

# Contents

<b>1</b>	<b>Energy and Cogeneration</b> .....	1
1.1	Introduction .....	1
1.1.1	Energy Concept.....	1
1.1.2	Energy and Its Impacts.....	2
1.2	Overview of World Energy .....	7
1.2.1	World Primary Energy Production and Consumption .....	7
1.2.2	Energy Consumption by the End-use Sector.....	9
1.2.3	World Carbon Dioxide Emissions .....	11
1.2.4	Energy Perspectives .....	12
1.3	Air Conditioning Needs.....	13
1.4	Cogeneration Systems .....	14
1.4.1	Centralized versus Distributed Power Generation .....	16
1.4.2	Cogeneration Technologies.....	17
1.4.3	Heat Recovery in Cogeneration Systems .....	19
1.4.4	Cogeneration System Selections .....	20
1.5	Cogeneration Fuel Cells – Sorption Air Conditioning Systems ....	22
1.5.1	Trigeneration.....	22
1.5.2	Fuel Cells in the Trigeneration Process.....	23
	References.....	24
<b>2</b>	<b>Thermodynamics of Fuel Cells</b> .....	25
2.1	Introduction .....	25
2.2	Thermodynamic and Electrochemical Principles .....	25
2.2.1	Electrochemical Aspects .....	25
2.2.2	Thermodynamic Principles .....	31
2.3	Fuel Cell Efficiency.....	33
2.4	Fuel Cell Operation .....	34
	References.....	36

<b>3</b>	<b>Selected Fuel Cells for Cogeneration CHP Processes .....</b>	<b>37</b>
3.1	Introduction .....	37
3.2	Fuel Cell Classification .....	37
3.2.1	The Proton Exchange Membrane Fuel Cell .....	38
3.2.2	Direct Methanol Fuel Cells .....	43
3.2.3	Alkaline Electrolyte Fuel Cells .....	45
3.2.4	Phosphoric Acid Fuel Cells .....	48
	References.....	53
<b>4</b>	<b>State of the Art of Sorption Refrigeration Systems .....</b>	<b>55</b>
4.1	Introduction .....	55
4.2	Commercial Systems .....	56
4.2.1	Absorption Chillers .....	57
4.2.2	Adsorption Chillers .....	59
4.2.3	Absorption and Adsorption Small Capacity Systems .....	60
4.3	Systems under Development .....	61
4.4	Research Studies.....	62
4.4.1	Experimental Studies .....	62
4.4.2	Theoretical Studies.....	66
	References.....	70
<b>5</b>	<b>Sorption Refrigeration Systems.....</b>	<b>75</b>
5.1	Introduction .....	75
5.2	Thermodynamic Principles.....	75
5.2.1	Heat to Work Energy Conversion .....	75
5.2.2	Vapor Compression Refrigeration Cycle .....	80
5.3	Sorption Processes.....	81
5.3.1	Introduction.....	81
5.3.2	The Sorption Refrigeration Cycle .....	82
5.3.3	Sorption Refrigeration Cycle Efficiency .....	84
5.3.4	Sorption Work Fluids.....	86
5.4	Absorption Refrigeration Systems.....	88
5.4.1	Introduction.....	88
5.4.2	Working Substances.....	88
5.4.3	Absorption Refrigeration Cycles.....	90
5.5	Advanced Cycles.....	95
5.5.1	Multieffect Absorption Refrigeration Cycles.....	95
5.5.2	Absorption Refrigeration Cycles with a Generator/Absorber/Heat Exchanger .....	97
5.5.3	Absorption Refrigeration Cycle with Absorber-heat-recovery .....	98
5.6	Adsorption Refrigeration System .....	99
5.6.1	Adsorbent/Adsorbate Working Pair .....	100
	References.....	100

- 6 Cogeneration Fuel Cells – Air Conditioning Systems** ..... 103
  - 6.1 Introduction ..... 103
  - 6.2 Considerations for Cogeneration Systems Based on Fuel Cells and Sorption Air Conditioning ..... 103
    - 6.2.1 Coupling of Technologies ..... 105
    - 6.2.2 Concepts of Efficiency ..... 106
  - 6.3 Modeling of Cogeneration Systems Using Fuel Cells. Promising Applications ..... 107
    - 6.3.1 Operation Conditions ..... 108
    - 6.3.2 Modeling of a Cogeneration System Using an Absorption Air Conditioning System with Water–Lithium Bromide as Working Fluid ..... 109
    - 6.3.3 Modeling of a Cogeneration System Using an Absorption Air Conditioning System with a Water–Carrol™ as Working Fluid ..... 111
    - 6.3.4 Modeling of a Cogeneration System Using an Absorption Air Conditioning System with Monomethylamine–Water as Working Fluid ..... 114
  - 6.4 Modeling of Trigenation Systems ..... 116
  - 6.5 Conclusion ..... 119
  - References ..... 119
  
- 7 Potential Applications in Demonstration Projects** ..... 121
  - 7.1 Introduction ..... 121
  - 7.2 A New Era in Energy Revolution: Applications of Fuel Cells ..... 122
    - 7.2.1 Stationary Applications ..... 123
    - 7.2.2 Mobile and Transportation Applications ..... 125
    - 7.2.3 Portable Applications ..... 126
    - 7.2.4 Military Applications ..... 127
    - 7.2.5 Combined Heat and Power ..... 127
  - 7.3 Examples of Combined Heat and Electricity Use from Fuel Cells in Demonstration Projects ..... 128
    - 7.3.1 Stationary PAFC Cogeneration Systems ..... 128
    - 7.3.2 PEMFC in Mobile Systems ..... 128
    - 7.3.3 CHP Systems with Fuel Cells ..... 129
  - References ..... 131
  
- 8 Profitability Assessment of the Cogeneration System** ..... 133
  - 8.1 Introduction ..... 133
  - 8.2 Elements of Profitability Assessment ..... 134
    - 8.2.1 Time Value of Money ..... 134
    - 8.2.2 Annual Costs and Cash Flows ..... 137
    - 8.2.3 Capital Costs ..... 137
    - 8.2.4 Methods for Estimating Profitability ..... 138

8.3	Profitability Assessment of the Systems.....	141
8.3.1	Profitability Assessment of a PEM Fuel Cell.....	141
8.3.2	Profitability Assessment of a Compression Air Conditioning System .....	143
8.3.3	Profitability Assessment of an Absorption Air Conditioning System .....	145
8.3.4	Profitability Assessment for the PEMFC-CACS .....	148
8.3.5	Profitability Assessment for the PEMFC-AACS .....	149
8.3.6	Comparison of the Profitability Assessment of the PEMFC-AACS and the PEMFC-CACS .....	151
8.4	Conclusions .....	153
