## Contents

Preface ................................................................................................................................. v
Conference Committees ........................................................................................................ vii

### ICMA Lectures

**Asko Ellman**
Designing Mobile Work Machines in Cyber Space ............................................................. 1

**Yuichi Utsumi**

### Medical applications

**Makoto Yagihashi, Hirohisa Narita and Hideo Fujimoto**
Surgical Tool Based Preoperative Planning System for Total Hip Arthroplasty ....................... 15

**Hirohisa Narita, Kakeru Harusawa, Makoto Yagihashi and Hideo Fujimoto**
A Trial of Numerical Calculation of Wear for Artificial Hip Joints ........................................ 21

**Noriko Masuta, Makoto Yagihashi, Hirohisa Narita and Hideo Fujimoto**
A Non-invasive Method to Measure Joint Range of Motion for Hip Joints ............................... 27

### Assembly

**Masaya Sanji, Tomonori Nakamura, Masato Suzuki and Seiji Aoyagi**
Robot Task of Pin Insertion to a Hole without Chamfering and with Small Clearance Using Fuzzy Control ...... 33

**Hidefumi Wakamatsu, Minoru Matsuishi, Eiji Morinaga and Eiji Arai**
Disassembly Support System for Used Products Considering Destruction of Their Parts .................. 37

**Tohru Sasaki and Yoshihiro Sakai**
The Discriminative Method of the Insertion Using a Cantilever Model for the Optical Fiber Array Automatic Assemble ............................................................................................................. 43

**Tomomi Yamaguchi, Naomichi Furushiro and Masahiro Higuchi**
Application of the Active Flexible Fixture to a Peg-in-hole Task ........................................... 49

### Hydraulic and pneumatic control

**Tapio Virvalo**
Comparison of Tracking Controllers of Hydraulic Cylinder Drive by Simulations ...................... 55

**Y. Liu, H. Handroos, O. Alkkiomäki, V. Kyrki and H. Kälviäinen**
Development of a Hybrid Position/Force Controlled Hydraulic parallel Robot for Impact Treatment .......... 61

**Huapeng Wu, Pekka Pessi, Yongbo Wang and Heikki Handroos**
Modeling and Control of Water Hydraulic Driven Parallel Robot ........................................... 69

### Rehabilitation and Orthosis systems

**Takehito Kikuchi, Sosuke Tanida, Kikuko Otsuki, Taigo Kakehashi and Junji Furusho**
Development of Intelligent Ankle-Foot Orthosis (i-AFO) with MR Fluid Brake and Control System for Gait Control ................................................................................................. 75

**Takehito Kikuchi, Takuya Ozawa, Kazuki Fukushima and Junji Furusho**
Development of Force-Measurable Grip and Software for "PLEMO", Rehabilitation System for Upper Limbs Based on Physical Therapy ............................................................................. 81

**Ying Jin, Takehito Kikuchi, Junji Furusho and Hiroki Akai**
Mechanism Design and Software of Quasi-3-DOF Active-Passive Rehabilitation System for Upper Limbs, "Hybrid-PLEMO" ........................................................................................................... 87

**Kunihiko Oda, Yuuki Ohyama, Junji Furusho, Takehito Kikuchi and Shiro Isozumi**
6-DOF Stand-Alone Rehabilitation System 'Robotherapist' and Its Applications to Stroke Patients .......... 91
### Development of Grip Mechanism Assistant Device for Finger Rehabilitation

Shahrol Mohamaddan and Mohd Shahril Osman
Development of Grip Mechanism Assistant Device for Finger Rehabilitation .................................................. 95

### Legged robots

Satoshi Tsuda, Kuniya Shinozaki and Ryohei Nakatsu
Development and Evaluation of a Centaur Robot ...................................................................................... 101

Jining Liu, Yoshitsugu Kamiya, Hiroaki Seki and Masatoshi Hikizu
Motion Simulation for a Stance Robot by Repeatedly Direct Kinematics ................................................... 107

Takuya Fukuda, Tomohito Takubo, Yasushi Mae and Tatsuo Arai
Manipulation Method Using Wheeled-Hand Mechanism for Humanoid Robot ............................................. 113

Masafumi Miwa, Hiroyasu Sakane, Kenji Nagase, Yasuhiro Koshimoto and Shigeki Tuchitani
Study on One-legged Robot Jumping ........................................................................................................... 119

### Control and Simulation

Masafumi Miwa, Ittetsu Shiraishi, Makoto Matsushima and Kiyoshi Minami
Remote Control Support System for R/C Helicopter .................................................................................. 125

Junso Kimura
Finite-Time Settling Control restraining Amplitude of Control Input by Linear Programming .................. 131

Koji Funamoto, Naoki Uchiyama, Masaya Hattori, Shigenori Sano and Shoji Takagi
Robust Control of Mechanical Systems with Nonlinear Friction Considering Compliance of Transmission Mechanism ................................................................................................................................. 137

Masahiko Kita, Tohru Ishida, Koji Teramoto and Yoshimi Takeuchi
Size Reduction and Performance Improvement of Automatic Discharge Gap Controller for Curved Hole Electrical Discharge Machining .................................................................................................................. 143

Joni Sallinen, Tero Eskola and Heikki Handroos
Design of a Motion Platform for a Mobile Machine Simulator by Utilizing 6-D Measurements and Inverse Dynamics Analysis .............................................................................................................................................. 149

