## Contents

### Chapter 1  Front End of Engineering Design .........................  1

**Computer Aided Design: An Early Shape Synthesis System**.......................... 3  
*Alison McKay, Iestyn Jowers, Hau Hing Chau, Alan de Pennington, David C Hogg*

**Constraints and Shortfalls in Engineering Design Practice**......................... 13  
*Lars Hein, Zhun Fan*

**Modular Product Family Development Within a SME**.................................... 21  
*Barry Stewart, Xiu-Tian Yan*

**Duality-based Transformation of Representation from Behaviour to Structure** ............................................................. 31  
*Yuemin Hou, Linhong Ji*

**Automatic Adaptive Triangulation of Surfaces in Parametric Space** .......... 41  
*Baohai Wu, Shan Li, Dinghua Zhang*

**Research on Modeling Free-form Curved Surface Technology** ..................... 51  
*Gui Chun Ma, Fu Jia Wu, Shu Sheng Zhang*

**Pattern System Design Method in Product Development** ................................ 61  
*Juqun Wang, Geng Liu, Haiwei Wang*

**Development of a Support System for Customer Requirement Capture** ...... 71  
*Atikah Haji Awang, Xiu-Tian Yan*

**Comparison About Design Methods of Tonpilz Type Transducer** ............... 81  
*Duo Teng, Hang Chen, Ning Zhu, Guolei Zhu, Yanni Gou*

**Effect for Functional Design** .............................................................................. 91  
*Guozhong Cao, Haixia Guo, Runhua Tan*

**Quality Control of Artistic Scenes in Processes of Design and Development of Digital-Game Products** ...................................................... 103  
*P.S. Pa, Tzu-Pin Su*
Chapter 2  Engineering Knowledge Management and Design for X ................................................................. 115

Integration of Design for Assembly into a PLM Environment ..................... 117
Samuel Gomes, Frédéric Demoly, Morad Mahdjoub, Jean-Claude Sagot

Design Knowledge for Decision-Making Process in a DFX Product Design Approach ............................................. 127
Keqin Wang, Lionel Roucoules, Shurong Tong, Benoît Eynard, Nada Matta

Mobile Knowledge Management for Product Life-Cycle Design ............... 137
Christopher L. Spiteri, Jonathan C. Borg

Research on Application of Ontological Information Coding in Information Integration ....................................... 147
Junbiao Wang, Bailing Wang, Jianjun Jiang and Shichao Zhang

RoHS Compliance Declaration Based on RCP and XML Database ............. 157
Chuan Hong Zhou, Benoît Eynard, Lionel Roucoules, Guillaume Ducellier

Research on the Optimization Model of Aircraft Structure Design for Cost ................................................................ 167
Shanshan Yao, Fajie Wei

Research on the Management of Knowledge in Product Development ........ 177
Qian-Wang Deng, De-Jie Yu

Representing Design Intents for Design Thinking Process Modelling .......... 187
Jihong Liu, Zhaoyang Sun

Application of Axiomatic Design Method to Manufacturing Issues Solving Process for Auto-body ................................................ 199
Jiangqi Zhou, Chaochun Lian, Zuoping Yao, Wenfeng Zhu, Zhongqin Lin

Port-Based Ontology for Scheme Generation of Mechanical System ........ 211
Dongxing Cao, Jian Xu, Ge Yang, Chunxiang Cui

Specification of an Information Capture System to Support Distributed Engineering Design Teams ................................................. 221
A. P. Conway, A. J. Wodehouse, W. J. Ion and A. Lynn

Collaborative Product Design Process Integration Technology Based on Web Service .......................................................... 231
Shiyun Li, Tiefeng Cai

Information Modelling Framework for Knowledge Emergence in Product Design ............................................................. 241
Muriel Lombard, Pascal Lhoste

Flexible Workflow Autonomic Object Intelligence Algorithm Based on Extensible Mamdani Fuzzy Reasoning System .......... 251
Run-Xiao Wang, Xiu-Tian Yan, Dong-Bo Wang, Qian Zhao
DSM based Multi-view Process Modelling Method for Concurrent Product Development ............................................................. 261
Peisi Zhong, Hongmei Cheng, Mei Liu, Shuhui Ding

