   Kazuo Okanoya and Bjorn Merker.............................. 421
