Contents

Preface v
Contributors ix

1 Stem Cells and the Art of Mesenchymal Maintenance
Kevin C. Hicok and Marc H. Hedrick 1

2 Osteogenic Growth Factors and Cytokines and Their Role in Bone Repair
Louis C. Gerstenfeld, Cory M. Edgar, Sanjeev Kakar, Kimberly A. Jacobsen, and Thomas A. Einhorn 17

3 Bone Allograft Safety and Performance
Calin S. Moucha, Regis L. Renard, Ankur Gandhi, Sheldon S. Lin, and Rocky S. Tuan 46

4 Biodegradable Orthopedic Implants
Hansoo Park, Johnna S. Temenoff, and Antonios G. Mikos 55

5 Titanium Fiber Mesh: A Nondegradable Scaffold Material
Juliette van den Dolder and John A. Jansen 69

6 Engineering Polymeric Scaffolds for Bone Grafts
Martha W. Betz, Diana M. Yoon, and John P. Fisher 81

7 Injectable Scaffolds for Bone and Cartilage Regeneration
Claudio Migliaresi, Antonella Motta, and Anthony T. DiBenedetto 95

8 Motion and Bone Regeneration
Ching-Chang Ko, Martha J. Somerman, and Kai-Nan An 110

9 Dental Applications of Bone Biology
Thomas W. Oates and David L. Cochran 129

10 Multiscale Computational Engineering of Bones: State-of-the-Art Insights for the Future
Melissa L. Knothe Tate 141

Index 161