### Position measurement

Tomohiro Tanahashi, Akihiro Torii, Masaaki Banno, Akiteru Ueda and Kae Doki
A Position Measurement Method for a Miniature Mobile Robot Using Three Moving Landmarks ........... 153

Yasuhiro Kawahara, Hiroshi Yoshida and Hiroshi Hosaka
Transport Equipment Positioning System Using Accelerometer and PHS ............................................... 159

Xiaofeng Wu, Florent Servillat, Shinnji Yamazaki, Tsuyoshi Taki, Ryohei Nakatsu, Masafumi Okajima, Tadashi Enomoto, Satoshi Kagami, Simon Thompson and Yoshifumi Nishida
A Four-legged Robot Connected to Ubiquitous Devices in a Home .............................................................. 165

Sho Komai, Tomomi Kuroda, Masaharu Takano, Seiji Aoyagi and Eiji Fukui
Development of Invisible Mark and Its Application to a Home Robot .......................................................... 171

### Actuators

Shinji Yamazaki, Yoshihiro Yasumuro and Masahiko Fuyuki
Adaptive Polyhedral Subdivision for Image-based Lighting ......................................................................... 177

Katsushi Furutani and Atsushi Furuta
Comparison of Driving Performance of Piezoelectric Actuator - Current Pulse Drive and Voltage Linear Drive - .................................................................................................................................................. 183

Jun Iwasaki, Tomohiro Ishii, Satoru Yoshikawa, Hiroshi Hosaka and Ken Sasaki
Steady State Analysis of Gyroscopic power Generator ................................................................................ 189

Yoichi Kadota, Hiroshi Hosaka and Takeshi Morita
Characterization of Shape Memory Piezoelectric Actuator and Investigation of the Origin of the Imprint Electrical Field ........................................................................................................................................... 195

### Manufacturing systems

Koji Iwamura, Norihisa Mayumi, Yoshitaka Tanimizu and Nobuhiro Sugimura

---

x
A Study on Real-time Scheduling for Holonic Manufacturing Systems - Application of Reinforcement Learning -

Shigeru Harashima and Katsuhisa Ohno
Flexible Production Systems developed and utilized in DENSO CORPORATION and their Evaluation

Kiyohiko Hori, Tsuneo Kawano and Keiichi Shirase
Promotion Methods of Job Redesigning for Elderly Workers on the Production Line

Yoshitaka Tanimizu, Yoshiyuki Sakashita, Koji Iwamura and Nobuhiro Sugimura
Human-Oriented Dynamic Task Reallocation and Rescheduling in Cellular Manufacturing Systems

Application of vision

Tatsuya Ogino, Yoshihiro Yasumuro and Masahiko Fuyuki
Shape Data Registration based on Structured Light Pattern Direction

Hiroyuki Ukida and Yasuyuki Yamanaka
Object Tracking System Using Pan-Tilt Cameras and Arm Robot

Driving support and Wheel chair

Takafumi Asao, Kentaro Kotani and Ken Horii
Influence of Reaching Actions on Driving Performance

Hideki Tomimori, Yoshihisa Ishida, Ken Sasaki, Yasuhiko Nakano and Satoshi Sano
Measurement of a Car Driver’s Pulse Interval while Driving with One Hand

Tatsuto Suzuki, Hirosho Uchiyama, Junichi Kurata, Yoshihiro Murakami and Masako Baba
Validation of Performances on Attendant Propelled Wheelchairs with Assisting Control Based on Autonomous Propelling Model

Optimization and Reasoning

Masahiro Arakawa
Hierarchy Genetic Algorithm to Solve Multi-Objective Scheduling Problems Involving Various Types of Assignments for Parallel Processing System

Yoshichika Tanaka, Hirohisa Narita, Ren Kanohira and Hideo Fujimoto
Productivity Analysis of Closed-loop Manufacturing System Which Performs Maintenance Activities

Toshiya Kaihara, Nobutada Fujii, Hiroyuki Hasegawa and Shinji Kurose
A Study on Optimization Method with Combinatorial Auction -Application to Resource Allocation Problem of Re-entrant Flow Shop-

Robots

Atsushi Kohama, Ryosuke Mori, Sho Komai, Masato Suzuki, Seiji Aoyagi, Jun Fujioka and Yoshitsugu Kamiya
Calibration of Kinematic Parameters of a Robot Using Neural Networks by a Laser Tracking System

Kuniya Shirazaki, Akitsugu Iwata and Ryuhei Nakatsu
Construction and Evaluation of a Robot Dance System

Masanori Goka, Akira Tsunaya and Toshiharu Taura
Evolutionary Artificial Neural Networks using Extended Minimal Simulation on Evolutionary Robotics

Hirofumi Niimi, Minoru Koike, Seichi Takeuchi and Noriyoshi Douhara
ROBO-BLOCK and Rational Formula of Robots

Sensors

Ryota Ishibashi, Ryuta Ozawa and Sadao Kawamura
Experimental Verification of a Mass Measurement Device under Zero Gravity with a Prismatic Variable Stiffness Mechanism

Takuro Aonuma, Shinya Kumagai, Minoru Sasaki, Motoki Tabata and Kazuhiro Hane
Piezoresistive Rotation Angle Sensor in Micromirror for Feedback Control

Kenta Maekawa, Yoshi Tomakura, Takayuki Fujita and Kazusuke Maenaka
Proposal of 2-axis Bulk-PZT Gyroscope