Using Blogs to Manage Quality Control Knowledge in the Context of Machining Processes ..................................................................................... 273
Yingfeng Zhang, Pingyu Jiang and Limei Sun

Analysis on Engineering Change Management Based on Information Systems ......................................................................... 283
Qi Gao, Zongzhan Du, Yaning Qu

Research and Realization of Standard Part Library for 3D Parametric and Autonomic Modeling.......................................................... 293
Xufeng Tong, Dongbo Wang, Huicai Wang

Products to Learn or Products to Be Used? .......................................................... 303
Stéphane Brunel, Marc Zolghadri, Philippe Girard

Archival Initiatives in the Engineering Context ............................................. 313
Khaled Bahloul, Laurent Buzon, Abdelaziz Bouras

Design Information Revealed by CAE Simulation for Casting Product Development ................................................................. 323
M.W. Fu

An Ontology-based Knowledge Management System for Industry Clusters......................................................................................... 333
Pradorn Sureephong, Nopasit Chakpitak, Yacine Ouzrouit, Abdelaziz Bouras

Chapter 3 Detail Design and Design Analysis......................... 343

Loaded Tooth Contact Analysis of Modified Helical Face Gears .............. 345
Ning Zhao, Hui Guo, Zongde Fang, Yunbo Shen, Bingyang Wei

Simplified Stress Analysis of Large-scale Harbor Machine’s Wheel........ 355
Wubin Xu, Peter J Ogrodnik Bing Li, Jian Li, Shangping Li

Clean-up Tool-path Generation for Multi-patch Solid Model by Searching Approach ................................................................. 365
Ming Luo, Dinghua Zhang, Baohai Wu, Shan Li

Fatigue Life Study of Bogie Framework Welding Seam by Finite Element Analysis Method ......................................................... 375
Pingqing Fan, Xintian Liu, Bo Zhao

Research on Kinematics Based on Dual Quaternion for Five-axis Milling Machine ................................................................. 385
Rui-Feng Guo, Pei-Nan Li
Consideration for Galvanic Coupling of Various Stainless Steels & Titanium, During Application in Water-LiBr Absorption-Type Refrigeration System......................................................................................... 395
Muhammad Shahid Khan, Saad Jawed Malik

Real Root Isolation Arithmetic to Parallel Mechanism Synthesis................. 405
Youxin Luo, Dazhi Li, Xianfeng Fan, Lingfang Li, Degang Liao

Experimental Measurements for Moisture Permeations and Thermal Resistances of Cyclo Olefin Copolymer Substrates........................................ 415
Rong-Yuan Jou

Novel Generalized Compatibility Plate Elements Based on Quadrilateral Area Coordinates ...................................................................... 425
Qiang Liu, Lan Kang, Feng Ruan

Individual Foot Shape Modeling from 2D Dimensions Based on Template and FFD............................................................................................. 437
Bin Liu, Ning Shangguan, Jun-yi Lin, Kai-yong Jiang

Application of the TRIZ to Circular Saw Blade ............................................. 447
Tao Yao, Guolin Duan, Jin Cai

Chapter 4 Simulation and Optimisation in Design............ 457

Research on Collaborative Simulation Platform for Mechanical Product Design................................................................................................... 459
Zhaoxia He, Geng Liu, Haiwei Wang, Xiaohui Yang

Development of a Visualized Modeling and Simulation Environment for Multi-domain Physical Systems ................................................................. 469
Y.L. Tian, Y.H. Yan, R. M. Parkin, M. R. Jackson

Selection of a Simulation Approach for Saturation Diving Decompression Chamber Control and Monitoring System...................................................... 479
Diming Yang, Xiu-Tian Yan and Derek Clarke

Optimal Design of Delaminated Composite Plates for Maximum Buckling Load.................................................................................................... 489
Yu Hua Lin

Modeling Tetrapods Robot and Advancement ............................................ 499
Q. J. Duan, J. R. Zhang, Run-Xiao Wang, J. Li

The Analysis of Compression About the Anomalistic Paper Honeycomb Core .................................................................................................. 509
Wen-qin Xu, Yuan-jun Lv, Qiong Chen, Ying-da Sun

