## Part I State of the Art

<b>1</b>	<b>Background and Motivation</b> .....	3
1.1	Rapid One-of-a-kind Product Development .....	3
1.1.1	The Performance of RPD .....	5
1.1.2	Product Development Process Evaluation .....	7
1.1.3	Benefits of RPD .....	8
1.1.4	Drivers for RPD .....	9
1.1.5	Emerging Research Issues .....	10
1.2	Motivation for the Book .....	12
1.3	Book Organisation .....	13
	References .....	15
<b>2</b>	<b>Review of Rapid OKP Product Development</b> .....	17
2.1	Introduction .....	17
2.2	Overview of OKP and Internet-based Product Development Systems .....	20
2.2.1	Review of OKP .....	20
2.2.2	Requirements for the Next Generation of OKP Systems ....	23
2.2.3	Role of IRPD .....	24
2.3	Review of Internet-based PD Approaches .....	25
2.3.1	Collaborative Product Design .....	25
2.3.2	Design for X (DFX) via the Internet .....	27
2.3.3	Internet-based Decision Support .....	28
2.3.4	Internet-based Manufacturing Scheduling, Planning and Control .....	30
2.3.5	Internet-based Concurrent Engineering .....	32
2.4	Review of IRPD Approaches .....	33
2.4.1	Collaborative Approach .....	33
2.4.2	AI and Knowledge Approach .....	34
2.4.3	Integrated and Concurrent Approach .....	35

2.5	Review of Implementing Technologies for Developing IRPD Systems .....	36
2.5.1	ActiveX and DCOM Technology .....	36
2.5.2	Java Technology .....	38
2.5.3	CORBA and Agent Technology .....	39
2.5.4	STEP and SDAI .....	41
2.6	Research Issues and Future Trends of IRPD .....	42
2.6.1	Implementation Issues .....	42
2.6.2	Systems Integration Methodologies .....	43
2.6.3	CSCW and Interfacing Techniques .....	44
2.6.4	Global Cost/Lead Time Optimisation .....	46
2.6.5	Virtual Reality for Manufacturing .....	48
2.7	A Proposed IRPD System .....	49
2.8	Conclusion .....	51
	References .....	52
<b>3</b>	<b>Product Modelling in Support of Rapid OKP Development: a Review</b> .....	<b>63</b>
3.1	Introduction .....	63
3.2	Product Modelling Methodologies .....	65
3.2.1	Solid Product Modelling .....	65
3.2.2	Feature-based Product Modelling .....	66
3.2.3	Knowledge-based Product Modelling .....	67
3.2.4	Integrated Product Modelling .....	68
3.3	Recent Developments in Product Modelling .....	70
3.3.1	Object-oriented Product Modelling .....	71
3.3.2	STEP-based Product Modelling .....	72
3.3.3	UML-based Product Modelling .....	75
3.4	Research Issues and Future Trends in Product Modelling .....	76
3.4.1	Modelling Product Family to Support Customised Manufacturing .....	77
3.4.2	Product Modelling in Conceptual Design .....	78
3.4.3	Modelling Assembly Product .....	78
3.4.4	Product Model in PDM/PLM Systems .....	79
3.5	Generic Product Modelling Framework .....	79
3.6	Conclusions and Future Work .....	80
	References .....	81
 <b>Part II System and Framework</b>		
<b>4</b>	<b>Integrated OKP Product Development System</b> .....	<b>89</b>
4.1	Introduction .....	89
4.2	Integrated Product Development System for Sheet Metal Design and Manufacturing .....	91
4.3	Internet-based Integrated Data Environment .....	94
4.4	QFD-based Global Customer User Interfaces .....	95

