Contents

Acronyms ........................................................... xvii

1 Introduction ................................................... 1
   1.1 “Performance” of Real-time Systems ......................... 2
   1.2 Requirements of Real-time Applications .................... 2
   1.3 Real-time Systems Revisited .................................. 3
   1.4 Quality and Performance of Real-time Systems ............... 5
   1.5 Preview and How to Use this Book ............................ 7

2 Performance Metrics for Real-time Systems ...................... 9
   2.1 Benchmarks and RTOS Standardisation ....................... 9
   2.2 DIN 19242 Performance Measurement Methods ............... 10
   2.3 Benchmark Programs ............................................. 12
      2.3.1 Rhealstone Benchmark ...................................... 12
      2.3.2 MiBench ...................................................... 12
   2.4 Timing Analysers ............................................... 13
      2.4.1 Hartstone Benchmark ...................................... 13
      2.4.2 SNU Real-time Benchmarks ................................. 14
   2.5 Performance Monitors .......................................... 14
      2.5.1 PapaBench ................................................... 15
      2.5.2 RT_STAP Benchmark ......................................... 15
      2.5.3 Benchmarks Oriented at Databases and Telecommunication 15
   2.6 Concluding Remarks on Test Methods and Benchmarks ........ 16

3 QoS Criteria for Real-time Systems ............................. 17
   3.1 Breakdown of QoS Criteria .................................... 18
   3.2 Concluding Remarks on QoS Criteria .......................... 19

4 QoS-oriented Design and Evaluation of Real-time Systems ......... 21
   4.1 Introducing QoS Parameters into the Design of Real-time Systems 22
      4.1.1 Hardware and Software Architecture Modelling .......... 22
4.1.2 Model Refinement and Checking .......................... 23
4.1.3 System Model Co-simulation ............................. 24
4.1.4 System Integration and Implementation ................. 25
4.2 System Evaluation ........................................ 25
4.3 System Certification ....................................... 25
4.4 Outlook .................................................. 26

5 QoS Decision Flowchart for Real-time Systems .............. 27
5.1 Predictability and Dependability ........................... 28
5.2 Qualitative Exclusive Criteria ............................. 28
  5.2.1 Functional Correctness (X1) ........................... 28
  5.2.2 Timeliness (X0) ...................................... 30
  5.2.3 Permanent Readiness (X2) ............................ 31
  5.2.4 Meeting All Applicable Physical Constraints (X3) .... 32
  5.2.5 Licensability (X4) .................................... 33
5.3 Qualitative Gradual Criteria .............................. 34
  5.3.1 Timeliness (G0) ...................................... 34
  5.3.2 Availability (G1) ..................................... 34
  5.3.3 Reliability (G2) ...................................... 35
  5.3.4 Safety (G3) .......................................... 36
  5.3.5 Security (G4) ......................................... 38
  5.3.6 Integrity (G5) ........................................ 39
  5.3.7 Robustness (G5.1) ................................... 40
  5.3.8 Complexity (G5.2) ................................... 40
  5.3.9 Maintainability (G6) ................................ 40
  5.3.10 Portability (G6.1) .................................. 40
  5.3.11 Flexibility (G6.2) .................................. 41
5.4 Quantitative Criteria ...................................... 41
  5.4.1 Timeliness (Q0) ...................................... 42
  5.4.2 Noise Suppression (Q1) ............................... 44
  5.4.3 Capacity Reserves (Q2) ............................... 44
  5.4.4 Overall Project Costs (Q3) ........................... 44

6 Design of Real-time Systems for QoS ......................... 45
6.1 Design for Predictability and Dependability .............. 45
  6.1.1 Design for Predictability ............................ 45
  6.1.2 Design for Availability ............................... 46
  6.1.3 Design for Safety .................................... 47
  6.1.4 Design for Reliability ............................... 53
6.2 Security-oriented Design .................................. 65
  6.2.1 Security Layers ...................................... 67
6.3 Concluding Remarks on Design for QoS .................... 70
7 Design in UML Oriented at QoS

7.1 UML for Real-time Systems
7.1.1 RT-UML
7.1.2 UML-RT
7.1.3 UML 2.0

7.2 UML Profile for Schedulability, Performance and Time Specification
7.2.1 General Resource Modelling Framework
7.2.2 General Time Modelling
7.2.3 General Concurrency Modelling
7.2.4 Schedulability Modelling
7.2.5 Performance Modelling
7.2.6 Applications of Real-Time CORBA
7.2.7 The MARTE Profile

7.3 UML Profile to Model QoS and FT Characteristics and Mechanisms

7.4 Project Life-cycle Management in UML

7.5 Design Verification in UML with Checklists
7.5.1 Use-case Checklist
7.5.2 Package Checklist
7.5.3 Class Checklist
7.5.4 Protocol Checklist
7.5.5 Association Checklist
7.5.6 Attributes Checklist
7.5.7 Inheritance Checklist
7.5.8 Cardinalities Checklist
7.5.9 Aggregation Composition Checklist
7.5.10 Sequence Diagram Checklist
7.5.11 State Diagram Checklist
7.5.12 Operations Checklist

7.6 Concluding Remarks on UML-oriented Design for QoS

8 Certification of Real-time Systems

8.1 Technical Standards
8.1.1 Telecommunication Standards
8.1.2 Operating Systems Standards

8.2 Technological Standards
8.2.1 ISO 900X Standards
8.2.2 Capability Maturity Model for Software
8.2.3 BS 7799 Security Standard

8.3 Technical Evaluation Standards
8.3.1 Evaluation of Software Products according to DIN 66272 / ISO/IEC 9126
8.3.2 Measuring and Rating Data Processing Performance with DIN 66273

8.4 Concluding Remarks on Certifying Real-time Systems
Real-time Systems' Quality of Service
Introducing Quality of Service Considerations in the Life Cycle of Real-time Systems
Gumzej, R.
2010, XIX, 131 p., Hardcover
ISBN: 978-1-84882-847-6