C-NSGA-II-MOPSO: An Effective Multi-objective Optimizer for Engineering Design Problems ................................................................. 519
Jinhua Wang, Zeyong Yin

</table>
A New FE Modelling Approach to Spot Welding Joints
of Automotive Panels and Modal Characteristics ........................................... 661
Jiqing Chen, Yunjiao Zhou and Fengchong Lan

Precision Measurement and Reverse Motion Design of the Follower
for Spatial Cams .............................................................................................. 671
Zhenghao Ge, Jingyang Li, Feng Xu, Xiaowei Han

Static Analysis of Translational 3-UPU Parallel Mechanism Based
on Principle of Virtual Work............................................................................... 681
Xiangzhou Zheng, Zhiyong Deng, Yougao Luo, Hongzan Bin

A Natural Frequency Variable Magnetic Dynamic Absorber...................... 691
Chengjun Bai, Fangzhen Song

Chapter 6 Manufacturing Systems Design.............................. 699

Next Generation Manufacturing Systems .......................................................... 701
R.H. Weston and Z. Cui

Tooling Design and Fatigue Life Evaluation via CAE Simulation
for Metal Forming.......................................................................................... 711
W.L. Chan, M.W. Fu, J. Lu

Modelling of Processing Velocity in Computer-controlled
Sub-aperture Pad Manufacturing .................................................................. 721
H. Cheng, Y. Yeung, H. Tong, Y. Wang

Load Balancing Task Allocation of Collaborative Workshops Based
on Immune Algorithm .................................................................................. 729
XiaoYi Yu, ShuDong Sun

Study on Reconfigurable CNC System ......................................................... 743
Jing Bai, Xiansheng Qin, Wendan Wang, Zhanxi Wang

Development of a NC Tape Winding Machine ........................................... 753
Yao-Yao Shi, Hong Tang, Qiang Yu

TRIZ-based Evolution Study for Modular Fixture ........................................ 763
Jin Cai, Hongxun Liu, Guolin Duan, Tao Yao, Xuebin Chen

Study on the Application of ABC System in the Refinery Industry ............ 773
Chunhe Wang, Linhai Shan, Ling Zhou, Guoliang Zhang

The Application of Activity-Based Cost Restore in the Refinery Industry .. 783
Xingdong Liu, Ling Zhou, Linhai Shan, Fenghua Zhang, Qiao Lin

Research on the Cost Distribution Proportionality of Refinery Units ......... 793
Fen Zhang, Yanbo Sun, Chunhe Wang, Xinglin Han, Qiusheng Wei
Chapter 7  Collaborative and Creative Product Development and Manufacture.................................................. 803

From a 3D Point Cloud to a Real CAD Model of Mechanical Parts, a Product Knowledge Based Approach ........................................................... 805
A. Durupt, S. Remy, W. Derigent

Research on Collaborative Design Support System for Ship Product Modelling .............................................................. 815
Yiting Zhan, Zhuoshang Ji, Ming Chen

Research on New Product Development Planning and Strategy Based on TRIZ Evolution Theory ........................................................... 825
Fuying Zhang, Xiaobin Shen, Qingping He

ASP-based Collaborative Networked Manufacturing Service Platform for SMEs ............................................................................. 835

Virtual Part Design and Modelling for Product Design .............................................................. 843
Bo Yang, Xiangbo Ze, Luning Liu

Integrated Paper-based Sketching and Collaborative Parametric 3D Modelling ............................................................................. 855
Franklin Balzan, Philip J. Farrugia, Jonathan C. Borg

Mechanical System Collaborative Simulation Environment for Product Design ............................................................................. 865
Haiwei Wang, Geng Liu, Xiaohui Yang, Zhaoxia He

Evolution of Cooperation in an Incentive Based Business Game Environment ............................................................................. 875
Sanat Kumar Bista, Keshav P. Dahal, Peter I. Cowling

Author Index .................................................................................................................................................. 883
Global Design to Gain a Competitive Edge
An Holistic and Collaborative Design Approach based on Computational Tools
Yan, X.-T.; Eynard, B.; Ion, W.J. (Eds.)
2008, XIX, 888 p., Hardcover
ISBN: 978-1-84800-238-8