4.5	Simulation Platforms .....	96
4.6	Knowledge Bases to Support Intelligent Design and Manufacturing	97
4.7	Case Studies .....	99
4.7.1	Programming Tools .....	99
4.7.2	Application Modules Test .....	100
4.8	Summary .....	102
	References .....	102
<b>5</b>	<b>Compound Machining Method for OKP Product Development .....</b>	<b>105</b>
5.1	Introduction .....	105
5.2	Integrated System Architecture for Punching and Cutting .....	108
5.3	Data Integration Platform for Sheet Metal Compound Manufacturing .....	110
5.4	Knowledge-based RTCAPP System for CNC Punching and Cutting .....	112
5.4.1	Tools Sequencing Real-time Optimisation Algorithm for Punching .....	113
5.4.2	Knowledge-based CAPP for Sheet Metal Cutting .....	117
5.4.3	Tool Path Optimisation for Cutting and Cost Estimation ...	119
5.5	Simulation Platform for Compound Manufacturing .....	120
5.6	Conclusions .....	122
	References .....	123
<b>6</b>	<b>An Agent-based Sheet Metal Process Planning System .....</b>	<b>125</b>
6.1	Introduction .....	125
6.2	Literature Review .....	127
6.2.1	Agent Technology in Process Planning .....	127
6.2.2	Issues in Developing Agent-based Process Planning Systems .....	129
6.3	An Agent-based Sheet Metal Process Planning System .....	131
6.3.1	Agent-oriented Analysis and Modelling .....	131
6.3.2	The Structure of Agent-based Process Planning System ...	134
6.3.3	Cooperation Between Agents .....	142
6.4	Conclusion .....	146
	References .....	146
<b>Part III Product Modelling and Integration</b>		
<b>7</b>	<b>Generic Product Modelling Framework .....</b>	<b>151</b>
7.1	Introduction .....	151
7.2	Literature Review .....	153
7.2.1	Problems of Integration .....	154
7.2.2	Problems of Cooperation .....	155
7.3	A Generic Product Modelling Framework .....	155
7.3.1	STEP-based Modelling Environment .....	157

7.3.2	'Five-phase' Modelling Methodology	160
7.3.3	EDM Data Exchange and Sharing Methods	162
7.3.4	Conclusion and Future Work	164
	References	165
<b>8</b>	<b>EXPRESS Data Model</b>	167
8.1	Structure of EDM	167
8.2	Product General Information Module	170
8.3	Product Manufacturing Information Module	171
8.3.1	Supplier Information Schema	172
8.3.2	Manufacturing Facility Schema	173
8.3.3	Product Document Schema	175
8.3.4	Bill of Material Information Schema	177
8.3.5	Material Information Schema	179
8.3.6	Assembly Information Schema	180
8.3.7	Process Planning Schema	184
8.3.8	Inspection Information Schema	188
8.3.9	Cost Information Schema	189
8.4	Resources Module	192
8.5	Conclusion	192
	References	193
<b>9</b>	<b>Generic Product Modelling Framework: Case Study</b>	195
9.1	Introduction	195
9.2	Literature Review	197
9.2.1	Geometry-based Modelling Methods	197
9.2.2	Feature-based Modelling Methods	198
9.2.3	Integrated Modelling Methods	198
9.3	A STEP-enabled Product Modelling Framework	199
9.3.1	Generic Product Modelling Framework	199
9.3.2	Structure of EDM	200
9.4	Case Study	201
9.4.1	Modelling Product Geometric Data	203
9.4.2	Modelling Product General Information	204
9.4.3	Modelling Product Inspection Information	206
9.5	A Prototype Product Data Management System	208
9.5.1	Product Data Input/Query Interface	208
9.5.2	Product Database	209
9.6	Modelling Product Manufacturing Process Data	210
9.7	Modelling Product Assembly Information	212
9.8	Conclusion and Future Work	215
	References	217

<b>10 Information Framework for Rapid OKP Product Development</b> . . . . .	219
10.1 Background and Motivation . . . . .	219
10.2 The Role of the Information Framework . . . . .	220
10.3 The Zero Thickness and Zero Bend Radius Principle . . . . .	222
10.4 Information Integration Framework . . . . .	223
10.4.1 The Step Structure Information Framework . . . . .	224
10.4.2 Information Relationship Representation of Sheet Metal Parts . . . . .	225
10.4.3 Modelling Languages and Methodology . . . . .	228
10.5 Case Study . . . . .	229
10.6 Conclusion . . . . .	232

