Preface	v
Acknowledgements	vii
Part I Concepts	
1 Introduction	3
1.1 Motivation and Purpose of the Book	4
1.2 Purposes of Thesis Projects	4
1.3 Actors in the Project	6
1.4 Process	7
1.5 Assessment Criteria	7
1.6 Reading Guidelines	8
2 Computer Science and Information Systems Research Projects	9
2.1 The Landscape of CS and IS	9
2.2 What is Research?	10
2.3 Research Methods	12
2.4 Linkage Between Research and Thesis Projects	14
3 Actors Involved, their Roles and Relationships	15
3.1 The Student	15
3.1.1 The Responsibilities of the Student	16
3.1.2 Projects with Multiple Students	17
3.2 The Supervisor	18
3.2.1 The Responsibilities of a Supervisor	18
3.2.2 Projects with Multiple Supervisors	19
3.3 The Examiner	19
3.3.1 The Examiner as Quality Evaluator	20
3.3.2 The Examiner as Quality Assuror	20
3.3.3 The Responsibilities of an Examiner	22

Part II Process

4	The Process – An Overview	25
5	Developing your Project Proposal	27
5.1	Choosing a Subject Area	27
5.1.1	Start Early	28
5.1.2	How to Choose a Subject Area	29
5.2	Choose Problem to Focus on Within the Subject Area	30
5.2.1	Descriptive Projects	31
5.2.2	Theory Oriented Projects	31
5.2.3	Applied Projects	32
5.2.4	A Comparison of Theory and Practice	32
5.3	Assure Quality of Initial Ideas	33
5.4	Write and Submit a Project Proposal	33
5.4.1	Structure	33
5.4.2	Project Proposal Checklist	35
5.5	Quality Control of Project Proposal	35
5.6	Matching Supervisors and Students	36
6	References and Citations	37
6.1	Appropriate References	37
6.2	Citations	40
6.3	Improve your Learning (and Grade)	42
7	Developing your Aim	45
7.1	Meetings with Your Supervisor	45
7.2	Time Plan	46
7.3	Activities to Perform While Developing the Aim	47
7.3.1	Refine the Initial Aim	48
7.3.2	Develop the Arguments Behind the Aim	49
7.3.3	Write the Introduction	52
8	Developing your Objectives and Choosing Methods	54
8.1	Important Concepts	54
8.2	Addressing Validity and Reliability	56
8.3	Methods	58
8.3.1	Literature Analysis	58
8.3.2	Interview	60
8.3.3	Case Study	62

8.3.4	Survey	63
8.3.5	Implementation	64
8.3.6	Experiment	65
8.3.7	Summary	65
8.4	An Illustrative Analogy	66
8.5	A Four-Step Process	68
8.5.1	Develop Objectives	68
8.5.2	Identify Potential Methods	69
8.5.3	Choose Among the Potential Methods	69
8.5.4	Present Details of the Chosen Approach.	70
9	Following the Objectives	71
10	Presenting and Analysing your Data	73
10.1	Presenting Non-Numerical Data	73
10.1.1	Presenting Data from a Literature Analysis	73
10.1.2	Presenting Data from Interviews and Questionnaires	75
10.1.3	Presenting Data from Implementations	76
10.2	Presenting Numerical Data	79
10.2.1	Using Tables and Graphs	79
10.2.2	Avoiding Misleading Graphs	81
10.2.3	Significance Tests	82
10.3	Analyse Your Data	83
10.3.1	Descriptive Projects	83
10.3.2	Theory Oriented Projects	84
10.3.3	Applied Projects	84
10.3.4	A Comparison of Theory and Practice	85
10.4	What is a Good Result?.	86
11	Drawing your Conclusions and Identifying Future Work	87
11.1	Summarising the Results	88
11.2	Putting the Results into Context	88
11.3	Evaluating the Process	90
11.4	Identifying Future Work	90
12	Presenting and Defending your Work Orally	92
12.1	Oral Presentation	92
12.1.1	Before the Presentation	93
12.1.2	The Presentation	96
12.1.3	What to Say	98
12.1.4	Handling Questions	99
12.1.5	Preparing for the Defence	100

12.2	Acting as Opponent	102
12.2.1	How to Act as Opponent	102
12.2.2	Preparing for Opposition	103
12.3	Prepare the Final Version of your Report	105

Part III Supplements

13	Information-Seeking and Use	109
13.1	Information Literacy for Computer Science	109
13.2	Information Searching, Seeking, and Behaviour	110
13.2.1	Search Techniques	111
13.3	A Session with INSPEC	112
13.3.1	What will you Find?	113
13.3.2	Boolean Commands	113
13.3.3	Information Structure	114
13.3.4	How to Get Hold of Documents	117
13.4	The Information Seeking-Process	118
13.5	Two Basic Strategies for Information Seeking	119
13.5.1	The Concept Map	119
13.5.2	Personal Research Information Management	120
14	The Report	122
14.1	Introduction	122
14.2	Who is the Report for?	123
14.3	Requirements of the Report	125
14.4	Structure of the Report	126
14.4.1	Title Page	126
14.4.2	Abstract	127
14.4.3	Chapter 1 – Introduction Chapter	128
14.4.4	Chapter 2 – Background	129
14.4.5	Chapter 3 – Problem Description and Statement	130
14.4.6	Chapters 4–6 – The Core of your Report	130
14.4.7	Chapter 7 – Related Work	130
14.4.8	Chapter 8 – Conclusion	131
14.5	Style of the Report	132
14.6	Managing References	133
14.6.1	The List of References	133
14.6.2	Sources	134
14.6.3	Reference Style	135
14.6.4	References to Tables and Figures	144

15 Examination	145
15.1 The Examiner's Roles	145
15.2 What to Examine	146
Bibliography	151
Appendix	152
Index	157

Thesis Projects

A Guide for Students in Computer Science and
Information Systems

Berndtsson, M.; Hansson, J.; Olsson, B.; Lundell, B.

2008, XIV, 162 p. 25 illus., Softcover

ISBN: 978-1-84800-008-7