## **Part IV Product Development Methods, Algorithms and Tools**

<b>11 Cost Estimation and Optimisation Framework for Rapid Product Development</b> . . . . .	239
11.1 Introduction . . . . .	239
11.2 Literature Review . . . . .	242
11.3 Overall System Structure of the Rapid and Economic Product Development . . . . .	245
11.4 Cost Index Structure . . . . .	249
11.5 Cost Estimation and Optimisation . . . . .	251
11.5.1 Generative Cost Estimate Method . . . . .	253
11.5.2 Variant and Knowledge-based Cost Estimate Method . . . . .	254
11.5.3 Considerations of Cost Estimate . . . . .	254
11.6 Implementation of the Cost Estimate and Optimal Control System . . . . .	255
11.6.1 Example Scenario and System Description . . . . .	255
11.6.2 Cost Estimate and Optimisation for Making the Example Part . . . . .	257
11.7 Conclusion . . . . .	261
References . . . . .	262
<b>12 A Global Data Structure for Supporting Rapid Product Development</b> . . . . .	265
12.1 Introduction . . . . .	265
12.2 Overview of System Structure . . . . .	266
12.3 STEP-based Integrated Data Structure . . . . .	269
12.4 The WWW-based Knowledge Base System . . . . .	271
12.4.1 Knowledge Base Structure . . . . .	272
12.4.2 Industrial Implementation . . . . .	273
12.5 Conclusions . . . . .	276
References . . . . .	277

<b>13</b>	<b>An Internet-based Product Information Management System</b>	279
13.1	Introduction	279
13.2	The System Framework	281
13.3	The Internet-based Information Management System	282
13.3.1	Product Data Model	282
13.3.2	Product Information Management System	283
13.3.3	WWW Database Tool	286
13.4	The Internet-based System Structure	287
13.4.1	IAT and CCT	288
13.4.2	Incremental Process Planning (IPP)	289
13.4.3	Cost Optimisation Model	290
13.5	System Implementation	290
13.6	Conclusion	292
	References	292
<b>14</b>	<b>Internet-based “Design for X” for Rapid and Economical Tool-/Mould-making</b>	295
14.1	Introduction	295
14.2	System Structure	296
14.3	DFX Knowledge Base Structure	298
14.3.1	Knowledge Base Structure	298
14.3.2	Generic DFX Model	299
14.4	DFX via the Internet	300
14.4.1	IDFM for Rapid Mould Development	300
14.4.2	IDFC for Economical Mould Development	302
14.5	Conclusion	306
	References	306
<b>15</b>	<b>Optimal Process Planning for Compound Laser Cutting and Punching</b>	309
15.1	Introduction	309
15.2	Literature Review	311
15.3	Genetic Approach	312
15.3.1	Genetic Coding String	314
15.3.2	Initial Population	314
15.3.3	Fitness Function	314
15.3.4	Genetic Reproduction	315
15.4	Case Study	318
15.4.1	Sheet Metal Path Planning Problem	318
15.4.2	Sheet Metal Nesting	323
15.4.3	Discussion	325
15.5	Conclusion	325
	References	326

**16 Conclusion and Future Work** ..... 327

    16.1 The Goal of this Book ..... 327

    16.2 Major Achievements and Research Findings ..... 327

    16.3 Future Work ..... 331

        16.3.1 Extending the Internet-based Rapid OKP Product  
                Development System ..... 331

        16.3.2 Continually Upgrading the Internet-based Rapid OKP  
                Product Development System ..... 331

        16.3.3 Finding New Implementing Methodologies ..... 331

        16.3.4 Achieving High Level System Integration ..... 332

        16.3.5 Developing New CSCW and Interfacing Techniques ..... 332

        16.3.6 Expanding the Information Integration Framework ..... 333

        16.3.7 Improving the Cost Estimation  
                and Optimisation Algorithm ..... 333

        16.3.8 Further Development of Internet-based DFX ..... 334

    References ..... 334

**Appendix**

A.1 Examples of the Internet-based Product Development Systems ..... 338

A.2 Current Product Modelling Methods and Tools ..... 343

A.3 EDM Schemas ..... 348

A.4 QFD Program ..... 368

    A.4.1 Programs for QED Interface and Interactions  
            with Microsoft Access Database ..... 368

    A.4.2 Programs for QFD Calculations and Table Operations ..... 378

    A.4.3 Programs for Tech Correlation ..... 383

A.5 The Integrated CAD/CAPP/CAM System Program ..... 384

    A.5.1 Source Code for Process Planning for Sheet Metal Cutting .. 384

A.6 Database Program ..... 419

    A.6.1 Product Database Operation ..... 419

    A.6.2 Interface Programs ..... 423

    A.6.3 Programs for Tool Database Management ..... 429

    A.6.4 Programs for Manufacturing Information Management ..... 439

A.7 Experimental Results of Investigation Genetic Parameters ..... 442

**Index** ..... 443
